## **Vision and Mission**

### **Vision**

To provide access to quality higher education, ensuring equity, to create a vibrant knowledge capital and to create inspiring leaders of tomorrow who can take this country to the forefront of the developed nations.

### **Mission**

- To achieve academic excellence and global competencies among students.
- To create an environment for the generation of new knowledge through meaningful research, adopting latest methods of pedagogy and incorporating modern principles of academics integrated with highest ethical standards.
- To extend the knowledge acquired and new knowledge generated for the development of the community.

## Preface

Yenepoya University, the first Deemed University (recognized under Section 3(A) of the UGC Act 1956) in Dakshina Kannada district was established in 2009. The university Consists of four constituent colleges under its ambit namely Yenepoya Medical College, Yenepoya Dental College, Yenepoya Nursing College and Yenepoya Physiotherapy College. The institutions ensure high standards of academic performance and are rendering quality health care services.

The aims of nursing profession is to render quality healthcare to all needy people and nursing education aims at creating a new generation of nurses who are competent to meet the emerging nursing challenges in the hospital environment and community environment through quality education. There are a number of educational paths to become a professional nurse, which vary greatly worldwide, but all involve extensive study of nursing theory and practice as well as training in clinical skills. The minimum standard requirements for entry in to nursing practice is determined by the nursing council of India.

The Indian Nursing Council is a National regulatory body that maintains uniform standards in Nursing Education and prescribes the syllabus and regulations for various nursing programs in India. Considering the recommendations of Indian Nursing Council, the syllabus for M.Sc Nursing have been revised at par with the current developments and trends in the nursing profession after proper discussions at the levels of Board of Studies, Faculty and Academic Council.

I hope the revamping of syllabus will help the students to update and expand their knowledge to a great extent. The academic transaction is now going to be shifted from conventional methods to e-learning from 2015 onwards. I congratulate and appreciate the efforts put by the faculty of nursing in the revision of curriculum.

**Dr. M. Vijaya Kumar**  
*Vice Chancellor*  
*Yenepoya University*

# Philosophy : M.Sc Nursing Course

(Adapted from Indian Nursing Council)

National Health Policy(NHP) 2002 emphasizes the need to prepare nurses to function in super-specialty areas who are required in tertiary care institutions, entrusting some limited public health functions to nurses after providing adequate training, and increase the ratio of degree holding vis a vis diploma holding nurses. It is observed that there is an acute shortage of nursing faculty in under graduate and post graduate nursing programme in India

**Indian Nursing Council believes that,**

Post Graduate programme is essential to prepare nurses to improve the quality of nursing education and practice in India.

Post graduate programme in nursing builds upon and extends competence acquired at the graduate levels, emphasizes application of relevant theories into nursing practice, education, administration and development of research skills.

The programme prepares nurses for leadership position in nursing and health fields who can function as nurse specialists, consultants, educators, administrators and researchers in a wide variety of professional settings in meeting the National priorities and the changing needs of the society.

This programme provides the basis for the post masteral programme in nursing. Further the programme encourages accountability and commitment to lifelong learning which fosters improvement of quality care.

## Aims

### (Adapted from Indian Nursing Council)

The aim of the postgraduate program in nursing is to prepare graduates to assume responsibilities as nurse specialists, consultants, educators, administrators in a wide variety of professional settings.

## Objectives

On completion of the two year M.Sc Nursing programme, the graduate will be able to,

- utilize/apply the concepts, theories and principles of nursing science
- demonstrate advance competence in practice of nursing
- practice as a nurse specialist.
- demonstrate leadership qualities and function effectively as nurse educator and manager.
- demonstrate skill in conducting nursing research, interpreting and utilizing the findings from health related research.
- demonstrate the ability to plan and effect change in nursing practice and in the health care delivery system.
- establish collaborative relationship with members of other disciplines
- demonstrate interest in continued learning for personal and professional advancement.

# Regulations

## 1. Title of the course

The course is titled as Master of Science in Nursing (with area of specialization) M Sc. (N)

## 2. Eligibility criteria

- a. The candidate should be a Registered Nurse and Registered midwife or equivalent with any State Nursing Registration Council.
- b. The Minimum education requirements shall be the passing of B.Sc. Nursing/B.Sc. Hons. Nursing/ Post Basic B.Sc. Nursing with minimum of 55% aggregate marks. 5% relaxation of marks for SC/ST candidates may be given
- c. The candidate should have undergone B.Sc Nursing / Post Basic B.Sc Nursing. B.Sc Hons. Nursing in an institution which is recognized by Indian Nursing Council.
- d. Minimum one year of work experience after Basic B.Sc. Nursing or prior or after Post Basic B.Sc. Nursing.
- e. Simultaneous attendance in multiple courses is not permitted
- f. Student should be medically fit male or female

## 3. Entrance/Selection test

Selection of candidates is based on marks scored in the entrance examination conducted by the university

## 4. Annual intake

Students are admitted once a year. The annual intake for the course is twenty five (25), Five (5) in each specialty as sanctioned by Indian Nursing Council (INC).

## 5. Duration

Duration of the course is two years

## 6. Commencement of the course

The college academic year commences in the month of August.

## 7. Medium of instruction

English is the medium of instruction for all the subjects of study and for examinations of the Master of Science in Nursing.

## 8. The syllabus

The syllabus for the course is designed based on the requirements prescribed by Indian Nursing Council.

Syllabus enrichment is done based on the recommendations of Board of studies from time to time and subjecte to the approval of the Academic Council of the University.

**9. Attendance**

A candidate must have a minimum 80% attendance in theory and practical, in each subject, for appearing for examinations, irrespective of the kind of absence she/he may have had. There shall be no condonation for any leave for any reason, including pregnancy, child birth, or medical conditions of any nature. For the degree to be awarded, 100% attendance in each practical/clinics is mandatory.

**10. Clinical experience**

In order to provide hands on skills as part of the curriculum the students will have to undergo the clinical experience in the multispecialty medical college hospital as well as in rural health centers attached to Yenepoya University. In addition, the students will undergo the clinical experience in chosen specialty area in selected hospitals. The students will undergo two weeks of educational visits. The students have to maintain log book for each activity during the course of study.

