

YENEPOYA

(DEEMED TO BE UNIVERSITY)

Recognized under Sec 3(A) of the UGC Act 1956

Accredited by NAAC with 'A' Grade

YENEPOYA (DEEMED TO BE UNIVERSITY)

Deralakatte, Mangaluru -575018

**REGULATIONS AND CURRICULUM GOVERNING
UNDERGRADUATE PROGRAM
BACHELOR OF SCIENCE (HONOURS) FORENSIC SCIENCE**

(REVISED CURRICULUM – AMENDED UPTO 2020)

ATTESTED

Dr. Mangadhara Somayaji K S
Registrar
Yenepoya (Deemed to be University)
University Road, Deralakatte
Mangalore 575 018, Karnataka.

NOTIFICATION – 39-ACM/2020 dtd. 09.09.2020

Sub: Introducing the subject 'Social Responsibility and Community Engagement' in the curriculum of BCA, BBA, B.Com and B.Sc. courses

Ref: Resolution of the Academic council at its 39th meeting held on 27.08.2020, vide agenda - 13

The Academic Council at its 39th meeting held on 27.08.2020 & subsequently the Board of Management at its 50th meeting held on 28.08.2020 have resolved to accept the proposal to introduce the subject 'Social Responsibility and Community Engagement' and to increase the total credits by two credit points, in the following BCA, BBA, B.Com and B.Sc. courses:-

1. BCA (Big Data Analytics and Computing)
2. B.Sc. (Hons) Forensic Science
3. BBA (Logistics & Port Management)
4. BBA (Aviation, Travel & tourism)
5. BBA (Entrepreneurship, International Business Analytics)
6. BBA (Aviation & Logistics)
7. BBA (Journalism, Event, Media & Communication)
8. B.Com (Hons) (International Accounting and Finance)
9. B.Com (International Management Accounting)
10. B.Com (Hons) (Aviation & Logistics)
11. B.Com (Finance, Taxation and Auditing)
12. B.Sc. (HS) (Aviation, Travel and Tourism)
13. B.Sc. (Food Science & Nutrition)

REGISTRAR

To,

The Principal, Yenepoya Institute of Arts, Science, Commerce & Management

B.Sc. (Hons) in Forensic Science

Objectives

The Universal Declaration of Human Rights directs the member nations to create such conditions under which the ideals of free human beings, enjoying civil and political freedom from fear and want, can be achieved. The Constitution of India, through its various articles, strives to ensure security and safety of citizens in accordance with the principles of Universal Declaration of Human Rights. However, crime is a violation of these principles. In a country like India, where majority of population is uneducated, social set up is heterogeneous, public-police relations are not very cordial, poverty is rampant and unemployment widespread, it is not surprising that crime rate is increasing exponentially.

If we have to create conditions conducive to harmonious development, we must mitigate the crime rate. This can best be achieved by relying on the support of forensic science system. Unfortunately, in our country, forensic science is not viewed as a core investigative skill in crime detection. In fact, there is a lack of understanding of the forensic process itself. It is for this reason that less than 10% of the police cases are, at present, being referred for forensic examination. Less than 5% are solved by the application of forensic science. The rest are solved by third degree method – a practice which the human rights organizations will not allow in days to come.

In majority of serious crime cases, hi-tech measures are being adopted by perpetrators of crime. The counter measures have to be more sophisticated to surpass them. This calls for strengthening the foundations of forensic science at national level. It is with this aim that we wish to initiate a B.Sc. (Hons) Course in Forensic Science.

The following are the objectives of this course.

1. To emphasize the importance of scientific methods in crimedetection.
2. To disseminate information on the advancements in the field of forensicscience.
3. To highlight the importance of forensic science for perseverance of thesociety.
4. To review the steps necessary for achieving highest excellence in forensicscience.
5. To generate talented human resource, commensurating with latest requirements of forensicscience.
6. To provide a platform for students and forensic scientists to exchange views, chalk-out collaborative programs and work in a holistic manner for the advancement of forensicscience.

Duration of the Course

The duration of the course shall be three years. Each academic year shall be divided into two semesters. The first academic year shall comprise the first and second semesters, the second academic year, the third and fourth semesters, and the third academic year as the fifth and sixth semesters.

Eligibility

A candidate who has passed the two years Pre-University Examination conducted by the Pre-University Education Board in the State of Karnataka or any other examination considered as equivalent thereto by University is eligible for admission to these programmes.

- * Passed Class XII from a recognized Board in sciencestream.
- * The admission will be done on merit basis taking into consideration the aggregate

marks obtained in the following three subjects:

- (i) Physics
- (ii) Chemistry
- (iii) Any one out of Mathematics or Biology in whichever subject the candidate has scored higher marks.

Selection Process

Application forms will be available in the official website of Yenepoya University (www.yenepoya.edu.in) and the college office for the applicants. A merit list will be prepared of selected candidates based on the 12th class marks /PUC marks. Reservation of seats will be followed as per the university bye laws.

Total Intake of Students

75 students will be registered per year for the course.

Medium of Instruction

The medium of instruction and examination shall be English.

Minimum Course Curriculum for Undergraduate Courses under Choice Based Credit System

Ministry of Human Resource Development (HRD), Govt. of India, has already initiated the process for developing New Education Policy (NEP) in our country to bring out reforms in Indian education system. University Grants Commission (UGC) participates more actively in developing National Education Policy, its execution and promotion of higher education in our country. The UGC has already initiated several steps to bring equity, efficiency and academic excellence in National Higher Education System. The important ones include innovation and improvement in course- curricula, introduction of paradigm shift in learning and teaching pedagogy, examination and education system.

The education plays enormously significant role in building of a nation. There are quite a large number of educational institutions, engaged in imparting education in our country. Majority of them have entered recently into semester system to match with international educational pattern. However, our present education system produces young minds lacking knowledge, confidence, values and skills. It could be because of complete lack of relationship between education, employment and skill development in conventional education system. The present alarming situation necessitates transformation and/or redesigning of education system, not only by introducing innovations but developing “learner-centric approach in the entire education delivery mechanism and globally followed evaluation system as well.

Majority of Indian higher education institutions have been following marks or percentage based evaluation system, which obstructs the flexibility for the students to study the subjects/courses of their choice and their mobility to different institutions. There is need to allow the flexibility in education system, so that students depending upon their interests and aims can choose inter-disciplinary, intra-disciplinary and skill-based courses. This can only be possible when choice based credit system (CBCS), an internationally acknowledged system, is adopted. The choice based credit system not only offers opportunities and avenues to learn core subjects but also exploring additional avenues of learning beyond the core subjects for holistic development of an individual. The CBCS will undoubtedly facilitate us bench mark our courses with best international academic practices. The CBCS has more advantages than disadvantages.

Advantages of the choice based credit system

Shift in focus from the teacher-centric to student-centric education.

Student may undertake as many credits as they can cope with (without repeating all courses in a given semester if they fail in one/more courses).

CBCS allows students to choose inter-disciplinary, intra-disciplinary courses, skill oriented papers (even from other disciplines according to their learning needs, interests and aptitude) and more flexibility for students).

CBCS makes education broad-based and at par with global standards. One can take credits by combining unique combinations. For example, Physics with Economics, Microbiology with Chemistry or Environment Science etc.

CBCS offers flexibility for students to study at different times and at different institutions to complete one course (ease mobility of students). Credits earned at one institution can be transferred.

Choice Based Credit System (CBCS)

The CBCS provides an opportunity for the students to choose courses from the prescribed courses comprising core, elective/minor or skill based courses. The courses can be evaluated following the grading system, which is considered to be better than the conventional marks system. Therefore, it is necessary to introduce uniform grading system in the entire higher education in India. This will benefit the students to move across institutions within India to begin with and across countries. The uniform grading system will also enable potential employers in assessing the performance of the candidates. In order to bring uniformity in evaluation system and computation of the Cumulative Grade Point Average (CGPA) based on student's performance in examinations, the UGC has formulated the guidelines to be followed.

1. Outline of Choice Based Credit System

1.1 Core Course A course, which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.

2. Elective Course Generally a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/ subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course.

2.1 Discipline Specific Elective (DSE) Course Elective courses may be offered by the main discipline/subject of study is referred to as Discipline Specific Elective. The University/Institute may also offer discipline related Elective courses of interdisciplinary nature (to be offered by main discipline/subject of study).

2.2 Dissertation/Project An elective course designed to acquire special/advanced knowledge, such as supplement study/support study to a project work, and a candidate studies such a course on his own with an advisory support by a teacher/faculty member is called dissertation/project.

2.3 Generic Elective (GE) Course An elective course chosen generally from an unrelated discipline/subject, with an intention to seek exposure is called a Generic Elective.

P.S. A core course offered in a discipline/subject may be treated as an elective by other discipline/subject and vice versa and such electives may also be referred to as Generic Elective.

3. Ability Enhancement Compulsory Courses (AECC) The Ability Enhancement (AE) Courses may be of two kinds Ability Enhancement Compulsory Courses (AECC) and Skill Enhancement Courses (SEC). "AECC" courses are the courses based upon the content that leads to Knowledge enhancement; i. Environmental Science and ii. English/MIL Communication. These are mandatory for all disciplines. SEC courses are value-based and/or skill-based and are aimed at providing hands-on-training, competencies, skills, etc.

3.1 Ability Enhancement Compulsory Courses (AECC) Environmental Science, English Communication/MIL Communication.

3.2 Skill Enhancement Courses (SEC) These courses may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge. Introducing Research Component in Under-Graduate Courses.

Project work/Dissertation is considered as a special course involving application of knowledge in solving / analyzing /exploring a real life situation / difficult problem. A Project/Dissertation work would be of 6 credits. A Project/Dissertation work may be given in lieu of a discipline specific elective paper.

4. Implementation

The CBCS may be implemented in Central/State Universities subject to the condition that all the stakeholders agree to common minimum syllabi of the core papers and at least follow common minimum curriculum as fixed by the UGC. The allowed deviation from the syllabi is 20 % at the maximum.

The universities may be allowed to finally design their own syllabi for the core and elective papers subject to point no. 1. UGC may prepare a list of elective papers but the universities may further add to the list of elective papers they want to offer as per the facilities available.

Number of Core papers for all Universities has to be same for both UG Honours as well as UG Program.

Credit score earned by a student for any elective paper has to be included in the student's overall score tally irrespective of whether the paper is offered by the parent university (degree awarding university/institute) or not.

For the introduction of AE Courses, they may be divided into two categories

AE Compulsory Courses the universities participating in CBCS system may have common curriculum for these papers. There may be one paper each in the 1st two semesters viz. (i) English/MIL Communication, (ii) Environmental Science.

Skill Enhancement Courses The universities may decide the papers they may want to offer from a common pool of papers decided by UGC or the universities may choose such papers themselves in addition to the list suggested by UGC. The universities may offer one paper per semester for these courses. The university/Institute may plan the number of seats per elective paper as per the facility and infrastructure available.

An undergraduate degree with Honours in a discipline may be awarded if a student completes 14 core papers in that discipline, 2 Ability Enhancement Compulsory Courses (AECC), minimum 2 Skill Enhancement Courses (SEC) and 4 papers each from a list of Discipline Specific Elective and Generic Elective papers respectively.

An undergraduate Program degree in Science disciplines may be awarded if a student completes 4 core papers each in three disciplines of choice, 2 Ability Enhancement Compulsory Courses (AECC), minimum 4 Skill Enhancement Courses (SEC) and 2 papers each from a list of Discipline Specific Elective papers based on three disciplines of choice selected above, respectively.

An Undergraduate program degree in Humanities/ Social Sciences/ Commerce may be awarded if a student completes 4 core papers each in two disciplines of choice, 2 core papers each in English and MIL respectively, 2 Ability Enhancement Compulsory Courses (AECC), minimum 4 Skill Enhancement Courses (SEC), 2 papers each from a list of Discipline Specific Elective papers based on the two disciplines of choice selected above, respectively, and two papers from the list of Generic Electives papers.

The credit(s) for each theory paper/practical/tutorial/project/dissertation will be as per the details given in A, B, C, D for B.Sc. Honours, B.A./B.Com. Honours, B.Sc. Program and B.A./B.Com. Program, respectively.

Wherever a University requires that an applicant for a particular M.A./M.Sc. /Technical/Professional course should have studied a specific discipline at the undergraduate level, it is suggested that obtaining 24 credits in the concerned discipline at the undergraduate level may be deemed sufficient to satisfy such a requirement for admission to the M.A./M.Sc./Technical/Professional course.

Proposed Scheme for Choice Based Credit System

	CORE COURSE (14)	Ability Enhancement Compulsory Course (AECC) (2)	Skill Enhancement Course (SEC) (2)	Elective Discipline Specific DSE (4)	Elective Generic (GE) (4)
I	C 1	(English/ MIL Communication)/ Environmental Science			GE-1

V	C 12			DSE-1	
	C 13			DSE -2	
VI	C 14			DSE -3	
	C 15			DSE -4	

Details of courses under B.Sc. (Hons.)

Course		*Credits
Theory+ Practical	Theory + Tutorial	
I. Core Course		
(14 Papers)	14X4= 56	14X5=70
Core Course Practical / Tutorial*		
(14 Papers)	14X2=28	14X1=14
II. Elective Course (8 Papers)		
A.1. Discipline Specific Elective	4X4=16	4X5=20
(4 Papers)		
A.2. Discipline Specific Elective		
Practical / Tutorials*	4 X 2=8	4X1=4
(4 Papers)		
B.1. Generic Elective/		
Interdisciplinary	4X4=16	4X5=20
(4 Papers)		
B.2. Generic Elective		
Practical / Tutorials*	4 X 2=8	4X1=4
(4 Papers)		
*Optional Dissertation or project work in place of one Discipline Specific elective paper (6 credits) in 6th Semester		
III. Ability Enhancement Courses		
1. Ability Enhancement		
Compulsory Courses (AECC)	3 X 2=6	3 X 2=4
(3 Papers of 2 credits each)		
Environmental Science		
English Communication/MIL		
Social responsibility and		
community Enhancement		
2. Skill Enhancement Courses (SEC)		
(Minimum 2, Max. 4)	2 X 2=4	2 X 2=4
(2 Papers of 2 credits each)		
Total credit= 140		Total credit= 140

Institute should evolve a system/policy about ECA

General Interest/Hobby/Sports/NCC/NSS/related courses on its own. *wherever there is a practical there will be no tutorial and vice-versa.

5. Co-Curricular and Extra Curricular Activities

A student shall opt for any one of the following activities in the first four semesters offered in the college

A) N.S.S.

B) Sports and Games

C) Other Co-Curricular and Extra-Curricular Activities as prescribed by the university Evaluation of Co-and Extra Curricular Activities is as per the procedure evolved by the university from time to time.

6. Attendance and Change of Subjects

A candidate shall be considered to have satisfied the requirement of attendance for a semester if he/she attends not less than 75% of the number of classes held including EC & CC.

A candidate who does not satisfy the requirement of attendance even in one subject shall not be permitted to take the whole University examination of that semester and he/she shall seek re-admission to that Semester in a subsequent year.

Whenever a change in a subject is permitted the attendance in the changed subject shall be calculated by taking into consideration the attendance in the previous subject studied by the candidate.

