Introduction:

Very often a forensic expert is called upon to establish identity where the body is mutilated or decomposed beyond recognition or available as fragmentary remains. Forensic anthropology is the application of the science of anthropology in the medico-legal setting. In tandem with the development of forensic pathology, forensic anthropology has undergone a sea change and thus there is a need for forensic experts in India to refresh their knowledge and training. The Department of Forensic Medicine & Toxicology, Yenepoya Medical College, Mangalore now offers a unique, innovative postgraduate diploma in forensic anthropology, which ensures that participants get updated knowledge and an enriching hands-on experience. This one-year hybrid course, designed especially for the practicing forensic expert, aims to fill the gap in the armamentarium of the forensic specialist, with nationally and internationally renowned forensic anthropologists as resource persons.

Objectives:

Successful participants will be able to

- Establish identity in mass disasters
- Effectively use the methods of collection of evidence for identification
- Identify the relevant legislations from the Indian Penal Code and Criminal Procedure Code that defines criteria for admissibility of evidence

Course Duration:

One year (three modules); blended learning

Subject Content:

The topics covered will be relevant, the teaching will be interactive and assignments will be given on regular basis. The following topics will be covered in the three modules:

- Crime scene mapping and investigation
- Introduction to taphonomy and post mortem interval
- Sex determination from bones and skeletal remains
- Age estimation from long bones
- Forensic odontology
- Fragmented and commingled remains
- Investigating Mass Disaster
- Stature

Eligibility:

MBBS or BDS graduates; postgraduate students of MD or MDS; B Sc or M Sc Criminology; MSc Forensic Sciences; BSc/ MSc Nursing; MSc Anatomy; LLB or LLM