**11. Conduct of university examinations**

The university examinations will be conducted at the end of each academic year

**12. Internal Assessment Marks**

- a. Internal Assessment Marks (IA) for theory is calculated based on the sessional examination, model examination, and Continuous Comprehensive Assessment (CCA) consisting of unit tests, assignments, presentations, project work and group work etc.
- b. Internal Assessment Marks (IA) for practical is calculated based on the model practical examination and Continuous Comprehensive Assessment (CCA) consisting of clinical presentations and patient care assignments.
- c. A candidate shall secure at least 50% of marks in internal assessments to be eligible to appear in the University examination.

**13. Marks qualifying for pass**

- a. A candidate has to pass in theory and practical exam separately in each subject.
- b. Minimum pass marks shall be 50% in each of the theory and practical papers separately.
- c. The theory component consists of marks obtained in University written paper(s) and internal assessment (IA). For a pass in theory, a candidate shall secure not less than 50% marks in written examination and IA separately. For a pass in practical examination, a candidate, shall secure not less than 50% marks in university practical examination and IA separately.
- d. A candidate not securing 50% marks in theory or practical examination in a subject shall be declared to have failed in that subject and is required to appear for both theory and practical again in the subsequent examination in that subject.
- e. Maximum of 5 grace marks for each subject is not permitted, and grace marks should not exceed 5 marks in total marks for one academic year in theory paper only.
- f. Classification of results:
  - 50% pass in each of the theory and practical separately
  - 50-59% Second division
  - 60-74% first division
  - 75% and above is distinction
  - For declaring the rank aggregate of 2 years marks to be considered

**14. Dissertation**

In partial fulfillment of the course, the post graduate student is required to submit the dissertation to the university. The dissertation to be undertaken with the expert guidance of the nursing faculty (guide/co-guide) in the same clinical specialty holding Ph.D/M.Phil/M.sc Nursing with a minimum of 3 years experience in teaching in the post graduate programme in nursing. Administrative approval and ethical clearanceto be obtained before undertaking the study. Evaluation of the dissertation should be done by the examiner prior to viva voce . The viva voce should be conducted minimum 30 minutes per student.

## Tentative Schedule for dissertation

S. No.	Activities	Scheduled Time
1.	Submission of the research proposal	End of 9 <sup>th</sup> month of 1 <sup>st</sup> academic year
2.	Final Submission of dissertation	End of 9 <sup>th</sup> month of 2 <sup>nd</sup> academic Year
3.	Submission of dissertation with fine	End of 10 <sup>th</sup> month of 2 <sup>nd</sup> academic Year

Note : Administrative approval, institute scientific review board approval and ethical clearance from ethics committee, Yenepoya University should be obtained. Evaluation of the dissertation is done by the appointed examiners by the university prior to the viva-voce as part of the university examination.

**15. Practical examination**

- a. One internal and one external examiner appointed by the university will jointly conduct the practical examination for each student.
- b. Practical examinations for clinical specialty (4 hours) are held in the respective clinical areas. External examiner shall be a Nursing faculty / nursing expert in the same clinical specialty holding Ph.D/M.Phil/ M.Sc.Nursing with a minimum of 3 years experience in guiding the research projects for Post Graduate students of nursing.
- c. As part of practical examination for the nursing education subject, the student shall conduct the micro teaching. An examiner should be a lecturer or above in a college of nursing with M.Sc. (N) in the concerned subject with minimum of 3 years of teaching experience.
- d. As part of the practical examination for dissertation, the student shall attend the viva voce (minimum 30 minutes per student). The internal examiner shall be the guide and the external examiner shall be the examiner appointed by the University for Clinical Specialty.
- e. Maximum number of candidates for practical examination may not exceed 10 per day.

**16. Carryover of failed subjects**

Candidate, who fails in any subject, shall be permitted to continue the studies into the second year. However, the candidate shall not be allowed to appear for the Second year examination till such time that he/she passes all subjects of the first year M.Sc nursing examination. If the candidate fails in either practical or theory paper he/she has to re- appear for both the papers (theory and practical). The maximum period to complete the course successfully should not exceed 4 years.

**17. Revaluation / retotaling of answer papers**

Revaluation of answer papers is not permitted. Only re-totaling of theory answer papers is allowed in the failed subjects. Application for the same should be through the institution, within 10 days from the date of announcement of results.

**19. Vacation**

The students shall avail the declared vacation in the academic year as per the course plan.

**20. Dress code**

The students of the course have to follow the dress code as prescribed by the institution for regular classes as well as during the clinical posting.

**21. Health services**

On admission, students will undergo a routine medical examination, and thereafter, annually. Free medical care during illness and/provision of health insurance is available. A complete health record is kept in respect of each individual student. The question of continuing the training of a student with long term chronic illness will be decided by the college. Vaccination against Hepatitis B, Tetanus and other communicable disease is provided, as deemed necessary.

**22. Curbing the menace of ragging in the campus**

Ragging has been declared as a *criminal offence* by the Supreme Court of India. Hence, any act of such kind within the campus is punishable by the law. On admission, every student and his/her parents have to file an **affidavit** avowing not to indulge in ragging.

**23. Hostel facilities**

Separate hostels are provided for men and women within the campus. All the rooms are well furnished and well equipped. The hostels have facilities to cater both vegetarian & non-vegetarian students. The hostels are provided with basic amenities, mess, TV room, recreation room, basketball & volleyball courts, and visitors area. Each hostel is managed by a Chief Warden and two Assistant Wardens.

## NURSING EDUCATION

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 150

Total : 300

### Course Description

This course is designed to assist students to develop a broad understanding of fundamental principles, concepts, trends and issues related to education and nursing education. Further, it would provide opportunity to students to understand, appreciate and acquire skills in teaching and evaluation, curriculum development, implementation, maintenance of standards and accreditation of various nursing educational programs.