If a candidate represents his/her Institution/University/ Karnataka State/ Nation in Sports/ NSS/ Cultural or any officially sponsored activities he/she may be permitted to claim attendance for actual number of days participated, based on the recommendation of the Head of the Institution concerned. If a candidate is selected to participate in national level events such as Republic Day Parade etc., he/she may be permitted to claim attendance for actual number of days participation based on the recommendation of the head of the Institution concerned.

7. Teaching Learning Methodology

The instructors will choose the pedagogy according to the course content and its applications from the methods provided below.

Lectures, Class discussions, reading assignments, Discussion groups. Lecture-demonstration, Student Presentation, Panel discussion by student panels from the class. Student reports by individuals, Student-group reports. Debate (informal) on current issues by students Forums Bulletin boards, Small groups such as task oriented, discussion, Textbook assignment. Reading assignments in journals, monographs, Assignment to outline portions of the textbook, Assignment to outline certain supplementary readings, Debates (formal) . Crossword puzzles Maintaining Portfolios / Diaries. Reports on published research studies, Library research on topics or problems .Written book reports by students , Interviews, Audio-tutorial lessons , Open textbook study ,Committee projects--small groups

,Individual projects , Quiz, Use of dramatization, skits, plays(street plays) ,Student construction of diagrams, charts, or graphs, Making of posters by students , Problem solving or case studies. Use of flip chart board by instructor as aid in teaching, Use of diagrams, tables, graphs, and charts by instructor in teaching. Use of displays by instructor, Use of slides, Use of motion pictures, educational films, videotapes. Use of recordings (Ted Talks). Role playing, peer teaching. Coaching: special assistance provided for students having difficulty in the course .VIVA, filling out forms (income tax, checks). Visit an "ethnic" locations or commercial establishments or community. On the job training, specialize in other countries and in India Visit an employment agency. Campaigning, Volunteering, Prepare mock newspaper on specific topic or era, an entrepreneurial activity. Writing reports or project proposals.

8. Examination Structure for Written exam

	Marks
Internal Assessment	25
Final Examination	75
	100

9. Continuous Internal Assessment (CIA)

Internal Assessment for each course is continuous, and details for each test are notified well in advance. CIA consists of the following

SN	Internal Assessment for 25 marks	Weightage
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/ Class Participation /Attitude	10
	Total	25

10. The marks of the internal assessment shall be published on the notice board of the college for information of the students.

11. Registration for Examinations

A candidate shall register for all the papers of a semester when he/she appears for the examination of that semester for the first time.

12. Conduct of Examinations

There shall be examinations at the end of each semester, ordinarily during November/December for odd semesters and during April/May for even semesters, as prescribed in the Scheme of Examinations.

13. Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

14. Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

Question paper pattern

Duration: 3 Hours

Maxi. Marks:75

Section A

Answer the following Questions

(1X15=15)

- 1.
- 2.
- 3.
- 4.
- 5.
- 6.
- 7.
- 8.
- 9.
- 10.
- 11.
- 12.
- 13.
- 14.
- 15.

Section B

Answer any THREE of the Questions

(10 X3=30)

- 16.
- 17.
- 18.
- 19.
- 20.

Section C

Answer any TWO Questions

(15 X2=30)

- 21.
- 22.
- 23.
- 24.

15. Minimum for a Pass

No candidate shall be declared to have passed the Semester Examination (except in Co-curricular and extracurricular activities) unless he/she obtains not less than 40% marks in the aggregate of written examination and internal assessment put together in each of the subjects. There is no minimum mark in Internal Assessment, but Candidate should get minimum 40% in external examination.

If a candidate fails in any subjects, he/she shall appear for that subject only at any subsequent regular examination, within the maximum 6 years from date of registration prescribed for completing the programme.

16. Re-totalling

All theory examination papers will be evaluated by two examiners (one internal and one external). There will not be any revaluation of the papers. However the students can apply for re-totalling after submitting the application and necessary fees.

17. With Holding of Results

Results will be withheld when a student has not paid his/her dues or there is a case of disciplinary action pending against him/her.

18. Carry Over

A candidate who fails in a lower semester examination may go to the higher semester and take the examination.

19. Classification of Successful Candidates

Grading System For Choice Based Credit System (CBCS) - The College adopts a ten point grading system.

Conversion of credit(s) into grade(s) The following illustrations could be taken as an example for computing SGPA and CGPA from credits for Honours courses in all disciplines, degree Program courses in Science subjects and degree Program courses in Humanities, Social Sciences and Commerce subjects.

20. Grades and Grade Points

Letter Grade	Grade Point
O (Outstanding)	10
A+ (Excellent)	9
A (Very Good)	8
B+ (Good)	7
B (above average)	6
C (Average)	5
P (Pass)	4
F (Fail)	0
Ab (Absent)	0

A student obtaining Grade F shall be considered failed and will be required to reappear in the examination.

For non credit courses ‘Satisfactory’ or ‘Unsatisfactory’ shall be indicated instead of the letter grade and this will not be counted for the computation of SGPA/CGPA.

The Universities can decide on the grade or percentage of marks required to pass in a course and also the CGPA required to qualify for a degree taking into consideration the recommendations of the statutory professional councils such as AICTE, MCI, BCI, NCTE etc.

21. Illustration of Computation of SGPA and CGPA and Format for Transcripts Honours Course

Course	Credit	Grade Letter	Grade Point	Credit Point (Credit Grade)	SGPA (Credit Point/Credit)
Semester I					
C-1	06	A	8	48	
C-2	06	B+	7	42	
AECC-1	02	B	6	12	
GE-1	06	B	6	36	
Total	20			138	6.9 (138/20)
Semester II					
C-3	06	B	6	36	
C-4	06	C	5	30	
AECC -2	02	B+	7	14	
AECC- 3	02	B+	7	14	
GE-2	06	A+	9	54	
Total	22			148	6.7 (148/22)
Semester III					
C-6	06	A+	9	54	
C-6	06	0	10	60	
C-7	06	A	8	48	
SEC -1	02	A	8	16	
GE-3	06	0	10	60	
Total	26			238	9.15 (238/26)
Semester IV					
C-8	06	B	6	36	
C-9	06	A+	9	54	
C-10	06	B	6	36	

SEC -2	02	A+	9 13	18
GE-4	06	A	8	48

Total	26			192	7.38 (192/26)
Semester V					
C-11	06	B	6	36	
C-12	06	B+	7	42	
DSE-1	06	0	10	60	
DSE-2	06	A	8	48	
Total	24			186	7.75 (186/24)

Semester VI					
C-13	06	A+	9	54	
C-14	06	A	8	48	
DSE-3	06	B+	7	42	
DSE-4	06	A	8	48	
Total	24			192	8.0 (192/24)
CGPA					
Grand Total	140			1080	7.71 (1080/144)

Semester 1	Semester 2	Semester 3	Semester 4
Credit: 20; SGPA: 6.9	Credit: 22; SGPA: 6.7	Credit: 26; SGPA: 9.15	Credit: 26; SGPA: 7.38

Semester 5	Semester 6
Credit: 24; SGPA: 7.75	Credit: 24; SGPA: 8.0

Thus, CGPA = (20 x 6.9 + 20 x 6.7 + 26 x 9.15 + 26 x 7.38 + 24 x 7.75 + 24 x 8.0) / 140 = 7.71

22. Rejection of Results

A candidate may be permitted to reject the result of the whole examination of any semester. Rejection of result paper-wise/subject-wise shall not be permitted. A candidate who has rejected the result shall appear for the immediately following regular examination.

The rejection shall be exercised only once in each semester and the rejection once exercised cannot be revoked.

Application for rejection along with the payment of the prescribed fee shall be submitted together to the controller of examination of university through the College with the original statement of marks within 30 days from the date of publication of the result.

A candidate who rejects the result is eligible for only class and not for ranking.

23. Transfer of Admission

Transfer of admissions to other university is permissible only on mutual agreement with the other university. A candidate migrating from any other university may be permitted to join III/V Semester of the degree programme provided he/she has passed all the subjects of previous semesters/years as the case may be. Such candidates must satisfy all other conditions of eligibility stipulated in the regulations of Yenepoya University. Conditions for transfer of admission of students of other universities He/she shall fulfil the attendance requirements as per the Yenepoya University Regulations.

His / Her transfer of admission shall be within the intake permitted to the college.

The candidate who is migrating from other universities is eligible for overall class and not for ranking. He / She shall complete the programme as per the regulation governing the maximum duration of completing the programme.

I. Core Course- Details of Course Structure and Assessment

Year	Sem	Course Code	Course Name	Credits		Total Credits	Marks		Total Marks	
				T	P		Internal	External	Theory	Practical
One	I	BFS-101	C-1: Introduction to Forensic Science	4	2	6	25	75	100	100
		BFS-102	C-2: Crime and Society	4	2	6	25	75	100	100
	II	BFS-201	C-3: Criminal Law	4	2	6	25	75	100	100
		BFS-202	C-4: Forensic Psychology	4	2	6	25	75	100	100
		BFS-205(AECC-3)	Social responsibility and community Enhancement	2	-	2	CIA	---	100	----
Two	III	BFS-301	C-5: Forensic Dermatoglyphics	4	2	6	25	75	100	100
		BFS-302	C-6: Technological Methods in Forensic Science	4	2	6	25	75	100	100

From the above choose any one in each semester I,II, III and IV.							
Total Marks(Since only 4 courses are required)						400	400
Grand Total							800

III. ABILITY ENHANCEMENT COURSE

1. Ability Enhancement Compulsory	2. Ability Enhancement Elective (Skill Based)
One each in Semester I and II. AECC-1: Environmental Science AECC-2: English/MIL Communication AECC-3: Social Responsibility and Community Enhancement <i>The College will have an option to take either of the two papers in a particular Semester (I or II), while the students have to appear in both the papers.</i>	One each in Semester III and IV. To be chosen from the following. AECC-1: Introduction to Biometry AECC-2: Handwriting Identification and Recognition AECC-3: Forensic Science and Society

Note: All Theory Papers are of 4 Credits and all practical papers are of 2 Credits.

* SWAYAM courses may be undertaken as choice for any of the four and two credit modules.

25. SWAYAM COURSE GUIDELINES (For Students) Minimum 8 credits and a maximum of 20 credits of MOOC credits is permitted.)

Guidelines for opting MOOC subjects as elective or open elective (Any of the 4 credit or 2 credit subjects) Core 6 credit courses are not electives.

25.1. At the time of selecting any Elective or Open Elective, student can opt for a MOOC subject of same credit or one credit less.

25.2. Process for opting MOOC subject by the student:

Student identifies a MOOC subject on SWAYAM portal (<https://swayam.gov.in>).

Student informs Departmental Swayam Coordinator (DSC) about it.

DSC gives the code of the subject to the student.

Students will apply online through SMS or mobile app.

After the process the student enrolls/registers in the subject on SWAYAM portal (<https://swayam.gov.in>).

Student will inform DSC after registering and enrolling on SWAYAM portal.

25.3. After the completion of the subject, a copy of the certificate of completion with the marks obtained is to be submitted to the DSC.

25.4. Credit Conversion:

If credit for MOOC subject taken by the student matches with the credit of Departmental elective or Open elective then no conversion is needed and same breakup for CA (online assignments) and ESE (Proctored exam) will be taken.

Conversion of 3 credit MOOC subject to 4 credit subject or 2 credits MOOC subject to 3 credit subject:

End Semester Exam (ESE) 50 Marks	Continuous Assessment (CA) 50 Marks			
	Proctored Exam (as per MOOC mark sheet scaled to 50)	Online Assignments (as per MOOC mark sheet)	Presentation 1 (to be conducted by departmental committee)	Presentation 2 (to be conducted by departmental committee)
Marks distribution	50	25	10	15
Marks required to Pass	ESE(out of 50) + Online assignment (out of 25)=30 marks		P1+P2=11 marks	

CORE COURSE**FIRST YEAR****SEMESTER-I****PAPER: BFS-101****C-1: Introduction to Forensic Science****Credits: 4**

Learning Objectives: After studying this paper the students will know –

- a. *The significance of forensic science to human society.*
- b. *The fundamental principles and functions of forensic science.*
- c. *The divisions in a forensic science laboratory.*
- d. *The working of the forensic establishments in India and abroad.*

Unit 1: History of Development of Forensic Science in India

Functions of forensic science. Historical aspects of forensic science.

Definitions and concepts in forensic science. Scope of forensic science. Need of forensic science. Basic principles of forensic science.

Frye case and Daubert standard.

Unit 2: Tools and Techniques in Forensic Science

Branches of forensic science. Forensic science in international perspectives, including set up of INTERPOL and FBI.

Duties of forensic scientists. Code of conduct for forensic scientists. Qualifications of forensic scientists.

Data depiction. Report writing.

Unit 3: Organizational set up of Forensic Science Laboratories in India

Hierarchical set up of Central Forensic Science Laboratories, State Forensic Science Laboratories, Government Examiners of Questioned Documents, Fingerprint Bureaus, National Crime Records Bureau, Police & Detective Training Schools, Bureau of Police Research & Development, Directorate of Forensic Science and Mobile Crime Laboratories. Police Academies. Police dogs. Services of crime laboratories. Basic services and optional services.

Unit 4: Role of Forensic Evidence in the Legal System

Physical Evidence - definition, types, significance, collection, preservation, packing and forwarding of different evidence to the forensic laboratory.

Bloodstain Pattern Analysis - terminology, Blood physics, Spatter patterns, Motion and directionality, point of origin and point of convergence, preservation of blood evidence, procedures and precautions Presentation of Expert Evidence, Evidence in The Court of Law, Report writing & Evidence presentation, Components of reports and report format (according to ISO/IEC17025:2005).

Practicals

Credits:2

1. To study the history of crime cases from forensic science perspective.
2. To cite examples of crime cases in which apprehensions arose because of Daubert standards.
3. To review the sections of forensic science at INTERPOL and compare with those in Central Forensic Science Laboratories in India. Include suggestions for improvements if any.
4. To study the annual reports of National Crime Records Bureau and depict the data on different type of crime cases by way of smartart/templates.
5. To write report on different type of crime cases.
6. To review how the Central Fingerprint Bureau, New Delhi, coordinates the working of State Fingerprint Bureaus.
7. To examine the hierarchical set up of different forensic science establishments and suggest improvements.
8. To examine the list of projects undertaken by the Bureau of Police Research and Development and suggest the thrust areas of research in Police Science.
9. To compare and contrast the role of a Police Academy and a Police Training School.
10. To compare the code of conduct prescribed by different establishments for forensic scientists.

Suggested Readings

1. B.B. Nanda and R.K. Tiwari, *Forensic Science in India: A Vision for the Twenty First Century*, Select Publishers, New Delhi(2001).
2. M.K. Bhasin and S. Nath, *Role of Forensic Science in the New Millennium*, University of Delhi, Delhi(2002).
3. S.H. James and J.J. Nordby, *Forensic Science: An Introduction to Scientific and Investigative Techniques*, 2nd Edition, CRC Press, Boca Raton(2005).
4. W.G. Eckert and R.K. Wright in *Introduction to Forensic Sciences*, 2nd Edition, W.G. Eckert (ED.), CRC Press, Boca Raton(1997).
5. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey(2004).
6. W.J. Tilstone, M.L. Hastrup and C. Hald, *Fisher's Techniques of Crime Scene Investigation*, CRC Press, Boca Raton(2013).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15

2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10
---	---	----

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-2: Crime and Society

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The importance of criminology.*
- b. *The causes of criminal behavior.*
- c. *The significance of criminal profiling to mitigate crime.*
- d. *The consequences of crime in society.*
- e. *The elements of criminal justice system.*

Unit 1: Basics of Criminology

Definition, aims and scope. Theories of criminal behavior – classical, positivist, sociological. Criminal anthropology. Criminal profiling. Understanding modus operandi. Investigative strategy. Role of media.