### Objectives

At the end of the course, the students will be able to,

1. explain the aims of education, philosophies, trends in education and health : its impact on nursing education
2. describe the teaching learning process
3. prepare and utilize various instructional media and methods in teaching learning process
4. demonstrate competency in teaching using various instructional strategies
5. critically analyze the existing nursing educational programs, their problems, issues and future trends
6. describe the process of curriculum development, the need and methodology of curriculum change, innovation and integration
7. plan and conduct continuing nursing education programs
8. critically analyze the existing teacher preparation programs in nursing
9. demonstrate skill in guidance and counseling
10. describe the problems and issues related to administration of nursing curriculum including selection and organization of clinical experience
11. explain the development of standards and accreditation process in nursing education programs
12. identify research priorities in nursing education
13. discuss various models of collaboration in nursing education and services
14. explain the concept, principles, steps, tools and techniques of evaluation
15. construct, administer and evaluate various tools for assessment of knowledge, skill, and attitude

Units	Hours		Course Content

### Activities

- Framing philosophy, aims and objectives
- Lesson planning
- Micro teaching-2
- Conduct practice teachings using different teaching strategies -10 (Like lecture cum discussion, demonstration- lab method, field trip, seminars, project, role play, panel discussion, clinical methods etc.)
- Preparation and utilization of instructional aids using different media
- Develop course plans, unit plans, rotation plans
- Conduct a continuing education workshop
- Annotated bibliography
- Critical evaluation of any nursing education program offered by a selected institution
- Planning and organizing field visits
- Educational visits
- Field visits (INC/SNRC) to get familiar with recognition/registration process.
- Construct, administer and evaluate tools (objective & essay type test, observation checklist, rating scale etc.)
- Observe and practice application of various non-standardized tests (intelligence, aptitude, personality, sociometry, physical & mental disabilities tests.)

### Methods of Teaching

- Lecture cum discussion
- Demonstration/ Return demonstration
- Seminar / Presentations
- Project work
- Field visits
- Workshop

### Methods of evaluation

- Tests
- Presentation
- Project work
- Written assignments

# ADVANCED NURSING PRACTICE

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 200

Total : 350

## Course Description

The course is designed to develop an understanding of concepts and constructs of theoretical basis of advance nursing practice and critically analyze different theories of nursing and other disciplines.

## Objectives

At the end of the course the students will be able to,

1. appreciate and analyze the development of nursing as a profession
2. describe ethical, legal, political and economic aspects of health care delivery and nursing practice
3. explain bio- psycho- social dynamics of health, life style and health care delivery system
4. discuss concepts, principles, theories, models, approaches relevant to nursing and their application
5. describe scope of nursing practice
6. provide holistic and competent nursing care following nursing process approach
7. identify latest trends in nursing and the basis of advance nursing practice
8. perform extended and expanded role of nurse
9. describe alternative modalities of nursing care
10. describe the concept of quality control in nursing
11. identify the scope of nursing research
12. use computer in patient care delivery system and nursing practice
13. appreciate importance of self development and professional advancement

## Course Content

Units	Hours		Course Content
	Theory	Practical	
I	10		<p><b>Nursing as a profession</b></p> <ul style="list-style-type: none"> <li>• History of development of nursing profession, Characteristics, criteria of the profession, perspective of nursing profession-national, global</li> <li>• Code of ethics (INC) code of professional conduct (INC), autonomy and accountability, assertiveness, visibility nurses, legal considerations</li> <li>• Role of regulatory bodies</li> <li>• Profession organizations and unions-self defense, individual and collective bargaining</li> <li>• Educational preparations, continuing education, career opportunities, professional advancement &amp; role and scope of nursing education</li> <li>• Role of Research, Leadership and Management</li> <li>• Futuristic Nursing : Quality assurance in Nursing</li> </ul>

Units	Hours		Course Content
	Theory	Practical	
II	05		<p><b>Health care delivery</b></p> <ul style="list-style-type: none"> <li>• Health care environment, economics, constraints, planning process, policies, political process vis a vis nursing profession</li> <li>• Health care delivery system- national, state, district and local level</li> <li>• Major stakeholders in the health care system-Government, non-govt, Industry and other professionals</li> <li>• Patterns of nursing care delivery in India</li> <li>• Health care delivery concerns, national health and family welfare programs, inter-sectoral coordination, role of non-governmental agencies</li> <li>• Information, education and communication (IEC)</li> <li>• Tele-medicine</li> </ul>
III	10		<p><b>Genetics</b></p> <ul style="list-style-type: none"> <li>• Review of cellular division, mutation and law of inheritance, human genome project, The Genomic era</li> <li>• Basic concepts of Genes, Chromosomes &amp; DNA</li> <li>• Approaches to common genetic disorders</li> <li>• Genetic testing – basis of genetic diagnosis, Pre symptomatic and predisposition testing, Prenatal diagnosis &amp; screening</li> <li>• Ethical, legal &amp; psychosocial issues in genetic testing</li> <li>• Genetic counseling</li> <li>• Practical application of genetics in nursing</li> </ul>
IV	10	40	<p><b>Epidemiology</b></p> <ul style="list-style-type: none"> <li>• Scope, epidemiological approach and methods,</li> <li>• Morbidity, mortality</li> <li>• Concepts of causation of diseases and their screening</li> <li>• Application of epidemiology in health care delivery, Health surveillance and health informatics</li> <li>• Role of nurse</li> </ul>
V	20	40	<p><b>Bio-Psycho social pathology</b></p> <ul style="list-style-type: none"> <li>• Pathophysiology and Psychodynamics of disease causation</li> <li>• Life processes, homeostatic mechanism, biological and psycho-social dynamics in causation of disease, life style</li> <li>• Common problems: Oxygen insufficiency, fluid and electrolyte imbalance, nutritional problems, hemorrhage and shock, altered body temperature, unconsciousness, sleep pattern and its disturbances, pain, sensory deprivation</li> <li>• Treatment aspects : pharmacological and pre- post operative care aspects</li> </ul>