Unit 2: Crime

Elements, nature, causes and consequences of crime. Deviant behavior. Hate crimes, organized crimes and public disorder, domestic violence and workplace violence. White collar crimes. Victimology. Juvenile delinquency. Social change and crime. Psychological Disorders and Criminality. Situational crime prevention.

Unit 3: Criminal Justice System

Broad components of criminal justice system. Policing styles and principles. Police's power of investigation. Filing of criminal charges. Community policing. Policing a heterogeneous society. Correctional measures and rehabilitation of offenders. Human rights and criminal justice system in India.

Unit 4: Penology and Prison Administration

Meaning, aims and philosophy of punishment; Types of punishment and objectives of punishment. Sentencing: Principles, policies and procedures. Evolution and development of prison system in India. Classification of Correctional Institution in India: Central Jails, Sub- jails and Juvenile Institutions. Probation: Concept and scope, Historical development in India, Probation procedures: Pre-sentence investigation report, supervision and revocation. Parole: Provisions, rules and supervision. Pre-release and Pre-mature release.

Practicals

Credits:2

1. To review past criminal cases and elucidate which theory best explains the criminal behavior of the accused.
2. To review crime cases where criminal profiling assisted the police to apprehend the accused.
3. To cite examples of crime cases in which the media acted as a pressure group.
4. To evaluate the post-trauma stress amongst victims of racial discrimination.
5. To correlate deviant behavior of the accused with criminality (take a specific example).
6. To evaluate victimology in a heinous crime.

7. To examine a case of juvenile delinquency and suggest remedial measures.
8. To evaluate how rising standards of living affect crime rate.
9. To review the recommendations on modernization of police stations and evaluate how far these have been carried out in different police stations.
10. To visit a 'Model Police Station' and examine the amenities vis-à-vis conventional police stations.
11. To examine steps being taken for rehabilitation of former convicts and suggest improvements.
12. To prepare a report on interrogation cells and suggest improvements.

Suggested Readings

1. S.H. James and J.J. Nordby, *Forensic Science: An Introduction to Scientific and Investigative Techniques*, 2nd Edition, CRC Press, Boca Raton(2005).
2. D.E. Zulawski and D.E. Wicklander, *Practical Aspects of Interview and Interrogation*, CRC Press, Boca Raton(2002).
3. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey(2004).
4. J.L. Jackson and E. Barkley, *Offender Profiling: Theory, Research and Practice*, Wiley, Chichester(1997).
5. R. Gupta, *Sexual Harassment at Workplace*, LexisNexis, Gurgaon(2014).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Credits: 2

Objectives: :the main objective is to Understand key concepts from economic, political, and social analysis as they pertain to the design and evaluation of environmental policies and institutions.

Learning outcome:

The Environmental Studies major prepares students for careers as leaders in understanding and addressing complex environmental issues from a problem- oriented, interdisciplinary perspective

Course content:

Unit 1 : Introduction to environmental studies

- Multidisciplinary nature of environmental studies;
- Scope and importance; Concept of sustainability and sustainable development.

Unit 2 : Ecosystems

- What is an ecosystem? Structure and function of ecosystem; Energy flow in an ecosystem: food chains, food webs and ecological succession. Case studies of the following ecosystems :
 - a) Forest ecosystem
 - b) Grassland ecosystem
 - c) Desert ecosystem
 - d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

Unit 3 : Natural Resources : Renewable and Non---renewable Resources

1. Land resources and landuse change; Land degradation, soil erosion and desertification.
2. Deforestation: Causes and impacts due to mining, dam building on environment, forests, biodiversity and tribal populations.
3. Water : Use and over---exploitation of surface and ground water, floods, droughts, conflicts over water (international & inter---state).
4. Energy resources : Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

Unit 4 : Biodiversity and Conservation

- Levels of biological diversity : genetic, species and ecosystem diversity; Biogeographic zones of India; Biodiversity patterns and global biodiversity hot spots
- India as a mega-•-biodiversity nation; Endangered and endemic species of India
- Threats to biodiversity : Habitat loss, poaching of wildlife, man---wildlife conflicts, biological invasions; Conservation of biodiversity : In---situ and Ex---situ conservation of biodiversity.
- Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.

Unit 5 : Environmental Pollution

- Environmental pollution : types, causes, effects and controls; Air, water, soil and noise pollution
- Nuclear hazards and human health risks
- Solid waste management : Control measures of urban and industrial waste.
- Pollution case studies.

Unit 6 : Environmental Policies & Practices

- Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture
- Environment Laws: Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution) Act; Wildlife Protection Act; Forest Conservation Act. International agreements: Montreal and Kyoto protocols and Convention on Biological Diversity (CBD).
- Nature reserves, tribal populations and rights, and human wildlife conflicts in Indian context.

Unit 7 : Human Communities and the Environment

- Human population growth: Impacts on environment, human health and welfare.
- Resettlement and rehabilitation of project affected persons; case studies.
- Disaster management : floods, earthquake, cyclones and landslides.
- Environmental movements : Chipko, Silent valley, Bishnois of Rajasthan.
- Environmental ethics: Role of Indian and other religions and cultures in environmental conservation.
- Environmental communication and public awareness, case studies (e.g., CNG vehicles in Delhi).

Unit 8 : Field work

- Visit to an area to document environmental assets: river/ forest/ flora/fauna, etc.
- Visit to a local polluted site---Urban/Rural/Industrial/Agricultural.
- Study of common plants, insects, birds and basic principles of identification.
- Study of simple ecosystems---pond, river, Delhi Ridge, etc.

Suggested Readings:

- Carson, R. 2002. *Silent Spring*. Houghton Mifflin Harcourt.
- Gadgil, M., & Guha, R.1993. *This Fissured Land: An Ecological History of India*. Univ. of California Press.

GE-1:Physics**Credits: 4**

Learning Objectives: After studying this paper the students will know –

- a. *Properties of waves including electromagnetic waves and sound waves.*
- b. *Properties of Light*
- c. *Uncertainty Principle*
- d. *Bohr atom and Quantum Mechanical model of atom*
- e. *Elasticity and Thermal conductivity*

*Only the theoretical concepts will be covered.

Unit-1:

- Wave Motion, General Equation of Wave Motion and Plane Progressive Harmonic Wave,
- Energy Density for a Plane Progressive Wave, Intensity of a Wave.
- Transverse Waves in Stretched Strings, Modes of Transverse Vibrations of Strings and Longitudinal Waves in Rods and Gases,
- Fourier's Theorem, Wave Velocity and Group Velocity

Unit-2:

- Intensity of Sound- Decibel and Bell, Loudness of Sound, Noise Pollution.
- Ultrasonics: Production of Ultrasonic Waves – Piezo- Electric Crystal Method.
- Determination of Velocity of Ultrasonic Waves in a Liquid - Acoustic Grating and Application of Ultrasonic Waves.
- Reverberation, Sabine's Formula (Derivation not required) and Absorption Coefficient.
- Acoustics of Buildings

Unit-3:

- Waves in one dimension, The wave equation and sinusoidal waves
- Boundary conditions :reflection and transmission and Polarization
- Electromagnetic waves in vacuum, Wave equation for E and B, monochromatic plane waves in vacuum, energy and momentum of Electromagnetic waves.
- Poynting vector - Electromagnetic waves in matter, Propagation through linear media, reflection and transmission at normal incidence.

Unit-4:

- Electromagnetic waves, black body radiation, ultraviolet catastrophe.
- Photoelectric effect, nature of light, wave particle duality, Compton Effect.
- De Broglie waves, waves of probability, phase velocity & group velocity and particle diffraction.
- Uncertainty principle I, Uncertainty principle II, Application of the uncertainty principle, Energy and time uncertainty.
- The Bohr atom-energy levels and spectra, correspondence principle, nuclear motion and atomic excitation.
- Quantum mechanical model of atom.

Unit-5:

- Elasticity: Hooke's law - Relationship between three moduli of elasticity (qualitative) and stress-strain diagram.
- Poisson's ratio –Factors affecting elasticity, Bending moment and depression of a cantilever.
- Young's modulus by uniform bending.
- Modes of heat transfer- thermal conductivity, Newton's law of cooling and Linear heat flow, Lee's disc method, Radial heat flow and Rubber tube method.
- Conduction through compound media

Practicals

Credits: 2

1. Measurement of diameter using Vernier Caliper
2. Determination of Spring Constant
3. Measurement of diameter/thickness using Screw Gauge
4. Refractive Index of a prism
5. Dispersion by a prism.
6. Spring mass oscillator
7. Coefficient of damping, relaxation time, quality factor of a damped SHM using simple pendulum
8. Viscosity of liquid by damping torsional oscillation method.
9. Surface tension and interfacial tension by drop-weight method
10. Damping of liquid by torsional oscillation method.
11. Capacitance of a capacitor using ballistic galvanometer
12. Black box experiment.

Suggested readings:

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

SEMESTER-II

PAPER: BFS-201

C-3: CriminalLaw

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *Elements of Criminal Procedure Code related to forensic science.*
- b. *Acts and provisions of the Constitution of India related to forensic science.*
- c. *Acts governing socio-economic crimes.*
- d. *Acts governing environmental crimes.*

Unit 1: Law to Combat Crime

Classification – civil, criminal cases. Essential elements of criminal law. Constitution and hierarchy of criminal courts.

Criminal Procedure Code. Cognizable and non-cognizable offences.

Bailable and non-bailable offences.

Sentences which the court of Chief Judicial Magistrate may pass.

Summary trials – Section 260(2).

Judgements in abridged forms – Section 355.

Indian Penal Code pertaining to offences against persons – Sections 121A, 299, 300, 302, 304A, 304B, 307, 309, 319, 320, 324, 326, 351, 354, 359, 362.

Sections 375 & 377 and their amendments.

Indian Penal Code pertaining to offences against property Sections – 378, 383, 390, 391, 405, 415, 420, 441, 463, 489A, 497, 499, 503, 511.

Indian Evidence Act – Evidence and rules of relevancy in brief. Expert witness. Cross examination and re-examination of witnesses.

Sections 32, 45, 46, 47, 57, 58, 60, 73, 135, 136, 137, 138, 141.

Section 293 in the code of criminal procedure.

Unit 2: Constitution of India

Preamble, Fundamental Rights, Directive Principles of State Policy. – Articles 14, 15, 20, 21, 22, 51A.

Unit 3: Acts Pertaining to Socio-economic and Environmental Crimes

Narcotic, Drugs and Psychotropic Substances Act. Essential Commodity Act.

Drugs and Cosmetics Act. Explosive Substances Act. Arms Act.

Dowry Prohibition Act.

Prevention of Food Adulteration Act. Prevention of Corruption Act.

Wildlife Protection Act. I.T. Act. Environment Protection Act. Untouchability Offences Act

Practicals

Credits:2

1. To prepare a schedule of five cognizable and five non-cognizable offences.
2. To study the powers and limitations of the Court of Judicial Magistrate of First Class.
3. To prepare a schedule of the offences which may be tried under Section 260(2) of Criminal Procedure Code.
4. To study a crime case in which an accused was punished on charge of murder under Section 302.
5. To study a crime case in which an accused was punished on charge of rape under Section 375.

6. To cite example of a case in which the opinion of an expert was called for under Section 45 of the Indian Evidence Act.
7. To cite a case wherein a person was detained under Article 22(5) of the Indian Constitution. Express your views whether the rights of the person as enlisted in this Article were taken care of.
8. To cite a case under Article 14 of the Constitution of India wherein the Right to Equality before Law was allegedly violated.
9. To list the restrictions imposed on Right to Freedom of Worship under the Constitution of India.
10. To prepare a schedule of persons convicted under Narcotics, Drugs and Psychotropic Act statistically analyze the age group to which they belonged.
11. To study a case in which Drugs and Cosmetic Act was invoked.
12. To study a case in which Explosive Substances Act was invoked.
13. To study a case in which Arms Act was invoked.
14. In light of Section 304B of the Indian Penal Code, cite a case involving dowry death.
15. To study a case wherein the Untouchability Offences Act was invoked on the basis of Article 15 of the Constitution of India.

Suggested Readings

1. D.A. Bronstein, *Law for the Expert Witness*, CRC Press, Boca Raton(1999).
2. Vipa P. Sarthi, *Law of Evidence*, 6th Edition, Eastern Book Co., Lucknow(2006).

Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks

Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-4: Forensic Psychology

Credits: 4

Learning Objectives: After studying this paper the students will know–

- a. *The overview of forensic psychology and its applications.*
- b. *The legal aspects of forensic psychology.*
- c. *The significance of criminal profiling.*
- d. *The importance of psychological assessment in gauging criminal behavior.*
- e. *The tools and techniques required for detection of deception.*
- f. *The critical assessment of advanced forensic techniques like polygraphy, narco analysis and brain electrical oscillation signatures.*

Unit 1: Basics of Forensic Psychology

Definition and fundamental concepts of forensic psychology and forensic psychiatry. Psychology and law. Ethical issues in forensic psychology. Assessment of mental competency. Mental disorders and forensic psychology. Psychology of evidence – eyewitness testimony, confession evidence. Criminal profiling. Psychology in the courtroom, with special reference to Section 84 IPC.

Unit 2: Psychology and Criminal Behavior

Psychopathology and personality disorder. Psychological assessment and its importance. Serial murderers. Psychology of terrorism. Biological factors and crime – social learning theories, psycho-social factors, abuse. Juvenile delinquency – theories of offending (social cognition, moral reasoning), Child abuse (physical, sexual, emotional), juvenile sex offenders, legal controversies.

Unit 3: Detection of Deception

Tools for detection of deception – interviews, non-verbal detection, statement analysis, voice stress analyzer, hypnosis. Polygraphy – operational and question formulation techniques, ethical and legal aspects, the guilty knowledge test. Narco analysis and brain electrical oscillation signatures – principle and theory, ethical and legal issues.

Practicals

Credits:2

1. To cite a crime case where legal procedures pertaining to psychic behavior had to be invoked.
2. To prepare a report on relationship between mental disorders and forensic psychology.
3. To review a crime case involving serial murders. Comment on the psychological traits of the accused.
4. To cite a crime case involving a juvenile and argue for and against lowering the age for categorizing an individual as juvenile.
5. To study a criminal case in which hypnosis was used as a means to detect deception.
6. To prepare a case report on thematic appreciation test.
7. To prepare a case report on Minnesota multiphasic personality inventory test.
8. To prepare a case report on thematic appreciation test.
9. To prepare a case report on word association test.
10. To prepare a case report on Bhatia's battery of performance test of intelligence.
11. To cite a criminal case in which narco analysis was used as a means to detect deception.

AECC-2: English/MIL Communication

BFS-203A: English

Credits 2

Objectives:

The purpose of this course is to introduce students to the theory, fundamentals and tools of communication and to develop in them vital communication skills which should be integral to personal, social and professional interactions. One of the critical links among human beings and an important thread that binds society together is the ability to share thoughts, emotions and ideas through various means of communication: both verbal and non-verbal. In the context of rapid globalization and increasing recognition of social and cultural pluralities, the significance of clear and effective communication has substantially enhanced.