Units	Hours		Course Content
	Theory	Practical	
			<ul style="list-style-type: none"> <li>• Cardio pulmonary resuscitation</li> <li>• End of life Care</li> <li>• Infection prevention (including HIV) and standard safety measures, bio-medical waste management</li> <li>• Role of nurse-Evidence based nursing practice, Best practices</li> <li>• Innovations in nursing</li> </ul>
<b>VI</b>	<b>20</b>	<b>40</b>	<p><b>Philosophy and theories of nursing</b></p> <ul style="list-style-type: none"> <li>• Values, Conceptual models, approach</li> <li>• Nursing theories: Nightingale's, Henderson's, Roger's, Peplau's, Abdella's, Lewine's, Orem's, Johnson's, King's,</li> <li>• Neuman's, Roy's, Watson Parsce, Orlando, Wiedenbach maternal role attainment theory, Humanistic theories, Jean Waston, Patricia Benner, The modeling and role modeling theory, Leningers, Health Belief model, Health promotion model, communication, Rosemarie Rizo Parse and management etc and their applications</li> <li>• Health belief models, communication and management, etc</li> <li>• Concept of Self health</li> <li>• Evidence based practice model</li> </ul>
<b>VII</b>	<b>10</b>	<b>80</b>	<p><b>Nursing process approach</b></p> <ul style="list-style-type: none"> <li>• Health assessment-illness status of patients/clients (Individuals, family, community), identification of health-illness problems, health behaviors, signs and symptoms of clients</li> <li>• Methods of collection, analysis and utilization of data relevant to nursing process</li> <li>• Formulation of nursing care plans, health goals, implementation, modification and evaluation of care.</li> </ul>
<b>VIII</b>	<b>30</b>	<b>36</b>	<p><b>Psychological aspects and Human relations</b></p> <ul style="list-style-type: none"> <li>• Human behavior, Life processes &amp; growth and development, personality development, defense mechanisms</li> <li>• Communication, interpersonal relationships, individual and group, group dynamics, and organizational behavior</li> <li>• Basic human needs, Growth and development, (Conception through preschool, School age through adolescence, Young &amp; middle adult, and older adult)</li> <li>• Sexuality and sexual health</li> <li>• Stress and adaptation, crisis and its intervention</li> <li>• Coping with loss, death and grieving</li> <li>• Principles and techniques of Counseling</li> </ul>
<b>IX</b>	<b>10</b>	<b>40</b>	<p><b>Nursing practice</b></p> <ul style="list-style-type: none"> <li>• Framework, scope and trends</li> <li>• Alternative modalities of care, alternative systems of health</li> </ul>

Units	Hours		Course Content
	Theory	Practical	
			and complimentary therapies <ul style="list-style-type: none"> <li>• Extended and expanded role of the nurse, in promotive, preventive, curative and restorative health care delivery system in community and institutions</li> <li>• Health promotion and primary health care</li> <li>• Independent practice issues-Independent nurse-midwifery practitioner</li> <li>• Collaboration issues and models-within and outside nursing</li> <li>• Models of prevention</li> <li>• Family nursing, Home nursing</li> <li>• Gender sensitive issues and women empowerment</li> <li>• Disaster nursing</li> <li>• Geriatric considerations in nursing</li> <li>• Evidence based nursing practice- Best practices</li> <li>• Trans-cultural nursing</li> </ul>
<b>X</b>	<b>25</b>	<b>24</b>	<b>Computer applications for patient care delivery system and nursing practice</b> <ul style="list-style-type: none"> <li>• Use of computers in teaching, learning, research and nursing practice</li> <li>• Windows, MS office, Word, Excel, Power Point</li> <li>• Internet, literature search</li> <li>• Statistical packages</li> <li>• Hospital management information system : softwares</li> </ul>

**Practical**

Clinical posting in the following areas

- Specialty area- in-patient unit- 2 weeks
- Community health center/PHC- 2 weeks
- Emergency/ICU- 2 weeks

**Activities**

- Prepare case studies with nursing process approach and theoretical basis
- Presentation of comparative picture of theories
- Family case- work using model of prevention
- Annotated bibliography
- Report of field visits (5)

**Methods of Teaching**

- Lecture cum discussion
- Seminar

- Panel discussion
- Debate
- Case presentations
- Exposure to scientific conferences
- Field visits

### **Methods of evaluation**

- Tests
- Presentation
- Seminar
- Written assignments

### **Advance nursing Procedures**

Definition, Indication and nursing implications;

- CPR, TPN, Hemodynamic monitoring, Endotracheal intubation, Tracheostoma, mechanical ventilation, Pacemaker, Hemodialysis, Peritoneal dialysis, LP, BT Pleural and abdominal paracentesis, OT techniques, Health assessment, Triage, Pulse oxymetry

# NURSING RESEARCH AND BIOSTATISTICS

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 100

Total : 250

## Part-A : Nursing Research

Theory : 100

Practical : 50

Total : 150

### Course Description

This course is designed to assist the students to acquire an understanding of the research methodology and statistical methods as a basis for identifying research problem, planning and implementing a research plan. It will further enable the students to evaluate research studies and utilize research findings to improve quality of nursing practice, education and management.

### Objectives

At the end of the course, the students will be able to,

1. define basic research terms and concepts
2. review literature utilizing various sources
3. describe research methodology
4. develop a research proposal
5. conduct a research study
6. communicate research findings
7. utilize research findings
8. critically evaluate nursing research studies
9. write scientific paper for publication

Units	Hours		Course Content
	Theory	Practical	
I	10		<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Basic research terminologies</li> <li>• Historical Evolution of research in nursing</li> <li>• Methods acquiring knowledge                             <ul style="list-style-type: none"> <li>▪ problem solving and scientific method</li> </ul> </li> <li>• Research definition, characteristics, purposes, kinds /types of research</li> <li>• Scope of nursing research                             <ul style="list-style-type: none"> <li>▪ areas, problems, characteristics in nursing, health and social research</li> </ul> </li> <li>• Concept of evidence based practice</li> <li>• Ethics in research</li> <li>• Overview of research process</li> </ul>

Units	Hours		Course Content
	Theory	Practical	
II	5	5	<b>Review of Literature</b> <ul style="list-style-type: none"> <li>• Importance, purposes, sources, criteria for selection of resources and steps in reviewing literature</li> </ul>

			<ul style="list-style-type: none"> <li>• Tools for data collection                             <ul style="list-style-type: none"> <li>▪ Types</li> <li>▪ Characteristics and their development</li> </ul> </li> <li>• Validity and reliability of tools</li> <li>• Procedure for data collection</li> </ul>
<b>IX</b>	<b>5</b>		<b>Implementing research plan</b> <ul style="list-style-type: none"> <li>• Pilot Study</li> <li>• Review research plan (design)</li> <li>• Planning for data collection</li> <li>• Administration of tool /interventions</li> <li>• Collection of data</li> </ul>
<b>X</b>	<b>10</b>	<b>10</b>	<b>Analysis and interpretation of data</b> <ul style="list-style-type: none"> <li>• Plan for data analysis quantitative and qualitative</li> <li>• Preparing data for computer analysis and presentation</li> <li>• Statistical analysis</li> <li>• Interpretation of data</li> <li>• Conclusion and generalizations</li> <li>• Summary and discussion</li> </ul>
<b>XI</b>	<b>10</b>		<b>Reporting and utilizing research findings</b> <ul style="list-style-type: none"> <li>• Communication of research results                             <ul style="list-style-type: none"> <li>▪ Oral and written</li> </ul> </li> <li>• Writing research report                             <ul style="list-style-type: none"> <li>▪ Purposes</li> <li>▪ Methods and style - Vancouver, American Psychological Association(APA)</li> <li>▪ Campbell etc</li> </ul> </li> <li>• Writing scientific articles for publication                             <ul style="list-style-type: none"> <li>▪ Purposes &amp;Style</li> <li>▪ Purposes &amp;Style</li> </ul> </li> </ul>
<b>XII</b>	<b>3</b>	<b>8</b>	<b>Critical analysis of research reports and articles</b>

### **Activities**

- Annotated Bibliography of research reports and articles
- Review of literature of selected topic and reporting
- Formulation of problem statement, objective and hypothesis
- Developing theoretical/conceptual framework
- Preparation of a sample research tool
- Analysis and interpretation of given data
- Developing and presenting research proposal
- Journal club presentation
- Critical evaluation of selected research studies
- Writing a scientific paper

### **Method of Teaching**

- Lecture-cum-discussion
- Seminar/Presentations
- Project
- Class room exercises
- Journal club

### **Methods of Evaluation**

- Quiz, Tests (Term)
- Assignments/Term paper
- Presentations
- Project work

**Part - B : Biostatistics**

Hours of Instruction

Theory : 50

Practical : 50

Total : 100

**Course Description**

At the end of the course, the students will be able to develop an understanding of the statistical methods and apply them in conducting research studies in nursing.

**Objectives**

At the end of the course the students will be able to,

1. explain the basic concepts related to statistics
2. describe the scope of statistics in health and nursing
3. organize, tabulate and present data meaningfully
4. use descriptive and inferential statistics to predict results
5. draw conclusions of the study and predict statistical significance of the results
6. describe vital health statistics and their use in health related research
7. use statistical packages for data analysis

Units	Hours		Course Content
	Theory	Practical	
I	8	4	<b>Introduction</b> <ul style="list-style-type: none"> <li>• Definition, nature and scope of statistics</li> <li>• Role of statistics in Nursing/health research</li> <li>• Meaning of data, data types, scales of measurement</li> <li>• Population and sample, parameter and statistic</li> <li>• Organization of data–scrutiny and preprocessing</li> <li>• Presentation of data–tables, diagrams/charts and graphs</li> <li>• Frequency table–histogram, frequency curves</li> <li>• Use of Excel and SPSS for data organization &amp;presentation</li> </ul>
II	4	4	<b>Measures of central tendency</b> <ul style="list-style-type: none"> <li>• Concept of central tendency, measures – mean, median and mode</li> <li>• Partition values – quartiles, percentiles, computation and interpretation of the measures</li> </ul>
III	5	7	<b>Measures of variability (dispersion)</b> <ul style="list-style-type: none"> <li>• Concept of dispersion, measures – range, quartile deviation, interquartile range, mean deviation about median, variance, standard deviation, standard error, Coefficient of variation</li> <li>• Computation and interpretation of the different measures</li> <li>• Box plot, Skewness, Kurtosis and related measures</li> <li>• Using of Excel and SPSS for computing summary statistics</li> </ul>

Units	Hours		Course Content
	Theory	Practical	
IV	3	3	<b>Probability</b> <ul style="list-style-type: none"> <li>• Basic concepts of probability</li> <li>• Sampling – basic concepts, probability sampling v/s non probability sampling, simple, stratified and systematic sampling methods</li> <li>• sample size determination infinite population (survey studies)</li> <li>• Normal distribution – properties and application</li> </ul>
V	7	10	<b>Measures of relationship</b> <ul style="list-style-type: none"> <li>• Correlation and regression scatter plot, Pearson's Product Moment Correlation, Spearman's rank correlation</li> <li>• Regression model – simple linear regression, fitting and prediction</li> <li>• Use of Excel and SPSS</li> </ul>
VI	9	10	<b>Inferential statistics</b> <ul style="list-style-type: none"> <li>• Concept of hypothesis, null and alternative hypothesis, type I and type II errors, p – value, statistical significance</li> <li>• <b>Parameter tests:</b> z test, t test – paired and independent, F- test for testing equality of variances</li> <li>• <b>Nonparametric tests:</b> sign test, median test, Wilcoxon signed rank test, Mann – Whitney test, Chi square test</li> <li>• One way analysis of variance (ANOVA), Sample size determining</li> <li>• Use of Excel and SPSS</li> </ul>
VII	5	3	<b>Design of experiments</b> <ul style="list-style-type: none"> <li>• Basic concepts, Completely Randomized Design (CRD), Randomized Block Design (RBD), Latin Square Design (LSD)- applications</li> </ul>
VIII	5	6	<b>Use of statistical methods in psychology &amp; education</b> <ul style="list-style-type: none"> <li>• Scaling – Z score, Z scaling</li> <li>• Standard Score and T score</li> <li>• <b>Reliability of test scores:</b> test retest method, parallel forms, split half method</li> <li>• Validation of research tools, Kappa statistics</li> </ul>
IX	4	3	<b>Population Statistics</b> <ul style="list-style-type: none"> <li>• Rates, Ratios and trends</li> <li>• <b>Measurement of fertility:</b> Crude Birth Rate, Standardized Birth Rate, fertility, fecundity</li> <li>• <b>Measuring mortality:</b> Death Rate, Age Specific Death Rate (ASDR), Infant Mortality Rate (IMR)</li> </ul>

#### Activities

- Exercises on organization and tabulation of data
- Graphical and tabular presentation of data

- Calculation of descriptive and inferential statistics (chi square, t test, correlation)
- Practice in using statistical package
- Computing vital health statistics

### **Methods of Teaching**

- Lecture-cum-discussion
- Demonstration –on data organization, tabulation, calculation of statistics, use of statistical package, Classroom exercises, organization and tabulation of data
- Computing descriptive and inferential statistics; vital and health statistics and use of computer for data entr and analysis using statistical package.