The present course hopes to address some of these aspects through an interactive mode of teaching-learning process and by focusing on various dimensions of communication skills. Some of these are:

Language of communication, various speaking skills such as personal communication, social interactions and communication in professional situations such as interviews, group discussions and office environments, important reading skills as well as writing skills such as report writing, note-taking etc.

While, to an extent, the art of communication is natural to all living beings, in today's world of complexities, it has also acquired some elements of science. It is hoped that after studying this course, students will find a difference in their personal and professional interactions.

The recommended readings given at the end are only suggestive; the students and teachers have the freedom to consult other materials on various units/topics given below. Similarly, the questions in the examination will be aimed towards assessing the skills learnt by the students rather than the textual content of the recommended books.

Learning outcome:

1. Students will deploy ideas from works of criticism and theory in their own reading and writing.
2. Students will identify topics and formulate questions, identify appropriate methods and sources for research, and engage ethically with sources.

3. Students will participate in critical conversations and prepare, organize, and deliver their work to the public.

Course content:

1. **Introduction:** Theory of Communication, Types and modes of Communication

2. **Language of Communication:** Verbal and Non-verbal

(Spoken and Written)

Personal, Social and Business

Barriers and Strategies

Intra-personal, Inter-personal and Group communication

3. **Speaking Skills:**

Monologue

Dialogue

Group Discussion

Effective Communication/ Mis- Communication

Interview

Public Speech

4. **Reading and Understanding** Close Reading Comprehension

Summary Paraphrasing Analysis and Interpretation

Translation (from Indian language to English and vice-versa) Literary/Knowledge Texts

5. **Writing Skills** Documenting Report Writing Making notes Letter writing

suggested Readings:

- *Fluency in English - Part II*, Oxford University Press, 2006.
- *Business English*, Pearson, 2008.
- *Language, Literature and Creativity*, Orient Blackswan, 2013.
- *Language through Literature* (forthcoming) ed. Dr. Gauri Mishra, DrRanjana Kaul, Dr Brati Biswas

Teaching Learning Methodology

BFS-203C: KANNADA

Credits 2

Objectives:

To orient the learners with the literary movements, genres and the evolution and development of literary forms in Kannada literature to inculcate the ethical values of life through literature.

Learning outcome: Students, at the end of the course, would be able to unlock the communicator in them by using regional language Kannada appropriately and with confidence for further studies or in professional spheres where these languages are the indispensable tool of communication.

- Unit – 1 - Kannada letters
Kannada Alphabet, Swaragalu, Vyanjanasalu
- Unit – 2 - Technical Terms
Business related words
- Unit – 3 - Business letters
Types of formal letters, job application
- Unit – 4 - Administrative Kannada
Memos, Report writing
- Unit – 5 - Communicative Kannada
Basic Managerial speaking skills, Listening skills

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

Learning Objectives: After studying this paper the students will know –

- a. *The basic concepts of organic chemistry*
- b. *Stereochemistry*
- c. *Concepts relating to inorganic chemistry*
- d. *Concepts relating to solutions and solvents*

Unit 1:

- Basic concepts in organic chemistry, Bond cleavage – homolytic and heterolytic.
- Types of reagents – electrophilic and nucleophilic reagents. Reactive intermediates - generation and relative stabilities of carbocation, carbanion, carbon free radicals and carbenes – explanation for stability and reactivity based on inductive, resonance and hyperconjugation effects.
- Types of reactions - addition, substitution and elimination.
- Concept of isomerism - structural isomerism, stereo isomerism - geometrical and optical isomerism.
- Aliphatic Hydrocarbons: Alkanes, cyclo -alkanes, alkenes and alkynes.
- Aromatic compounds: Stability and general features.

Unit 2:

- Stereochemistry: Elements of symmetry in chiral and achiral molecules, chirality, stereogenic center. Fischer projection formulae.
- Enantiomers: Optical activity; use of +/-, d/l and D/L notations. Properties of enantiomers, chiral and achiral molecules with two stereogenic centers. Meso compounds. Cahn-Ingold-Prelog sequence rules: R, S system of nomenclature.
- Diastereomers: Threo and Erythro isomers. Racemisation and resolution. Relative and absolute configuration.
- Geometric isomerism: Determination of configuration of geometric isomers. Cis & trans, E, Z system of nomenclature.

Unit 3:

- Carbohydrates: Introduction and classification. Monosaccharides: Aldoses, structures of all the D-aldoheptoses. Elucidation of open chain structure of D-glucose. Mechanism of mutarotation and anomeric effect. Elucidation of ring structure of D-glucose in detail. Ketoses: Fructose, interconversion of glucose and fructose.
- Disaccharides: Glycosidic bond. Structures of maltose, lactose and sucrose-Haworth and conformational structures.
- Terpenes and terpenoids: Occurrence, classification and isoprene rule. Elucidation of structure and synthesis of citral and zingiberene. Structures of limonene, menthol, α -terpineol, camphor, β - carotene, Vitamins-A and their uses.
- Alkaloids: Introduction, classification and general characteristics. Structural elucidation and synthesis of nicotine. Structures and uses of ephedrine, caffeine, cocaine, atropine, quinine and morphine.

Unit 4:

- Organo-metallic compounds: Definition and Classification with appropriate examples based on nature of metalcarbon bond (ionic, s, p and multicentre bonds). Structures of methyl lithium, Zeiss salt and ferrocene. EAN rule as applied to carbonyls. Preparation, structure, bonding and properties of mononuclear and polynuclear carbonyls of 3d metals. p - acceptorbehaviour of carbon monoxide. Synergic effects (VB approach)- (MO diagram of CO can be referred to for synergic effect to IR frequencies).
- A brief introduction to bio-inorganic chemistry. Role of metal ions present in biological systems with special reference to Na⁺, K⁺ and Mg²⁺ ions: Na/K pump; Role of Mg²⁺ ions in energy production and chlorophyll. Role of Ca²⁺ in blood clotting, stabilization of protein structures and structural role (bones).

Unit 5:

- Errors: Classification, minimization of determinate errors, accuracy and precision. Significant figures and their computations. Equivalent weights of acids, bases, salts, oxidising and reducing agents. Methods of expressing concentration of solutions in terms of Normality and Molarity. Numerical problems.
- Solvent extraction: Distribution law, Determination of distribution ratio Batch extraction, continuous extraction, discontinuous extraction, counter current extraction.

Practicals:

Credits: 2

1. Preparation of standard solution of potassium dichromate and estimation of Ferrous ammonium sulphate using diphenylamine indicator (internal indicator method)
2. Preparation of standard solution of potassium dichromate and estimation of Ferrous ammonium sulphate using potassium ferricyanide indicator (External indicator method)
3. Preparation of standard solution of sodium oxalate and estimation of potassium permanganate solution.
4. Preparation of standard solution of potassium dichromate and estimation of sodium thiosulphate solution using starch indicator.
5. Preparation of standard solution of Ferrous ammonium sulphate solution and estimation of potassium permanganate solution.
6. Estimation of chloride in a given solution using a standard silver nitrate solution and potassium chromate indicator.
7. Determination of available chlorine present in a given sample of bleaching powder
8. Determination of partition co-efficient of Iodine between water and Carbon tetra chloride.
9. Determination of CST of phenol-water system.
10. Estimation of carbonate and bicarbonate in a given mixture by Warder's method.
11. Estimation of Ferrous and Ferric ions using standard potassium dichromate solution.

Suggested Readings:

1. Organic Chemistry by Morrison and Boyd. 6thEdn. Prentice Hall publication.
2. Advanced Organic Chemistry by Solomon. 8thEdn. Wiley India Pvt. Ltd.
3. Nanotechnology basic science and emerging technology by Mick Wilson, KamaliKannangara, Geoff smith (2002) CRC Press.
4. Nanotechnology-fun and easy way to explore the science of matter, smallest particles by Richard Booker, Earl Boysen. (2005) Wiley Dreamtech.
5. Basic Solid state chemistry by AR West. 2ndEdn. Wiley Publishers.
6. Forensic Science in Criminal Investigations & Trials by Dr. B. R. Sharma, Universal Law Publishing Co. Pvt. Ltd., Delhi (4th Edition 2005).

7. An introduction to Forensic Science by Saferstein, R. 1976
8. Forensic Issues in Alcohol Testing by Steven B. Karch, Edition: Illustrated. Published by CRC Press (2007)
9. Clark, E.G. C. : Isolation and identification Drugs, Vol. I and Vol. II (1986).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

BCF105-Social Responsibility and Community Engagement

(Total Hours:30)

This paper will help the students

- To develop an appreciation of rural culture, life-style and wisdom amongst students
- To learn about the status of various agricultural and rural development programmes
- To understand causes for rural distress and poverty and explore solutions for the same
- To apply classroom knowledge of courses to field realities and thereby improve quality of learning

Learning Outcomes:

After completing this course, student will be able to

- Gain an understanding of rural life, culture and social realities
- Develop a sense of empathy and bonds of mutuality with local community
- Appreciate significant contributions of local communities to Indian society and economy
- Learn to value the local knowledge and wisdom of the community
- Identify opportunities for contributing to community's socio-economic Improvements

Course Content:

Unit 1: Appreciation of Rural Society (08 hours)

Rural lifestyle, rural society, caste and gender relations, rural values with respect to community, nature and resources, elaboration of "soul of India lies in villages" (Gandhi), rural infrastructure.

Assignment: Prepare a map (physical, visual or digital) of the village you visited and write an essay about inter-family relations in that village.

Teaching/ Learning Methodology

1. Interactive Lectures (03 hours)
2. Self directed learning (03 hours)
3. Field activities (02 hours)

Unit 2: Understanding rural economy & livelihood (08 hours)

Agriculture, farming, landownership, water management, animal husbandry, non-farm livelihoods and artisans, rural entrepreneurs, rural markets.

Assignment: Describe your analysis of rural household economy, its challenges and possible pathways to address them.

Teaching/ Learning Methodology

1. Interactive Lectures (02 hours)
2. Self-directed learning (02 hours)
3. Field activities (04 hours)

Unit 3: Rural Institutions**(07 hours)**

Traditional rural organizations, Self-help Groups, Panchayati raj institutions (Gram Sabha, Gram Panchayat, Standing Committees), local civil society, local administration

Assignment: How effectively are Panchayat raj institutions functioning in the village? What would you suggest to improve their effectiveness? Present a case study (written or audio-visual)

Teaching/ Learning Methodology

1. Interactive Lectures (02 hours)
2. Field activities (05 hours)

Unit 4: Rural Development Programmes**(07 hours)**

History of rural development in India, current national programmes: Sarva Shiksha Abhiyan, Beti Bachao, Beti Padhao, Ayushman Bharat, Swachh Bharat, PM Awaas Yojana, Skill India, Gram Panchayat Decentralized Planning, NRLM, MNREGA, etc.

Assignment: Describe the benefits received and challenges faced in the delivery of one of these programmes in the rural community; give suggestions about improving implementation of the programme for the rural poor.

Teaching/ Learning Methodology

1. Interactive Lectures (01 hour)
2. Field activities (04 hours)
3. Assignment (02 hours)

Assessment: - Feedback, MCQs, Submission & presentation of project work/Survey findings

Continuous Internal Assessment (CIA)

Internal Assessment is continuous and details are notified well in advance. CIA consists of the following

SN	Assessment for 100 marks	Marks
1	Objective type questions	20
2	Presentation / Survey Findings	50
3	Assignment/Seminars/Viva-voce/ Class Interaction/Attitude	20
4	Log Book	10

Recommended field-based practical activities:

- Interaction with SHG women members and study of their functions and challenges; planning for their skill building and livelihood activities
- Visit MGNREGS project sites interact with beneficiaries and interview functionaries at the work site
- Field visit to Swachh Bharat project sites conduct analysis and initiate problem solving measures
- Conduct Mission Antyodaya surveys to support under Gram Panchayat Development Plan(GPDP)
- Interactive community exercise with local leaders, panchayat functionaries, grass-root officials and local institutions regarding village development plan preparation and resource embolization
- Visit Rural Schools/mid-day meal centres study Academic and infrastructural

resources and gaps

- Participation Gram Sabha meetings and study community participation
- Associate with Social audit exercise at the Gram Panchayat level, and interact with programme beneficiaries
- Attend Parent Teacher Association meetings and interview school drop outs
- Visit local Anganwadi Centre and observe the services being provided
- Visit local NGOs civil society organizations and interact with their staff and beneficiaries,
- Organize awareness programmes health camps Disability camps and cleanliness camps
- Conducts oil health test drinking water analysis energy use and fuel efficiency surveys
- Raise understanding of people's impacts of climate change building up community's Disaster preparedness
- Organize orientation programmes for farmers regarding organic cultivation rational use of irrigation and fertilizers and promotion of traditional species of crops and plants
- Formation of committees for common property resource management village pond Maintenance and fishing

Credit: 2 credit, 30 hours, at least 50% in field, compulsory for all students

Contents: Divided into four Modules, field immersion is part of each Unit

Course Structure: 2Credits Course (1Credit for Class room and Tutorials and 1Credit for Field Engagement)

Suggested Readings Books:

1. Singh,Katar, Rural Development:Principles, Policies and Management, Sage Publications, New Delhi, 2015.
2. A Hand book on Village Panchayat Administration Rajiv Gandhi Chair for Panchayat Raj Studies,2002.
3. United Nations, Sustainable Development Goals, 2015un.org/sdgs/
4. M.P. Boraian,Best Practices in Rural Development,ShanlaxPublishers,2016.

Journals:

1. Journals of Rural development, (published by NIRD &PR Hyderabad)
2. Indian Journal of Social Work, (by TISS,Bombay)
3. Indian Journal of Extension Education(byIndianSocietyofExtensionEducation)
4. Journal of Extension Education (by Extension EducationSociety)
5. Kurukshetra (Ministry of Rural Development,GoI)
6. Yojana (Ministry of Information and Broadcasting,GoI)

SECOND YEAR

SEMESTER-III

PAPER: BFS-301

C-5: ForensicDermatoglyphics

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The fundamental principles on which the science of fingerprinting is based.*
- b. *Fingerprints are the most infallible means of identification.*
- c. *The world's first fingerprint bureau was established in India.*
- d. *The method of classifying criminal record by fingerprints was worked out in India, and by Indians.*
- e. *The physical and chemical techniques of developing fingerprints on crime scene evidence.*
- f. *The significance of foot, palm, ear and lip prints.*

Unit 1: Basics of Fingerprinting

Introduction and history, with special reference to India.

Biological basis of fingerprints. Formation of ridges. Fundamental principles of fingerprinting. Types of fingerprints. Fingerprint patterns. Fingerprint characters/minutiae. Plain and rolled fingerprints.

Classification and cataloguing of fingerprint record. Automated Fingerprint Identification System.

Significance of poroscopy and edgeoscopy.

Unit 2: Development of Fingerprints

Latent prints. Constituents of sweat residue.

Latent fingerprints' detection by physical and chemical techniques.

Mechanism of detection of fingerprints by different developing reagents.

Application of light sources in fingerprint detection.

Preservation of developed fingerprints.

Digital imaging for fingerprint enhancement.

Fingerprinting the deceased. Developing fingerprints on gloves.

Unit 3: Other Impressions

Importance of footprints. Casting of foot prints, Electrostatic lifting of latent foot prints. Palm prints.