### **Methods of Evaluation**

- Test, Classroom, statistical exercises.

## CLINICAL SPECIALITY – I MEDICAL SURGICAL NURSING

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 660

Total : 810

### Course Description

This course is common for the students undergoing clinical specialty-II in Neuro Science Nursing/ Cardiovascular & Thoracic Nursing/Critical Care Nursing/Oncology Nursing/Orthopedic and Rehabilitation Nursing/Nephro & Urology Nursing, Gastroenterology Nursing/ Geriatric Nursing.

It is designed to assist students in developing expertise and in depth knowledge in the field of Medical Surgical Nursing. It will help students to appreciate the patient as a holistic individual and develop skill to function as a specialized Medical-Surgical Nurse. It will further enable the student to function as educator, manager and researcher in the field of Medical–Surgical Nursing.

### Objectives

At the end of the course the students will be able to,

1. appreciate the trends & issues in the field of Medical Surgical Nursing as a specialty
2. apply concepts & theories related to health promotion
3. appreciate the client as a holistic individual
4. perform physical, psychosocial assessment of Medical Surgical patients
5. apply Nursing process in providing care to patients
6. integrate the concept of family centered nursing care with associated disorder such as genetic, congenital and long-term illness
7. recognize and manage emergencies with Medical Surgical patients
8. describe various recent technologies & treatment modalities in the management of critically ill patients
9. appreciate the legal & ethical issues relevant to Medical Surgical Nursing
10. prepare a design for layout and management of Medical Surgical Units
11. appreciate the role of alternative systems of Medicine in care of patients
12. incorporate evidence based Nursing practice and identifies the areas of research in the field of Medical– Surgical Nursing
13. recognize the role of Nurse practitioner as a member of the Medica Surgical health team
14. teach Medical Surgical Nursing to undergraduate nursing students & in service nurses

### Course Content

## CLINICAL SPECIALTY – I

### OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 660

Total : 810

**Course Description**

This course is designed to assist students in developing expertise and in-depth understanding in the field of Obstetric and Gynaecological Nursing. It will help students to appreciate the client as a holistic individual and develop skill to function as an independent midwifery practitioner. It will further enable the student to function as educator, manager, and researcher in the field of Obstetric and Gynaecological Nursing.

**Objectives**

At the end of the course the students will be able to,

1. appreciate the trends in the field of midwifery, obstetrics and gynaecology as a specialty
2. describe the population dynamics and indicators of maternal and child health
3. describe the concepts of biophysical, psychological and spiritual aspects of normal pregnancy, labor and puerperium
4. provide comprehensive nursing care to women during reproductive period and newborns
5. integrate the concepts of family centered nursing care and nursing process approach in obstetric and gynaecological nursing
6. identify and analyze the deviations from normal birth process and refer appropriately
7. describe the pharmacological agents, their effects during pregnancy, child birth, puerperium, lactation and the role of nurse
8. counsel adolescents, women and families on issues pertaining to pregnancy, child birth and lactation
9. describe the role of various types of complementary and alternative therapies in obstetric and gynaecological nursing
10. incorporate evidence based nursing practice and identify the areas of research in the field of obstetric and gynaecological nursing
11. describe the recent advancement in contraceptive technology and birth control measures
12. appreciate the legal and ethical issues pertaining to obstetric and gynaecological nursing

Units	Hours	Course Content

**CLINICAL SPECIALTY – I**  
**CHILD HEALTH NURSING**

Placement : I Year

Hours of Instruction

Theory : 150

Practical : 660

Total : 810

**Course Description**

This course is designed to assist students in developing expertise and in-depth understanding in the field of Pediatric Nursing. It will help students to appreciate the child as a holistic individual and develop skill to function as neonatal and pediatric nurse specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

**Objectives**

At the end of the course the students will be able to,

1. appreciate the history and developments in the field of pediatrics and pediatric nursing as a specialty
2. apply the concepts of growth and development in providing care to the pediatric clients and their families.
3. appreciate the child as a holistic individual
4. perform physical, developmental, and nutritional assessment of pediatric clients
5. apply nursing process in providing nursing care to neonates & children
6. integrate the concept of family centered pediatric nursing care with related areas such as genetic disorders, congenital malformations and long term illness.
7. recognize and manage emergencies in neonates
8. describe various recent technologies and treatment modalities in the management of high risk neonates
9. appreciate the legal and ethical issues pertaining to pediatric and neonatal nursing
10. prepare a design for layout and management of neonatal units
11. incorporate evidence based nursing practice and identify the areas of research in the field of pediatric/neonatal nursing
12. recognize the role of pediatric nurse practitioner and as a member of the pediatric and neonatal health team
13. teach pediatric nursing to undergraduate students & in-service nurses

### PRACTICALS

1. Prepare prototype personal files for staff nurses, faculty and cumulative records
2. Preparation of budget estimate, Revised estimate and performance budget
3. Plan and conduct staff development programme
4. Preparation of Organisation Chart
5. Developing nursing standards/protocols for various units
6. Design a layout plan for speciality units /hospital, community and educational institutions
7. Preparation of job description of various categories of nursing personnel
8. Prepare a list of equipments and supplies for specialty units
9. Assess and prepare staffing requirement for hospitals, community and educational institutions
10. Plan of action for recruitment process
11. Prepare a vision and mission statement for hospital, community and educational institutions
12. Prepare a plan of action for performance appraisal
13. Identify the problems of the specialty units and develop plan of action by using problem solving approach
14. Plan a duty roster for specialty units/hospital, community and educational institutions
15. Prepare: anecdotes, incident reports, day and night reports, handing and taking over reports, enquiry reports, nurses notes, official letters, curriculum vitae, presentations etc
16. Prepare a plan for disaster management
17. Group work
18. Field appraisal report

**CLINICAL SPECIALITY – II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALITY – CARDIO VASCULAR AND THORACIC NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 950

Total : 1100

**Course Description**

This course is designed to assist students in developing expertise and in-depth understanding in the field of cardiovascular and thoracic nursing. It will help students to develop advanced skills for nursing intervention in various cardio medical and surgical conditions. It will enable the student to function as cardio vascular and thoracic nurse practitioner/specialist. It will further enable the student to function as educator, manager and researcher in the field of cardio vascular and thoracic nursing.

**Objectives**

At the end of the course the students will be able to,

1. appreciate trends and issues related to cardio vascular and thoracic Nursing
2. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of cardio vascular and thoracic conditions
3. participate in national health programs for health promotion, prevention and rehabilitation of patients with cardio vascular and thoracic conditions
4. perform physical, psychosocial & spiritual assessment
5. assist in various diagnostic, therapeutic and surgical procedures
6. apply nursing process in providing comprehensive care to patients with cardio vascular and thoracic conditions
7. demonstrate advance skills/competence in managing patients with cardio vascular and thoracic conditions including Advance Cardiac Life Support
8. describe the various drugs used in cardio vascular and thoracic conditions and nurses responsibility
9. demonstrate skill in handling various equipments/gadgets used for critical care of cardio vascular and thoracic patients
10. appreciate team work & coordinate activities related to patient care
11. practice infection control measures
12. identify emergencies and complications & take appropriate measures
13. discuss the legal and ethical issues in cardio vascular and thoracic nursing
14. assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
15. appreciate the role of alternative system of medicine in care of patient
16. incorporate evidence based nursing practice and identify the areas of research in the field of cardio vascular and thoracic nursing
17. identify the sources of stress and manage burnout syndrome among health care providers
18. teach and supervise nurses and allied health workers
19. design a layout of ICCU and ICTU and develop standards for cardio vascular and thoracic nursing practice

Units	Hours	Course Content
I	5	<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Historical development, trends and issues in the field of cardiology</li> <li>• Cardio vascular and thoracic conditions – major health problem</li> <li>• Concepts, principles and nursing perspectives</li> <li>• Ethical and legal issues</li> <li>• Evidence based nursing and its application in cardio vascular and thoracic nursing (to be incorporated in all the units)</li> </ul>
II	5	<p><b>Epidemiology</b></p> <ul style="list-style-type: none"> <li>• Risk factors: hereditary, psycho social factors, hypertension, smoking, obesity, diabetes mellitus etc</li> <li>• Health promotion, disease prevention, Life style modification</li> <li>• National health programs related to cardio vascular and thoracic conditions</li> <li>• Alternate system of medicine</li> <li>• Complementary therapies</li> </ul>
III	5	<p><b>Review of anatomy and physiology of cardio vascular and respiratory system</b></p> <ul style="list-style-type: none"> <li>• Review of anatomy and physiology of heart, lung, thoracic cavity and blood vessels. Embryology of heart and lung</li> <li>• Coronary circulation</li> <li>• Hemodynamic and electro physiology of heart</li> <li>• Bio-chemistry of blood in relation to cardio pulmonary function</li> </ul>
IV	20	<p><b>Assessment and diagnostic measures</b></p> <ul style="list-style-type: none"> <li>• History taking</li> <li>• Physical assessment <ul style="list-style-type: none"> <li>▪ Heart rate variability: mechanisms , measurements, pattern, factors, impact of interventions on HRV</li> </ul> </li> <li>• Diagnostic tests <ul style="list-style-type: none"> <li>▪ Hemodynamic monitoring: technical aspects, monitoring, functional hemodynamic indices, ventricular function indices, output measurements (Arterial and Swan Ganz monitoring). Blood gases and its significance, oxygen supply and demand</li> <li>▪ Radiologic examination of the chest: interpretation, chest film findings</li> <li>▪ Electro cardiography (ECG) : electrical conduction through the heart, basic electrocardiography, 12 lead electrocardiogram, axis determination ECG changes in: intraventricular conduction abnormalities- Arrhythmias, ischemia, injury and infarction, atrial and ventricular enlargement, electrolyte imbalance</li> <li>▪ Echocardiography: technical aspects, special techniques, echocardiography of cardiac structures in health and disease, newer techniques</li> <li>▪ Nuclear and other imaging studies of the heart : Magnetic Resonance Imaging</li> <li>▪ Cardio electrophysiology procedures : diagnostic studies, interventional and catheter ablation, nursing care</li> </ul> </li> </ul>

Units	Hours	Course Content
		<ul style="list-style-type: none"> <li>▪ Exercise testing: indications and objectives, safety and personnel, pretest considerations, selection, interpretation, test termination, recovery period</li> <li>▪ Cardiac catheterization: indications, contraindications, patient preparation, procedure, interpretation of data</li> <li>▪ Pulmonary function test: Bronchoscopy and graphies</li> <li>▪ Interpretation of diagnostic measures</li> <li>▪ Nurse's role in diagnostic tests</li> <li>• Laboratory tests using blood : blood specimen collection, cardiac markers, blood lipids, hematologic studies, blood cultures, coagulation studies, arterial blood gases, blood chemistries, cardiac enzyme studies, serum concentration of selected drugs</li> <li>• Interpretation and role of nurse</li> </ul>
V	25	<p><b>Cardiac disorders and nursing management</b></p> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, treatment modalities and nursing management of <ul style="list-style-type: none"> <li>▪ Hypertension</li> <li>▪ Coronary Artery Disease</li> <li>▪ Angina of various types</li> <li>▪ Cardiomegaly</li> <li>▪ Myocardial Infarction, Congestive Cardiac Failure</li> <li>▪ Heart Failure, Pulmonary Edema, Shock</li> <li>▪ Rheumatic heart disease and other Valvular Diseases</li> <li>▪ Inflammatory Heart Diseases, Infective Endocarditis, Myocarditis, Pericarditis</li> <li>▪ Cardiomyopathy, dilated, restrictive, hypertrophic</li> <li>▪ Arrhythmias, heart block</li> </ul> </li> <li>• Associated illnesses</li> </ul>

**Practical**

**Total = 660 Hours**  
**1 Week = 30 Hours**

S. No.	Area of Posting	No. of Week	Total Hours
1	Cardio thoracic -Medical	4	120
	-Surgical	4	120
2.	OTs (Cardiac and thoracic)	4	120
3.	Casualty	2	60
4.	Diagnostic labs including cath lab	2	60
5.	ICCU	4	120
6.	ICU	4	120
7.	CCU	4	120
8.	Paediatric Intensive	2	60
9.	OPD	2	60
	<b>Total</b>	<b>32</b>	<b>960</b>