Lip prints - Nature, location, collection and examination of lip prints. Ear prints and their significance.

Palm prints and their historical importance.

Practicals

Credits:2

1. To record plain and rolled fingerprints.
2. To carry out ten digit classification of fingerprints.
3. To identify different fingerprint patterns.
4. To identify core and delta.
5. To carry out ridge tracing and ridge counting.
6. To investigate physical methods of fingerprint detection.
7. To investigate chemical methods of fingerprint detection.
8. To use different light sources for enhancing developed fingerprints.
9. To prepare cast of footprints.

Suggested Readings

1. J.E. Cowger, *Friction Ridge Skin*, CRC Press, Boca Raton (1983).
2. D.A. Ashbaugh, *Quantitative-Qualitative Friction Ridge Analysis*, CRC Press, Boca Raton (2000).
3. C. Champod, C. Lennard, P. Margot and M. Stoilovic, *Fingerprints and other Ridge Skin Impressions*, CRC Press, Boca Raton (2004).
4. Lee and Gaenslen's, *Advances in Fingerprint Technology*, 3rd Edition, R.S. Ramotowski (Ed.), CRC Press, Boca Raton (2013).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
-----------	---------------------------	----------------------------	----------

Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-6: Technological Methods in Forensic Science

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The importance of chromatographic and spectroscopic techniques in processing crime scene evidence.*
- b. *The utility of colorimetry, electrophoresis and neutron activation analysis in identifying chemical and biological materials.*
- c. *The significance of microscopy in visualizing trace evidence and comparing it with control samples.*
- d. *The usefulness of photography and videography for recording the crime scenes.*

Unit 1: Instrumentation

Sample preparation for chromatographic and spectroscopic evidence.

Chromatographic methods. Fundamental principles and forensic applications of thin layer chromatography, gas chromatography and liquid chromatography.

Spectroscopic methods. Fundamental principles and forensic applications of Ultraviolet-visible spectroscopy, infrared spectroscopy, atomic absorption spectroscopy, atomic emission spectroscopy and mass spectroscopy. X-ray spectrometry. Colorimetric analysis and Lambert-Beer law.

Electrophoresis – fundamental principles and forensic applications.

Neutron activation analysis – fundamental principles and forensic applications.

Unit 2: Microscopy

Fundamental principles. Different types of microscopes. Electron microscope. Comparison Microscope. Forensic applications of microscopy.

Unit 3: Forensic photography

Basic principles and applications of photography in forensic science.

3D photography. Photographic evidence. Infrared and ultraviolet photography. Digital photography. Videography. Crime scene and laboratory photography.

Practicals

Credits:2

1. To determine the concentration of a colored compound by colorimetry analysis.
2. To carry out thin layer chromatography of ink samples.
3. To carry out separation of organic compounds by paper chromatography.
4. To identify drug samples using UV-Visible spectroscopy.
5. To take photographs using different filters.
6. To take photographs of crime scene exhibits at different angles.
7. To record videography of a crime scene.

Suggested Readings

1. D.A. Skoog, D.M. West and F.J. Holler, *Fundamentals of Analytical Chemistry*, 6th Edition, Saunders College Publishing, Fort Worth (1992).
2. W. Kemp, *Organic Spectroscopy*, 3rd Edition, Macmillan, Hampshire (1991).
3. J.W. Robinson, *Undergraduate Instrumental Analysis*, 5th Edition, Marcel Dekker, Inc., New York (1995).
4. D.R. Redsicker, *The Practical Methodology of Forensic Photography*, 2nd Edition, CRC Press, Boca Raton (2000).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-7: Criminalistics

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *The methods of securing, searching and documenting crimescenes.*
- b. *The art of collecting, packaging and preserving different types of physical and trace evidence at crimescenes.*
- c. *The legal importance of chain of custody.*
- d. *The tools and techniques for analysis of different types of crime scene evidence.*

Unit 1: Crime Scene Management

Types of crime scenes – indoor and outdoor. Securing and isolating the crime scene. Crime scene search methods. Safety measures at crime scenes. Legal considerations at crime scenes.

Documentation of crime scenes – photography, videography, sketching and recording notes. Duties of first responders at crime scenes. Coordination between police personnel and forensic scientists at crime scenes. The evaluation of 5Ws (who?, what?, when?, where?, why?) and 1H (how?). Crime scenelogs.

Unit 2: Crime Scene Evidence

Classification of crime scene evidence – physical and trace evidence. Locard principle. Collection, labeling, sealing of evidence. Hazardous evidence. Preservation of evidence. Chain of custody. Reconstruction of crime scene.

Unit 3: Forensic Physics

Glass evidence – collection, packaging, analysis. Matching of glass samples by mechanical fit and refractive index measurements. Analysis by spectroscopic methods. Fracture analysis and direction of impact.

Paint evidence – collection, packaging and preservation. Analysis by destructive and non-destructive methods. Importance of paint evidence in hit and run cases.

Fibre evidence – artificial and man-made fibres. Collection of fibre evidence. Identification and comparison of fibres.

Soil evidence – importance, location, collection and comparison of soil samples.

Cloth evidence – importance, collection, analysis of adhering material. Matching of pieces.

Toolmark evidence. Classification of toolmarks. Forensic importance of toolmarks.

Collection, preservation and matching of toolmarks. Restoration of erased serial numbers and engraved marks. Forensic gemmology.

Practicals

Credits:2

1. To prepare a report on evaluation of crime scene.
2. To reconstruct a crime scene (outdoor and indoor).
3. To compare soil samples by density gradient method.
4. To compare paint samples by physical matching method.
5. To compare paint samples by thin layer chromatography method.
6. To compare glass samples by refractive index method.
7. To identify and compare toolmarks.
8. To compare cloth samples by physical matching.

Suggested Readings

1. M. Byrd, *Crime Scene Evidence: A Guide to the Recovery and Collection of Physical Evidence*, CRC Press, Boca Raton(2001).
2. T.J. Gardener and T.M. Anderson, *Criminal Evidence*, 4th Ed., Wadsworth, Belmont (2001).
3. S.H. James and J.J. Nordby, *Forensic Science: An Introduction to Scientific and Investigative Techniques*, 2nd Edition, CRC Press, Boca Raton(2005).
4. W.J. Tilstone, M.L. Hastrup and C. Hald, Fisher's, *Techniques of Crime Scene Investigation*, CRC Press, Boca Raton(2013).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

	Total		75 Marks

Learning Objectives: After studying this paper the students will know –

- a. *The basis of biometry.*
- b. *The classification of biometric processes.*
- c. *The importance of behavioral biometry.*

Unit 1: Fundamental Aspects

Definition, characteristics and operation of biometric system. Classification of biometric systems – physiological and behavioral. Strength and weakness of physiological and behavioral biometrics. Multimodal biometrics. Key biometric processes – enrollment, identification and verification. Positive and negative identification. Performance measures used in biometric systems – FAR, FRR, GAR, FTA, FTE and ATV. Biometric versus traditional technologies.

Unit 2: Physiological Biometrics

Fingerprints, palm prints, iris, retina, geometry of hand and face.

Unit 3: Behavioral Biometrics

Handwriting, signatures, keystrokes, gait and voice.

Suggested Readings

1. S. Nanavati, M. Thieme and R. Nanavati, *Biometrics*, Wiley India Pvt. Ltd.(2002).
2. P. Reid, *Biometrics for Network Security*, New Delhi(2004).
3. J.R. Vacca, *Biometric Technologies and Verification Systems*, Butterworth-Heinemann, Oxford(2007).

GE-3: Computer Science

Credits: 4

Learning Objectives: After studying this paper the students will –

- a. Identify various devices and their working principles.*
- b. Define various computer applications.*
- c. Able to use the MS office applications.*
- d. Able to understand and solve the problems using python environment.*

Unit 1

Computer Basics: Introduction, Characteristics computers, Evolution computers, Generation of computers, Classification of computers, the computer system, Application of computers.

Computer Architecture: Introduction, Central processing Unit- ALU, Registers, Control Unit, system bus, main memory Unit, cache memory, communication between various Units of a computer system. Components inside a computer system– System case, Power supply, Mother board, BIOS, Ports and Interfaces, Expansion card, Ribbon cable, Memory chips, Processors.

Unit 2

Computer memory and storage: Introduction, memory representation, memory hierarchy, Random access memory, Types of RAM, Read-only memory, Types of ROM, RAM, ROM and CPU interaction. Secondary Storage: Types of secondary storage device - Magnetic tape, magnetic disk, Floppy disk, Hard disk, Advantages and disadvantages of magnetic disk, Optical disk, Types- CD, DVD, Blu ray disk, Advantages and disadvantages of optical disk, Magneto-optical disk, Memory stick, Universal serial bus, Mass storage devices. Input devices: Introduction, Types of input devices, Keyboard, Mouse, Introduction to Track ball, Joystick light pen, Touch screen and track pad. Speech recognition, digital camera, webcam, flatbed scanner, Optical character recognition, Optical Mark Recognition, Magnetic ink character recognition, Bar code reader.

Output devices: Types of output, Classification of output devices, Printers- Dotmatrix, drum printer, Ink jet, Laser, Hydra, Plotter, Monitor- CRT, displaying graphics on CRT, Colour display on CRT, LCD, Differences between LCD and CRT, Other types of monitors, Voice response, Projector, Electronic white board.

Unit 3

Introduction to Computer software: Introduction, software definition, relationship between software and hardware, software categories, Installing and uninstalling software, software piracy, software terminologies. Word processing software, Spreadsheet software: Excel environment, copying cells using Fill handle, dragging cells, Formulas and functions, Inserting Charts, sorting. Presentation software: Introduction, PowerPoint environment, creating a new presentation, working with different views, using masters, adding animation, adding transition, running slides. Microsoft Access: Access environment, Database objects.

Unit 4

Programming using python, Variables and Types, Lists, Basic Operators, String Formatting, Basic String Operations, Conditions, Loops, Functions, Classes and Objects, Dictionaries, Modules and Packages.

Practicals:**Credit: 2**

1. Python program to find the area of a triangle
2. Python program to swap two variables
3. Python program to convert kilometres to miles
4. Python program to convert Celsius to Fahrenheit
5. Python Program to Check if a Number is Odd or Even
6. Python Program to Check Leap Year
7. Python Program to Check Prime Number
8. Python Program to Find the Factorial of a Number
9. Python Program to Print the Fibonacci sequence
10. Python Program to Convert Decimal to Binary, Octal and Hexadecimal
11. Python Program To Find ASCII value of a character
12. Python Program to Find Factorial of Number Using Recursion
13. Python program to sort the elements of an array in ascending order
14. Python program to sort the elements of an array in descending order
15. Python Program to Calculate the Average of Numbers in a Given List
16. Python Program to Reverse a Given Number
17. Python Program to Take in the Marks of 5 Subjects and Display the Grade
18. Python Program to Print all Numbers in a Range Divisible by a Given Number
19. Python Program to Accept Three Digits and Print all Possible Combinations from the Digits
20. Python Program to Print Odd Numbers Within a Given Range
21. Python Program to Find the Sum of Digits in a Number
22. Python Program to Find the Smallest Divisor of an Integer
23. Python Program to Count the Number of Digits in a Number
24. Python Program to Check if a Number is a Palindrome
25. Python Program to Print all Integers that Aren't Divisible by Either 2 or 3 and Lie between 1 and 50.
26. Python Program to Compute Simple Interest Given all the Required Values
27. Python Program to Check Whether a Given Year is a Leap Year
28. Python Program to Read Height in Centimeters and then Convert the Height to Feet and Inches
29. Python Program to Generate all the Divisors of an Integer
30. Python Program to Print Table of a Given Number
31. Python Program to Print Sum of Negative Numbers, Positive Even Numbers and Positive Odd numbers in a List
32. Python Program to Print Largest Even and Largest Odd Number in a List
33. Python Program to Form an Integer that has the Number of Digits at Ten's Place and
34. the Least Significant Digit of the Entered Integer at One's Place
35. Python Program to Find Those Numbers which are Divisible by 7 and Multiple of 5 in a Given Range of Numbers
36. Python Program to Check if a Number is an Armstrong Number
37. Python Program to Print the Pascal's triangle for n number of rows given by the user
38. Python Program to Find the LCM of Two Numbers
39. Python Program to Find the GCD of Two Numbers
40. Python Program to Find the Sum of First N Natural Numbers
41. Python Program to Determine all Pythagorean Triplets in the Range
42. Python Program to Find Whether a Number is a Power of Two
43. Python Program to Replace all Occurrences of 'a' with \$ in a String
44. Python Program to Remove the nth Index Character from a Non-Empty String
45. Python Program to Detect if Two Strings are Anagrams

46. Python Program to Form a New String where the First Character and the Last Character have been Exchanged
47. Python Program to Count the Number of Vowels in a String
48. Python Program to Take in a String and Replace Every Blank Space with Hyphen
49. Python Program to Calculate the Length of a String Without Using a Library Function
50. Python Program to Remove the Characters of Odd Index Values in a String
51. Python Program to Calculate the Number of Words and the Number of Characters Present in a String
52. Python Program to Count Number of Lowercase Characters in a String
53. Python Program to Check if a String is a Palindrome or Not
54. Python Program to Calculate the Number of Upper Case Letters and Lower Case Letters in a String
55. Python Program to Check if a String is a Pangram or Not
56. Python Program to Accept a Hyphen Separated Sequence of Words as Input and Print the Words in a Hyphen-Separated Sequence after Sorting them Alphabetically
57. Python Program to Calculate the Number of Digits and Letters in a String
58. Python Program to Form a New String Made of the First 2 and Last 2 characters From a Given String
59. Python Program to Count the Occurrences of Each Word in a Given String Sentence
60. Python Program to Check if a Substring is Present in a Given String

	Total		75 Marks

SEMESTER-IV

PAPER: BFS-401

C-8: Forensic Chemistry

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The methods of analyzing trace amounts of petroleum products in crime scene evidence.*
- b. *The methods of analyzing contaminants in petroleum products.*
- c. *The method of searching, collecting, preserving and analyzing arson evidence.*
- d. *The classification of explosives, including the synthesis and characterization of representative analogs.*
- e. *The significance of bomb scene management.*
- f. *The techniques of locating hidden explosives.*
- g. *The classification and characteristics of the narcotics, drugs and psychotropic substances.*

Unit 1: Petroleum and Petroleum Products

Distillation and fractionation of petroleum. Commercial uses of different petroleum fractions. Analysis of petroleum products. Analysis of traces of petroleum products in forensic exhibits. Comparison of petroleum products. Adulteration of petroleum products.

Unit 2: Cases Involving Arson

Chemistry of fire. Conditions for fire. Fire scene patterns. Location of point of ignition. Recognition of type of fire. Searching the fire scene. Collection and preservation of arson evidence. Analysis of fire debris. Analysis of ignitable liquid residue. Post-flashover burning. Scientific investigation and evaluation of clue materials. Information from smoke staining.

Unit 3: Explosives

Classification of explosives – low explosives and high explosives. Homemade explosives. Military explosives. Blasting agents. Synthesis and characteristics of TNT, PETN and RDX. Explosion process. Blast waves. Bomb scene management. Searching the scene of explosion. Mechanism of explosion. Post blast residue collection and analysis. Blast injuries. Detection of hidden explosives.

Practicals

Credits:2

1. To carry out analysis of gasoline.
2. To carry out analysis of diesel.
3. To carry out analysis of kerosene oil.
4. To analyze arson accelerators.
5. To prepare a case report on a case involving arson.
6. To carry out analysis of explosive substances.
7. To separate explosive substances using thin layer chromatography.
8. To prepare a case report on bomb scene management.

Suggested Readings

C-9: Questioned Documents

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The importance of examining questioned documents in crime cases.*
- b. *The tools required for examination of questioned documents.*
- c. *The significance of comparing hand writing samples.*
- d. *The importance of detecting frauds and forgeries by analyzing questioned documents.*

Unit 1: Nature and Scope of Questioned Documents

Definition of questioned documents. Types of questioned documents. Preliminary examination of documents.

Basic tools needed for forensic documents' examination – ultraviolet, visible, infrared and fluorescence spectroscopy, photomicrography, microphotography, visible spectral comparator, electrostatic detection apparatus.

Determining the age and relative age of documents.

Unit 2: Comparison of Documents

Comparison of handwriting. Development of individuality in handwriting. Natural variations and fundamental divergences in handwritings. Class and individual characteristics.

Merits and demerits of exemplar and non-exemplar samples during comparison of handwriting.

Standards for comparison of handwriting.

Comparison of paper, ink, printed documents, typed documents, Xeroxed documents.

Unit 3: Forgeries

Alterations in documents, including erasures, additions, over-writings and obliterations.

Indented and invisible writings. Charred documents.

Examination of counterfeit Indian currency notes, passports, visas and stamp papers.

Disguised writing and anonymous letters.

Practicals

Credits:2

1. To identify handwriting characters.
2. To study natural variations in handwriting.
3. To compare handwriting samples.
4. To detect simulated forgery.
5. To detect traced forgery.
6. To study the line quality defects in handwriting samples.
7. To examine the security features of currency notes, passports and plastic money.
8. To study alterations, obliterations and erasures in handwriting samples.
9. To cite a case wherein Section 45 of Indian Evidence Act was invoked, seeking expert opinion for authentication of handwriting and/or signatures.
10. To cite a case wherein Section 489A of the Indian Penal Code was invoked in context of fake currency.

Suggested Readings

1. O. Hilton, *Scientific Examination of Questioned Documents*, CRC Press, Boca Raton (1982).
2. A.A. Moenssens, J. Starrs, C.E. Henderson and F.E. Inbau, *Scientific Evidence in Civil and Criminal Cases*, 4th Edition, Foundation Press, New York(1995).
3. R.N. Morris, *Forensic Handwriting Identification: Fundamental Concepts and Principles*, Academic Press, London(2000).
4. E. David, *The Scientific Examination of Documents – Methods and Techniques*, 2nd Edition, Taylor & Francis, Hants(1997).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-10: Forensic Biology

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *The significance of biological and serological evidence.*
- b. *The forensic importance of hair evidence.*
- c. *The importance of biological fluids – blood, urine, semen, saliva, sweat and milk – in crime investigations.*
- d. *How wildlife forensics aid in conserving natural resources.*
- e. *How forensic entomology assists in death investigations.*

Unit 1: Biological Evidence

Nature and importance of biological evidence.

Significance of hair evidence. Transfer, persistence and recovery of hair evidence. Structure of human hair. Comparison of hair samples. Morphology and biochemistry of human hair. Comparison of human and animal hair.

Types and identification of microbial organisms of forensic significance.

Identification of wood, leaves, pollens and juices as botanical evidence. Diatoms and their forensic significance.

Unit 2: Wildlife Forensics

Fundamentals of wildlife forensic. Significance of wildlife forensic. Protected and endangered species of animals and plants. Illegal trading in wildlife items, such as skin, fur, bone, horn, teeth, flowers and plants. Identification of physical evidence pertaining to wildlife forensics. Identification of pug marks of various animals.

Unit 3: Forensic Entomology

Basics of forensic entomology. Insects of forensic importance. Collection of entomological evidence during death investigations.

Practicals

Credits:2

1. To examine hair morphology and determine the species to which the hair belongs.
2. To prepare slides of scale pattern of human hair.
3. To examine human hair for cortex and medulla.
4. To carry out microscopic examination of pollen grains.
5. To carry out microscopic examination of diatoms.
6. To cite a crime case in which diatoms have served as forensic evidence.
7. To prepare a case report on forensic entomology.
8. To prepare a case report on problems of wildlife forensics.

Suggested Readings

1. L. Stryer, *Biochemistry*, 3rd Edition, W.H. Freeman and Company, New York (1988).

AEEC-2: Handwriting Identification and Recognition

Credits:2

Learning Objectives: After studying this paper the students will know –

- a. *Important features in handwriting identification.*
- b. *Basis of handwriting characteristics.*
- c. *Significance of forensic documentation.*

Unit 1: Handwriting Identification

Basis of handwriting identification. Characteristics of handwriting – scope and application. Class and individual characteristics. Arrangement, alignment, margin, slant, speed, pressure, spacing, line quality, embellishments, movement and pen lifts. Factors influencing handwriting – physical, mechanical, genetic and physiological.

Unit 2: Handwriting Examination

Basis of handwriting comparison. Collection of handwriting samples. Forgery detection. Counterfeiting. Examination of altered and erased documents. Tools used in handwriting examination.

Unit 3: Handwriting Recognition

Basis of handwriting recognition. Off-line and on-line handwriting recognition. Steps involved in handwriting recognition – pre-processing, feature extraction and classification. Applications of handwriting recognition.

Suggested Readings

1. O. Hilton, *Scientific Examination of Questioned Documents*, CRC Press, Boca Raton (1982).
2. A.A. Moenssens, J. Starrs, C.E. Henderson and F.E. Inbau, *Scientific Evidence in Civil and Criminal Cases*, 4th Edition, Foundation Press, New York(1995).

GE-4: Psychology

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The definition and basic concept of psychology*
- b. *The schools of Psychology*
- c. *The branches of Psychology*
- d. *The scope and goals of psychology*
- e. *Neurons, Nervous system and Endocrine System*
- f. *Sensation, Learning, Memory and motivation*
- g. *States of Consciousness*
- h. *Human Personality and its assessment*
- i. *Freud's Psychoanalytical theory*

Unit 1: Introduction to Psychology

- Understanding psychology: definition, psychology as a discipline, psychology as science and social science, understanding mind and behavior. Evolution of psychology : philosophical and biological origin.
- Schools of psychology: Structuralism, Functionalism, Behaviorism, Psycho-dynamic and Gestalt psychology.
- Different branches of psychology : biological psychology, cognitive psychology, social psychology, developmental psychology, clinical psychology, counseling psychology, educational/school psychology, industrial/ organizational psychology, forensic psychology, military psychology and sports psychology.
- Scope and goals of psychology.

Unit 2: Bio-Psychology

- Neurons: Structure of neurons, External, internal and supporting structures, types of neurons. Neural impulse transmission-electrical and chemical, role of neurotransmitters.
- The Anatomy of the Nervous system and The Peripheral Nervous system- Central Nervous system, Forebrain, Midbrain and Hindbrain, Hypothalamus, Cortex, Spinal cord. Autonomic Nervous system: Sympathetic and Parasympathetic Nervous system.
- The Endocrinesystem- The endocrine glands and hormones, hormonal influence on learning and memory, effects of hormones on human behavior.

Unit 3: Cognitive Processes

- Sensation- Selection, Sensory Adaptation, Analysis & Coding. Perception-sensing, perceiving, classifying, Gestalt principles.
- Learning- Classical conditioning: Elements, principles, generalization, discrimination, second order conditioning. Operant conditioning: Reinforcement, punishment, shaping, chaining, stimulus control, schedules of reinforcement, partial reinforcement effect. Social learning theory.
- Memory: - Encoding, storage and retrieval processes. Three levels of memory- Sensory, short term and long term memories. Atkinson-Shiffrin Model of memory. Implicit and explicit memory. Semantic, episodic and procedural memory.

Unit 4: Personality and Consciousness

- States of mind: Nature of consciousness, Changes in consciousness: dream and sleep. Stages of sleep. Altered states: Hypnosis- facts and myths, meditation, drug induced states.
- Motivation: model of motivation-need, drive, response and goal. Primary and secondary motives. Learned motives: affiliation, achievement and power motives. Maslow's theory of hierarchical motives.
- Human Personality and Assessment of Personality, Personality- categorizing by types, describing by traits. Freud's Psychoanalytical theory—levels of consciousness, structure of personality-id, ego & superego, psychosexual stages of development and defence mechanisms.

Practical s

Credits: 2

1. Life Satisfaction Scale
2. Student Problem Checklist
3. Internal External Locus of Control
4. Immediate Memory Span
5. Division of Attention
6. Self-Concept Questionnaire
7. Ravens Standard Progressive Matrices
8. Guidance Needs Inventory
9. General Health Questionnaire
10. Beck's Depression Inventory
11. Anxiety Scale

THIRD YEAR

SEMESTER-V**PAPER: BFS-501****C-11: Forensic Ballistics****Credits: 4**

Learning Objectives: After studying this paper the students will know –

- a. The classification of firearms and their firing mechanisms.*
- b. The methods of identifying firearms.*
- c. The characteristics of ammunition.*
- d. The importance of firearm evidence.*
- e. The nature of firearm injuries.*
- f. The methods for characterization of gunshot residue.*

Unit 1: Firearms

History and development of firearms. Classification of firearms. Weapon types and their operation. Firing mechanisms of different firearms.

Internal ballistics – Definition, ignition of propellants, shape and size of propellants, manner of burning, and various factors affecting the internal ballistics: lock time, ignition time, barrel time, erosion, corrosion and gas cutting.

External Ballistics – Vacuum trajectory, effect of air resistance on trajectory, base drag, drop, drift, yaw, shape of projectile and stability, trajectory computation, ballistics coefficient and limiting velocity, Measurements of trajectory parameters, introduction to automated system of trajectory computation and automated management of ballistic data.

Terminal Ballistics – Effect of projectile on hitting the target: function of bullet shape, striking velocity, striking angle and nature of target, tumbling of bullets, effect of instability of bullet, effect of intermediate targets, influence of range. Ricochet and its effects, stopping power.

Unit 2: Ammunition

Types of ammunition. Constructional features and characteristics of different types of cartridges and bullets. Primers and priming compounds. Projectiles. Headstamp markings on ammunitions. Different types of marks produced during firing process on cartridge – firing pin marks, breech face marks, chamber marks, extractor and ejector marks.

Unit 3: Firearm Evidence

Matching of bullets and cartridge cases in regular firearms. Identification of bullets, pellets and wads fired from improvised, country made firearms. Automated method of bullet and cartridge case comparison. Determination of range of fire and time of fire.

Mechanisms of formation of gunshot residues. Methods of analysis of gunshot residues from shooting hands and targets, with special reference to clothings.

Identification and nature of firearm injuries. Reconstruction with respect to accident, suicide, murder and self defence.

Practicals

Credits:2

1. To describe, with the aid of diagrams, the firing mechanisms of different types of firearms.
2. To correlate the velocity of bullet with the impact it produces on the target.
3. To correlate the striking angle of the bullet with the impact on the target.
4. To estimate the range of fired bullets.
5. To carry out the comparison of fired bullets.
6. To carry out the comparison of fired cartridge cases.
7. To identify gunshot residue.
8. To correlate the nature of injuries with distance from which the bullet was fired.
9. To differentiate, with the aid of diagram, contact wounds, close range wounds and distant wounds.

Suggested Readings

1. B.J. Heard, *Handbook of Firearms and Ballistics*, Wiley and Sons, Chichester(1997).
2. W.F. Rowe, *Firearms identification, Forensic Science Handbook*, Vol. 2, R. Saferstein (Ed.), Prentice Hall, New Jersey(1988).
3. A.J. Schwoeble and D.L. Exline, *Current Methods in Forensic Gunshot Residue Analysis*, CRC Press, Boca Raton(2000).
4. E. Elia and J. A. Siegel, *Encyclopedia of Forensic Science, Volume 2*, J.A. Siegel, P.J. Saukko and G.C. Knupfer (Eds.), Academic Press, London (2000).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

C-12: Forensic Toxicology

Credits:2

Learning Objectives: After studying this paper the students will know –

- a. *The significance of toxicological studies in forensic science.*
- b. *The classification of poisons and their modes of actions.*
- c. *The absorption of poisons in body fluids.*
- d. *The forensic identification of illicit liquors.*
- e. *The classification and characteristics of the narcotics, drugs and psychotropic substances.*
- f. *The menace of designer drugs.*
- g. *The methods of identifying and purifying narcotics, drugs and psychotropic substances.*

Unit 1: Basics of Toxicology

Significance of toxicological findings. Techniques used in toxicology. Toxicological analysis and chemical intoxication tests.

Postmortem Toxicology. Human performance toxicology.

Dose-response relationship. Lethal dose 50 and effective dose 50.

Unit 2: Poisons

Classification of poisons. Physico-chemical characteristics and mode of action of poisons. Accidental, suicidal and homicidal poisonings.

Signs and symptoms of common poisoning and their antidotes. Collection and preservation of viscera, blood and urine for various poison cases.

Identification of biocides and metal salts in body fluids. Metabolism and excretion of poisons. Application of immunoassays in forensic work.

Animal poisons. Snake venom. Mode of action. Carbon monoxide poisoning.

Vegetable poisons. Poisonous seeds, fruits, roots and mushrooms.

Beverages. Alcoholic and non-alcoholic illicit liquors. Analysis and identification of ethyl alcohol. Estimation of ethyl alcohol in blood and urine. Proof spirit.

Crime scene management in illicit liquor cases.

Unit 3: Narcotics, Drugs and Psychotropic Substances

Definition of narcotics, drugs and psychotropic substances. Broad classification – Narcotics, stimulants, depressants and hallucinogens. General characteristics and common example of each classification. Natural, synthetic and semi-synthetic narcotics, drugs and psychotropic substances.

Designer drugs. Tolerance, addiction and withdrawal symptoms of narcotics, drugs and psychotropic substances

Crime scene search for narcotics, drugs and psychotropic substances – searching a suspect, searching a dwelling, searching a vehicle.

Clandestine drug laboratories. Collection and preservation of drug evidence. Testing of narcotics, drugs and psychotropic substances.

Isolation techniques for purifying narcotics, drugs and psychotropic substances – thin layer chromatography, gas-liquid chromatography and high performance liquid chromatography.

Presumptive and screening tests for narcotics, drugs and psychotropic substances.

Microcrystalline testing of drugs of abuse.

Analysis of narcotics, drugs and psychotropic substances in breast milk, saliva, urine, hair and antemortem blood.

Drugs and driving. Dope tests.

Analysis of narcotics, drugs and psychotropic substances in postmortem blood. Postmortem changes affecting the analysis of narcotics, drugs and psychotropic substances.

Practicals

Credits:2

1. To identify biocides.
2. To identify metallic poisons.
3. To identify organic poisons.
4. To identify ethyl alcohol.
5. To identify methyl alcohol.
6. To carry out quantitative estimation of ethyl alcohol.
7. To prepare iodoform.
8. To identify drugs of abuse by spot tests.
9. To perform color tests for barbiturates.
10. To separate drugs of abuse by thin layer chromatography.

Suggested Readings

1. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey (2004).
2. F.G. Hofmann, *A Handbook on Drug and Alcohol Abuse*, 2nd Edition, Oxford University Press, New York (1983).
3. S.B. Karch, *The Pathology of Drug Abuse*, CRC Press, Boca Raton (1996).

DSE-1:DigitalForensics

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The basics of digitalforensics.*
- b. *The cases which fall under the purview of digitalcrimes.*
- c. *The types of digitalcrimes.*
- d. *The elements involved in investigation of digitalcrimes.*

Unit 1: Fundamentals and Concepts

Fundamentals of computers Hardware and accessories – development of hard disk, physical construction, CHS and LBA addressing, encoding methods and formats. Memory and processor. Methods of storing data. Operating system. Software. Introduction to network, LAN, WAN and MAN.

Unit 2: Computer Crimes

Definition and types of computer crimes. Distinction between computer crimes and conventional crimes. Reasons for commission of computer crimes. Breaching security and operation of digital systems.

Computer virus, and computer worm – Trojan horse, trap door, super zapping, logic bombs. Types of computer crimes – computer stalking, pornography, hacking, crimes related to intellectual property rights, computer terrorism, hate speech, private and national security in cyber space.

An overview of hacking, spamming, phishing and stalking.

Unit 3: Computer Forensics Investigations

Seizure of suspected computer. Preparation required prior to seizure.

Protocol to be taken at the scene. Extraction of information from the hard disk.

Treatment of exhibits. Creating bitstream of the original media. Collection and seizure of magnetic media. Legal and privacy issues. Examining forensically sterile media. Restoration of deleted files. Password cracking and E-mail tracking. Encryption and decryption methods. Trackingusers.

Practicals

Credits:2

1. To identify, seize and preserve digital evidence from crimescenes.
2. To detect deletions, obliterations and modifications of files using encasesoftware.
3. To trace routes followed by e-mails andchats.
4. To identify the IP address of the sender ofe-mails.
5. To demonstrate concealment techniques using cryptographicPGP.
6. To identify encryptedfiles.
7. To identify hiddenfiles.
8. To use digital signatures for securing e-mail and onlinetransactions.
9. To acquire data from PCs/laptops/HDDs/USBs, pen drives, memory cards andSIM cards.
10. To use symmetric and asymmetric keys for protection of digitalrecord.
11. To carry out imaging of harddisks.

Suggested Readings

1. R.K. Tiwari, P.K. Sastry and K.V. Ravikumar, *Computer Crimes and Computer Forensics*, Select Publishers, New Delhi (2003).
2. C.B. Leshin, *Internet Investigations in Criminal Justice*, Prentice Hall, New Jersey(1997).

Section B	Analytical Questions/Illustrations/ studies/essay type questions case	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ studies/essay type questions case	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

Learning Objectives: After studying this paper the students will know –

- a. *The significance of serological evidence.*
- b. *The importance of biological fluids – blood, urine, semen, saliva, sweat and milk – in crime investigations.*
- c. *The usefulness of genetic markers in forensic investigations.*
- d. *The forensic importance of bloodstain patterns*

Unit 1: Forensic Importance of Body fluids

Common body fluids. Composition and functions of blood. Collection and preservation of blood evidence. Distinction between human and non-human blood. Determination of blood groups. Antigens and antibodies.

Forensic characterization of bloodstains. Typing of dried stains. Blood enzymes and proteins. Semen. Forensic significance of semen. Composition, functions and morphology of spermatozoa. Collection, evaluation and tests for identification of semen. Individualization on the basis of semen examination.

Composition, functions and forensic significance of saliva, sweat, milk and urine. Tests for their identifications.

Unit 2: Genetic Marker Analysis

Cellular antigens. ABO blood groups.

Extracellular proteins and intracellular enzymes.

Significance of genetic marker typing data. Sexual assault investigations.

Unit 3: Bloodstain Pattern Analysis

Bloodstain characteristics. Impact bloodstain patterns. Cast-off bloodstain patterns. Projected bloodstain patterns. Contact bloodstain patterns. Blood trails. Bloodstain drying times. Documentation of bloodstain pattern evidence. Crime scene reconstruction with the aid of bloodstain pattern analysis.

Practicals

Credits:2

1. To determine blood group from fresh blood samples.
2. To determine blood group from dried blood sample.
3. To carry out the crystal test on a blood sample.
4. To identify blood samples by chemical tests.
5. To identify the given stain as saliva.
6. To identify the given stain as urine.
7. To carry out cross-over electrophoresis.
8. To study the correlation between impact angle and shape of bloodstain.
9. To identify the point of convergence from the bloodstain patterns.

Suggested Readings

1. W.G. Eckert and S.H. James, *Interpretation of Bloodstain Evidence at Crime Scenes*, CRC Press, Boca Raton(1989).
2. G.T. Duncan and M.I. Tracey in *Introduction to Forensic Sciences*, 2nd Edition, W.G. Eckert (Ed.), CRC Press, Boca Raton(1997).
3. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey(2004).
4. T. Bevel and R.M. Gardner, *Bloodstain Pattern Analysis*, 3rd Edition, CRC Press, Boca

Raton(2008).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

SEMESTER-VI

PAPER: BFS-601

C-13: Forensic Anthropology & Odontology

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *Importance of forensic anthropology in identification of persons.*
- b. *Different techniques of facial reconstruction and their forensic importance.*
- c. *Significance of somatoscopy and somatometry.*

Unit 1: Significance of Forensic Anthropology

Scope of forensic anthropology. Study of human skeleton. Nature, formation, and identification of human bones. Determination of age, sex, stature from skeletal material.

Unit 2: Personal Identification – Somatoscopy and Somatometry

Somatoscopy – observation of hair on head, forehead, eyes, root of nose, nasal bridge, nasal tip, chin, Darwin's tubercle, ear lobes, supra-orbital ridges, physiognomic ear breadth, circumference of head. Scar marks and occupational marks.

Somatometry – measurements of head, face, nose, cheek, ear, hand and foot, body weight, height. Indices - cephalic index, nasal index, cranial index, upper facial index.

Unit 3: Facial Reconstruction

Portrait Parle/ Bertillon system. Photofit/identi kit. Facial superimposition techniques.

Cranio facial super imposition techniques – photographic super imposition, videoperimposition, Roentgenographic superimposition. Use of somatoscopic and craniometric methods in reconstruction. Importance of tissue depth in facial reconstruction.

Genetic and congenital anomalies – causes, types, identification and their forensic significance.

Unit 4: Forensic Odontology

Development, scope and role of forensic odontology in mass disaster and anthropology. Types of teeth and their comparative anatomy.

Bite marks. Forensic significance of bite marks. Collection, preservation and photography of bite marks evidence. Legal aspects of bite marks. Estimation of age from teeth.

Practicals

Credits:2

1. To determine of age from skull and teeth.
2. To determine of sex from skull.
3. To determine sex from pelvis.
4. To study identification and description of bones and their measurements.
5. To investigate the differences between animal and human bones.
6. To perform somatometric measurements on living subjects.
7. To carry out craniometric measurements of human skull.
8. To estimate stature from long bone length.
9. To conduct portrait parley using photofit identification kit.

Suggested Readings

1. M.Y. Iscan and S.R. Loth, The scope of forensic anthropology in, *Introduction to Forensic Sciences*, 2nd Ed., W.G. Eckert (Ed.), CRC Press, Boca Raton(1997).
2. D. Ubelaker and H. Scammell, *Bones*, M. Evans & Co., New York(2000).
3. S.Rhine, *Bone Voyage: A Journey in Forensic Anthropology*, University of Mexico Press, Mexico(1998).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

C-14: Forensic Medicine & Microbial Forensics

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The duties of the first responding officer who receives a call on homicide or suicide case.*
- b. *The steps involved in processing the death scene.*
- c. *The importance of ascertaining whether the crime was staged to appear as suicide or accident.*
- d. *The importance of bloodstain patterns in reconstructing the crime scene.*
- e. *The importance of autopsy.*
- f. *The importance of forensic odontology*

Unit 1: Death Investigations

Fundamental aspects and scope of forensic medicine.

Approaching the crime scene of death. Obtaining first hand information from the caller. Rendering medical assistance to the victim, if alive. Protecting life. Recording dying declaration.

Identifying witnesses and, if possible, suspect. Interviewing onlookers and segregating possible witnesses.

Suspect in custody – initial interrogation and searching for evidence. Miranda warning card. Assessing the crime scene. Request for forensic team. Importance of command post and log book. Management of crowd and media.

Importance of taking notes. Items to be a part of noting.

Documenting the death scene. Processing evidence. Evaluation of injuries. Importance of canvass form. Indexing the death investigation.

Handling buried body cases – search for buried bodies, methods of exhumation.

Suicide cases – evaluating the type of injuries, gauging the psychological state of victim, suicide notes.

Unit 2: Autopsy

Forensic pathology. Medico-legal aspects of death. Causes of death. Determination of time since death. Investigation of sexual offences. Death by drowning.

Injuries. Types and classification of injuries. Antemortem and post mortem injuries. Aging of injuries. Artificial injuries.

Unit 3: Microbial Forensics

Organisms of Forensic significance, types, isolation and identification.

Unit 4: Bioterrorism

Bioterrorism: Definition, Concepts of Biosecurity Weapons of mass destruction (WMD), mass-casualty weapons (MCW), NBC and CBRNE, Dirty Bombs.

Practicals

Credits:2

1. To design a questionnaire for the first responder to the death scene.
2. To design a protocol to deal with the media at the crime scene.
3. To design a checklist for the forensic scientists at the death scene.

4. To design a canvass form giving description of an unidentified victim.
5. To analyze and preserve bite marks.

Suggested Readings

1. K. Smyth, *The Cause of Death*, Van Nostrand and Company, New York(1982).
2. M. Bernstein, Forensic odontology in, *Introduction to Forensic Sciences*, 2nd Ed., W.G. Eckert (Ed.), CRC Press, Boca Raton(1997).
3. J. Dix, *Handbook for Death Scene Investigations*, CRC Press, Boca Raton(1999).
4. H.B. Baldwin and C.P. May in, *Encyclopedia in Forensic Science, Volume 1*, J.A. Siegel, P.J. Saukko and G.C. Knupfer (Eds.), Academic Press, London(2000).
5. V.J. Geberth, *Practical Homicide Investigation*, CRC Press, Boca Raton(2006).
6. T. Bevel and R.M. Gardner, *Bloodstain Pattern Analysis*, 3rd Edition, CRC Press, Boca Raton(2008).
7. W.J. Tilstone, M.L. Hastrup and C. Hald, Fisher's, *Techniques of Crime Scene Investigation*, CRC Press, Boca Raton(2013).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

PAPER: BFS-603

DSE-3:DNA Forensics

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *The basic principle of DNA analysis.*
- b. *The forensic significance of DNA typing.*
- c. *The importance of short tandem repeats and restriction fragment length polymorphism in DNA technique.*
- d. *Role of DNA typing in parentage testing.*

Unit 1: Basic Principles

DNA as biological blueprint of life. Extraction of DNA for analysis. Quantitation of DNA – yield gel quantitation and slot blot quantitation. Mitochondrial DNA – sequence analysis.

Unit 2: Forensic DNA Typing

Collection of specimens. Polymerase chain reaction – historical perspective, sequence polymorphisms, individualization of evidence.

Short tandem repeats (STR) – role of fluorescent dyes, nature of STR loci.

Restriction fragment length polymorphism (RFLP) – genetic markers used in RFLP, typing procedure and interpretation of results.

Touch DNA.

Unit 3: Parentage Testing

Principles of heredity. Genetics of paternity. DNA testing in disputed paternity. Mendelian laws of parentage testing. Mathematical basis of parentage identification.

Missing body cases. Reference populations and databases.

Report Writing: *Role of DNA typing in identifying unrecognizable bodies.*

Allele frequency determination. Hardy-Weinberg law. Probability determination in a population database.

Practicals

Credits:2

1. To carry out the separation of amino acids by thin layer chromatography.
2. To carry out *extraction of DNA from body fluids.*
3. To preparation of gel plates forelectrophoresis.
4. To carry out electrophoresis for separation of enzymes.
5. To prepare a report on the role of DNA typing in solving paternity disputes.

Suggested Readings

1. J.M. Butler, *Forensic DNA Typing*, Elsevier, Burlington(2005).
2. K. Inman and N. Rudin, *An Introduction to Forensic DNA Analysis*, CRC Press, Boca Raton(1997).
3. H. Coleman and E. Swenson, *DNA in the Courtroom: A Trial Watcher's Guide*, GeneLex Corporation, Washington(1994).
4. W.J. Tilstone, M.L. Hastrup and C. Hald, Fisher's, *Techniques of Crime Scene Investigation*, CRC Press, Boca Raton(2013).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

	Total		75 Marks

PAPER: BFS-604

DSE-4: Research Project (including Research Methodology & Bio-statistics

Credits: 6

The research project will be based on a research topic in Forensic Science/Criminology. The topic will be assigned in consultation with police and forensic science establishments, giving due consideration to the problem areas faced by these institutions. The students will be expected to undertake extensive field work, in collaboration with mobile policelaboratories.

GENERIC ELECTIVE COURSES

To be offered to students of other disciplines

One each in Semester I, II, III and IV. To be chosen from the following.

- GE-1: Criminalistics
- GE-2: Forensic Dematoglyphics
- GE-3: Forensic Chemistry
- GE-4: Forensic Biology and Serology
- GE-5: Forensic Anthropology and Forensic Medicine
- GE-6: Digital Forensics

PAPER: GE-1

Criminalistics

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *The significance of forensic science to humansociety.*
- b. *The fundamental principles and functions of forensic science.*
- c. *The working of the forensic establishments in India and abroad.*
- d. *The causes of criminal behavior and significance of criminal profiling.*
- e. *The consequences of crime in society.*
- f. *The methods of securing, searching and documenting crime scenes.*
- g. *The art of collecting, packaging, preserving and analyzing different types of physical and trace evidence.*

Unit 1: Functions of Forensic Science

Definitions and concepts in forensic science. Scope of forensic science. Need of forensic science. Basic principles of forensic science.

Tools and techniques in forensic science.

Branches of forensic science. Data depiction. Report writing.

Forensic science in India: Organizational set up of forensic science laboratories.

Unit 2: Criminology

Definition, aims and scope. Theories of criminal behavior. Criminal anthropology.

Criminal profiling. Role of media.

Elements, nature, causes and consequences of crime. Deviant behavior. Hate crimes, organized crimes and public disorder..

Social change and crime.

Understanding modus operandi. Investigative strategy. Police's power of investigation. Filing of criminal charges. Correctional measures and rehabilitation of offenders.

Unit 3: Crime Scene Management

Crime scene investigations. Protecting and isolating the crime scene. Crime scene search methods.

Documentation of crime scene by photography, sketching and field notes.

Types, significance and classification of physical and trace evidence. Locard Principle.

Collection and care of evidence. Submission of evidence. Chain of custody. Reconstruction of crime scene.

Glass evidence – collection, packaging, analysis. Matching of glass samples by mechanical fit and refractive index measurements. Fracture analysis and direction of impact.

Paint evidence – collection, packaging and preservation. Analysis by destructive and non-destructive methods. Importance of paint evidence in hit and run cases.

Fibre evidence – artificial and man-made fibres. Collection of fibre evidence. Identification and comparison of fibres.

Soil evidence – importance, location, collection and comparison of soil samples.

Toolmark evidence. Classification of toolmarks. Forensic importance of toolmarks.

Collection, preservation and matching of toolmarks. Restoration of erased serial numbers and engraved marks.

Practicals

Credits:2

1. To study the history of crime cases from forensic science perspective.
2. To review the sections of forensic science at INTERPOL and compare with those in Central Forensic Science Laboratories in India. Include suggestions for improvements if any.
3. To study the annual reports of National Crime Records Bureau and depict the data on different type of crime cases by way of smartart/templates.
4. To examine the hierarchical set up of different forensic science establishments and suggest improvements.
5. To examine the list of projects undertaken by the Bureau of Police Research and Development and suggest the thrust areas of research in Police Science.
6. To compare and contrast the role of a Police Academy and a Police Training School.
7. To compare the code of conduct prescribed by different establishments for forensic scientists.
8. To review past criminal cases and elucidate which theory best explains the criminal behavior of the accused.
9. To review crime cases where criminal profiling assisted the police to apprehend the accused.
10. To examine the role of media in creating awareness on right to live in a crime-free society.
11. To evaluate the post-trauma stress amongst victims of racial discrimination.
12. To compare glass samples by refractive index method.
13. To compare paint samples by thin layer chromatography.
14. To compare fibre evidence by examining their cross sections.
15. To compare soil samples by density gradient method.
16. To identify and compare toolmarks.

Suggested Readings

1. B.B. Nanda and R.K. Tiwari, *Forensic Science in India: A Vision for the Twenty First Century*, Select Publishers, New Delhi(2001).
2. S.H. James and J.J. Nordby, *Forensic Science: An Introduction to Scientific and Investigative Techniques*, 2nd Edition, CRC Press, Boca Raton(2005).
3. D.E. Zulawski and D.E. Wicklander, *Practical Aspects of Interview and Interrogation*, CRC Press, Boca Raton(2002).

PAPER: GE-2

ForensicDermatoglyphics

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The fundamental principles on which the science of fingerprinting is based.*
- b. *Fingerprints are the most infallible means of identification.*
- c. *The world's first fingerprint bureau was established in India.*
- d. *The method of classifying criminal record by fingerprints was worked out in India, and by Indians.*
- e. *The physical and chemical techniques of developing fingerprints on crime scene evidence.*
- f. *The significance of foot, palm, ear and lip prints.*

Unit 1: Basics of fingerprinting

Introduction and history, with special reference to India.

Biological basis of fingerprints. Formation of ridges. Fundamental principles of fingerprinting. Types of fingerprints. Fingerprint patterns. Fingerprint characters. Plain and rolled fingerprints.

Classification method for fingerprint record keeping. Automated Fingerprint Identification System.

Unit 2: Development of Fingerprints

Latent prints. Constituents of sweat residue.

Latent fingerprints' detection by physical and chemical techniques.

Mechanism of detection of fingerprints by different developing reagents.

Application of light sources in fingerprint detection. Preservation of developed fingerprints.

Unit 3: Other Impressions

Importance of footprints. Casting of foot prints, Electrostatic lifting of latent foot prints.

Lip prints - Nature, location, collection and examination of lip prints. Ear prints and their significance.

Palm prints and their historical importance.

Practicals

Credits:2

1. To enumerate with the aid of diagrams, different types of fingerprint patterns and fingerprint characters.
2. To record plain and rolled Fingerprints.
3. To identify core and delta in sample fingerprints.
4. To examine the patterns of all your ten fingers and carry out the primary classification of your index card.
5. To detect of fingerprints by powder method.
6. To detect fingerprints by ninhydrin method
7. To detect fingerprints by iodine method.
8. To detect fingerprints by silver nitrate method
9. To lift the developed fingerprints from different surfaces using tape.
10. To cast footprints using plaster of Paris.
11. To study the patterns in lip prints.

Suggested Readings

1. J.E. Cowger, *Friction Ridge Skin*, CRC Press, Boca Raton(1983).
2. D.A. Ashbaugh, *Quantitative-Qualitative Friction Ridge Analysis*, CRC Press, Boca Raton(2000).
3. C. Champod, C. Lennard, P. Margot an M. Stoilovic, *Fingerprints and other Ridge Skin Impressions*, CRC Press, Boca Raton(2004).
4. Lee and Gaensleen's, *Advances in Fingerprint Technology*, 3rd Edition, R.S. Ramotowski (Ed.), CRC Press, Boca Raton(2013).

Teaching Learning Methodology

PAPER: GE-3

Forensic Chemistry

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *The methods of analyzing trace amounts of petroleum products in crime scene evidence.*
- b. *The methods of analyzing contaminants in petroleum products.*
- c. *The classification and characteristics of the narcotics, drugs and psychotropic substances.*
- d. *The methods of identifying narcotics, drugs and psychotropic substances.*
- e. *The forensic identification of illicit liquors.*
- f. *The classification of explosives, including the synthesis and characterization of representative analogs.*
- g. *The significance of bomb scene management.*

Unit 1: Petroleum and Petroleum Products

Distillation and fractionation of petroleum. Commercial uses of different petroleum fractions. Analysis of petroleum products. Analysis of traces of petroleum products in forensic exhibits. Comparison of petroleum products. Adulteration of petroleum products.

Unit 2: Narcotics, Drugs, Psychotropic Substances and Alcoholic Beverages

Natural and synthetic. Drug dependence. Classification of drugs of abuse – narcotics, hallucinogens, depressants, stimulants and anabolic steroids. Withdrawal symptoms. Tests of narcotics, drugs and psychotropic substances of. Alcoholic and non-alcoholic beverages. Analysis of alcoholic beverages. Detection and determination of ethanol and methanol. Licit and illicit liquors.

Unit 3: Explosives

Classification of explosives – low explosives and high explosives. Homemade explosives. Military explosives. Blasting agents. Synthesis and characteristics of TNT, PETN and RDX. Explosion process. Blast waves. Bomb scene management. Searching the scene of explosion.

Practicals

Credits:2

1. To carry out analysis of gasoline.
2. To carry out analysis of diesel.
3. To carry out analysis of kerosene oil.
4. To identify illicit drugs by spot tests.
5. To perform color tests for opiates.
6. To perform color tests for barbiturates.
7. To identify methyl alcohol.
8. To identify ethyl alcohol.
9. To carry out chemical tests on explosive substances.

Suggested Readings

1. A.A. Moenssens, J. Starrs, C.E. Henderson and F.E. Inbau, *Scientific Evidence in Civil and Criminal Cases*, 4th Edition, The Foundation Press, Inc., New York(1995).

Learning Objectives: After studying this paper the students will know –

- a. *The significance of biological and serological evidence.*
- b. *The forensic importance of hair evidence.*
- c. *The importance of biological fluids – blood, urine, semen, saliva, sweat and milk – in crime investigations.*
- d. *The importance of bloodstain patterns in reconstructing the crime scene.*

Unit 1: Biological Evidence

Nature and importance of biological evidence.

Significance of hair evidence. Transfer, persistence and recovery of hair evidence. Structure of human hair. Comparison of hair samples. Morphology and biochemistry of human hair. Comparison of human and animal hair.

Types and identification of microbial organisms of forensic significance.

Identification of wood, leaves, pollens and juices as botanical evidence. Diatoms and their forensic significance.

Unit 2: Forensic Importance of Body fluids

Identification of body fluids. Composition and functions of blood. Collection and preservation of blood evidence. Distinction between human and non-human blood. Determination of blood groups. Antigens and antibodies.

Semen. Forensic significance of semen. Composition, functions and morphology of spermatozoa. Collection, evaluation and tests for identification of semen. Individualization on the basis of semen examination.

Composition, functions and forensic significance of saliva, sweat, milk and urine. Tests for their identifications.

Unit 3: Bloodstain Pattern Analysis

Bloodstain characteristics. Impact bloodstain patterns. Cast-off bloodstain patterns. Projected bloodstain patterns. Contact bloodstain patterns. Blood trails. Bloodstain drying times.

Documentation of bloodstain pattern evidence.

Crime scene reconstruction with the aid of bloodstain pattern analysis.

Practicals

Credits:2

1. To examine hair morphology and determine the species to which the hair belongs.
2. To prepare slides of scale pattern of human hair.
3. To examine human hair for cortex and medulla.
4. To carry out microscopic examination of pollen grains.
5. To carry out microscopic examination of diatoms.
6. To determine blood group from fresh blood samples.
7. To carry out chemical identification of human blood.
8. To carry out crystal test of human blood.
9. To carry out cross-over electrophoresis.
10. To carry out identification of saliva.
11. To carry out identification of urine.
12. To study the correlation between impact angle and shape of bloodstain.
13. To identify the point of convergence from the bloodstain patterns.

Suggested Readings

1. L. Stryer, *Biochemistry*, 3rd Edition, W.H. Freeman and Company, New York(1988).
2. W.G. Eckert and S.H. James, *Interpretation of Bloodstain Evidence at Crime Scenes*, CRC Press, Boca Raton(1989).
3. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey(2004).
4. G.T. Duncan and M.I. Tracey, Serology and DNA typing in, *Introduction to Forensic Sciences*, 2nd Edition, W.G. Eckert (Ed.), CRC Press, Boca Raton(1997).
5. T. Bevel and R.M. Gardner, *Bloodstain Pattern Analysis*, 3rd Edition, CRC Press, Boca Raton(2008).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

PAPER: GE-5

Forensic Anthropology

Credits: 4

Learning Objectives: After studying this paper the students will know –

- a. *Importance of forensic anthropology in identification of persons.*
- b. *Different techniques of facial reconstruction and their forensic importance.*
- c. *Significance of somatoscopy and somatometry.*

Unit 1: Significance of Forensic Anthropology

Scope of forensic anthropology. Study of human skeleton. Nature, formation, and identification of human bones. Determination of age, sex, stature from skeletal material.

Unit 2: Personal Identification – Somatoscopy and Somatometry

Somatoscopy – observation of hair on head, forehead, eyes, root of nose, nasal bridge, nasal tip, chin, Darwin's tubercle, ear lobes, supra-orbital ridges, physiognomic ear breadth, circumference of head. Scar marks and occupational marks.

Somatometry – measurements of head, face, nose, cheek, ear, hand and foot, body weight, height. Indices - cephalic index, nasal index, cranial index, upper facial index.

Unit 3: Facial Reconstruction

Portrait Parle/ Bertillon system. Photofit/identi kit. Facial superimposition techniques.

Cranio facial super imposition techniques – photographic super imposition, videosuperimposition, Roentgenographic superimposition. Use of somatoscopic and craniometric methods in reconstruction. Importance of tissue depth in facial reconstruction.

Genetic and congenital anomalies – causes, types, identification and their forensic significance.

Practicals

Credits:2

1. To determine of age from skull and teeth.
2. To determine of sex from skull.
3. To determine sex from pelvis.
4. To study identification and description of bones and their measurements.
5. To investigate the differences between animal and human bones.
6. To perform somatometric measurements on living subjects.
7. To carry out craniometric measurements of human skull.
8. To estimate stature from long bone length.
9. To conduct portrait parley using photofit identification kit.

Suggested Readings

4. M.Y. Iscan and S.R. Loth, The scope of forensic anthropology in, *Introduction to Forensic Sciences*, 2nd Ed., W.G. Eckert (Ed.), CRC Press, Boca Raton (1997).
5. D. Ubelaker and H. Scammell, *Bones*, M. Evans & Co., New York (2000).
6. S. Rhine, *Bone Voyage: A Journey in Forensic Anthropology*, University of Mexico Press, Mexico (1998).

Teaching Learning Methodology

Instructional methods and teaching methodology will be diverse and have a combination of lectures, active problem solving, demonstrations, group discussions and field visits.

The exhaustive list of methodologies is listed in point no.7. The instructor would provide a scheme of work that details specific teaching and learning strategies for each unit of the course.

Examination Scheme/Assessment (Written)

	Marks
Internal Assessment	25
Final Examination	75
	100

Continuous Internal Assessment (CIA)

SN	Internal Assessment for 25 marks	Marks
1	One Internal examination	15
2	Assignment/Seminars/Viva-voce/ Research Papers Presentation/Class Interaction/Attitude	10

Examination Scheme/Assessment Question Pattern for the internal exam will be as below

Section A	MCQ & Objective Questions	15 Questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ case studies/essay type questions	2 Questions x 10 marks each	20 Marks
Section C	Analytical Questions/Illustrations/ case studies/essay type questions	1 Question x 15 marks each	15 Marks
	Total		50 Marks

Examination Scheme/Assessment Question Pattern for the end semester exam will be as below

Section A	MCQ & Objective Questions	15 questions x 1 mark each	15 Marks
Section B	Analytical Questions/Illustrations/ studies/essay type questions case	3 Questions x 10 marks each	30 Marks
Section C	Analytical Questions/Illustrations/ studies/essay type questions case	2 Questions x 15 marks each	30 Marks
	Total		75 Marks

PAPER: GE-6

DigitalForensics

Credits:4

Learning Objectives: After studying this paper the students will know –

- a. *The basics of digitalforensics.*
- b. *The cases which fall under the purview of digitalcrimes.*
- c. *The types of digitalcrimes.*
- d. *The elements involved in investigation of digitalcrimes.*

Unit 1: Fundamentals and Concepts

Fundamentals of computers Hardware and accessories – development of hard disk, physical construction, CHS and LBA addressing, encoding methods and formats. Memory and processor. Methods of storing data. Operating system. Software. Introduction to network, LAN, WAN and MAN.

Unit 2: Computer Crimes

Definition and types of computer crimes. Distinction between computer crimes and conventional crimes. Reasons for commission of computer crimes. Breaching security and operation of digital systems.

Computer virus, and computer worm – Trojan horse, trap door, super zapping, logic bombs. Types of computer crimes – computer stalking, pornography, hacking, crimes related to intellectual property rights, computer terrorism, hate speech, private and national security in cyber space.

An overview of hacking, spamming, phishing and stalking.

Unit 3: Computer Forensics Investigations

Seizure of suspected computer. Preparation required prior to seizure.

Protocol to be taken at the scene. Extraction of information from the hard disk.

Treatment of exhibits. Creating bitstream of the original media. Collection and seizure of magnetic media. Legal and privacy issues. Examining forensically sterile media. Restoration of deleted files. Password cracking and E-mail tracking. Encryption and decryption methods. Trackingusers.

Practicals

Credits:2

1. To identify, seize and preserve digital evidence from crimescenes.
2. To detect deletions, obliterations and modifications of files using encasesoftware.
3. To trace routes followed by e-mails andchats.
4. To identify the IP address of the sender ofe-mails.
5. To demonstrate concealment techniques using cryptographicPGP.
6. To identify encryptedfiles.
7. To identify hiddenfiles.
8. To use digital signatures for securing e-mail and onlinetransactions.
9. To acquire data from PCs/laptops/HDDs/USBs, pen drives, memory cards and SIM cards.
10. To use symmetric and asymmetric keys for protection of digitalrecord.
11. To carry out imaging of harddisks.

Suggested Readings

1. R.K. Tiwari, P.K. Sastry and K.V. Ravikumar, *Computer Crimes and Computer Forensics*, Select Publishers, New Delhi (2003).
2. C.B. Leshin, *Internet Investigations in Criminal Justice*, Prentice Hall, New Jersey(1997).
3. R. Saferstein, *Criminalistics*, 8th Edition, Prentice Hall, New Jersey(2004).
4. E. Casey, *Digital Evidence and Computer Crime*, Academic Press, London (2000).

Teaching Learning Methodology