**Essential Nursing Skills****Procedures Observed**

1. Echo cardiogram
2. Ultrasound
3. Monitoring JVP, CVP
4. CT SCAN
5. MRI
6. Pet SCAN
7. Angiography
8. Cardiac catheterization
9. Angioplasty
10. Various Surgeries
11. Any other

**I. Procedures Assisted**

1. Arterial blood gas analysis
2. Thoracentesis
3. Lung biopsy
4. Computer assisted tomography (CAT scan)
5. M.R.I.
6. Pulmonary angiography
7. Bronchoscopy
8. Pulmonary function test
9. ET tube insertion
10. Tracheostomy tube insertion
11. Cardiac catheterization

12. Angiogram
13. Defibrillation
14. Treadmill test
15. Echo cardiography
16. Doppler ultrasound
17. Cardiac surgery
18. Insertion of chest tube
19. CVP Monitoring
20. Measuring pulmonary artery pressure by Swan-Ganz Catheter
21. Cardiac Pacing

## II. Procedures Performed

1. Preparation of assessment tool for CT client (Cardiac, thoracic and vascular)
2. ECG – Recording, Reading, Identification of abnormalities
3. Oxygen therapy – Cylinder, central supply, catheter, nasal canula, mask, tent through ET and Tracheostomy tube manual resuscitation bag
4. Mechanical ventilation
5. Spirometer
6. Tuberculen skin test
7. Aerosal therapy
8. Nebulizer therapy
9. Water seal drainage
10. Chest physiotherapy including – Breathing Exercises, Coughing Exercises, Percussion & Vibration
11. Suctioning – Oropharyngeal, nasotracheal, Endotracheal through tracheostomy tube
12. Artificial airway cuff maintenance
13. CPR
14. Care of client on ventilator
15. Identification of different – Arrhythmias  
Abnormal pulses, respirations, B.P. Variation, Heart sounds, Breath sounds
16. Pulse oxymetry
17. Introduction of intracath
18. Bolus I.V. Injection
19. Life line
20. Maintenance of “Heplock”
21. Subcutaneous of Heparin
22. Obtaining leg measurements to detect early swelling in thrombophlebetes
23. Identification of Homan’s signs
24. Bergen – Allen exercises

**CLINICAL SPECIALITY – II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALTY - CRITICAL CARE NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 950

Total : 1100

**Course Description**

This course is designed to assist students in developing expertise and in- depth knowledge in the field of Critical care Nursing. It will help students to develop advanced skills for nursing intervention in caring for critically ill patients. It will enable the student to function as critical care nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of Critical Care Nursing

**Objectives**

At the end of the course the students will be able to,

1. appreciate trends and issues related to Critical Care Nursing
2. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of critically ill patients
3. describe the various drugs used in critical care and nurses responsibility
4. perform physical, psychosocial & spiritual assessment
5. demonstrate advance skills/competence in managing critically ill patients including Advance Cardiac Life Support
6. demonstrate skill in handling various equipments/gadgets used for critical care
7. provide comprehensive care to critically ill patients
8. appreciate team work & coordinate activities related to patient care
9. practice infection control measures
10. assess and manage pain
11. identify complications & take appropriate measures
12. discuss the legal and ethical issues in critical care nursing
13. assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
14. assist in various diagnostic, therapeutic and surgical procedures
15. incorporate evidence based nursing practice and identify the areas of research in the field of critical care nursing
16. identify the sources of stress and manage burnout syndrome among health care providers
17. teach and supervise nurses and allied health workers
18. design a layout of ICU and develop standards for critical care nursing practice

Units	Hours	Course Content
<b>I</b>	<b>5</b>	<p><b>Introduction to critical care nursing</b></p> <ul style="list-style-type: none"> <li>• Historical review- Progressive patient care(PPC)</li> <li>• Review of anatomy and physiology of vital organs, fluid and electrolyte balance</li> <li>• Concepts of critical care nursing</li> <li>• Principles of critical care nursing</li> <li>• Scope of critical care nursing</li> </ul>

Units	Hours	Course Content
		<ul style="list-style-type: none"> <li>• Critical care unit set up including equipments supplies, use and care of various type of monitors &amp; ventilators</li> <li>• Flow sheets</li> </ul>

	<b>Total</b>	<b>32</b>	<b>960</b>

## **I. ESSENTIAL CRITICAL CARE NURSING SKILLS I. Procedures Observed**

1. CT Scan
2. MRI
3. EEG
4. Hemodialysis
5. Endoscopic Retrograde cholangio Pancreaticogram (ERCP)
6. Heart/ Neuro/GI/ Renal Surgeries

## **II. Procedures Assisted**

1. Advanced life support system
2. Basic cardiac life support
3. Arterial line/arterial pressure monitoring/blood taking
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation therapy
8. Arterial Catheterization
9. Chest tube insertion
10. Endotracheal intubations
11. Ventilation
12. Insertion of central line/cvp line
13. Connecting lines for dialysis

## **III. Procedure Performed**

1. Airway management
  - a. Application of oropharyngeal airwa
  - b. Oxygen therapy
  - c. CPAP (Continuous Positive Airwa Pressure)
  - d. Care of tracheotomy
  - e. Endotracheal extubation
2. Cardiopulmonary resuscitation, Basic cardiac life support, ECG
3. Monitoring of critically ill patients -clinically with monitors, capillary refill time (CRT) assessment of jaundice, ECG
4. Gastric lavage
5. Assessment of critically ill patients  
Identification & assessment of risk factors, Glasgow coma scale, and dolls eye movement, arterial pressure monitoring, cardiac output/pulmonary artery pressure monitoring, and detection of life threatening abnormalities
6. Admission & discharge of critically ill patients
7. Nutritional needs – gastrostomy feeds, pharyngeal feeds, jejunostomy feeds, TPN, formula preparation

& patient education

8. Assessment of patient for alteration in blood sugar levels monitoring blood sugar levels periodically & administering insulin periodically
9. Administration of drugs: IM, IV injection, IV cannulation & fixation of infusion pump, calculation of dosages, use of insulin syringes/ tuberculin, monitoring fluid therapy, blood administration
10. Setting up dialysis machine and starting, monitoring and closing dialysis
11. Procedures for prevention of infections-Hand washing, disinfection & sterilization surveillance, and fumigation universal precautions
12. Collection of specimen
13. Setting, use & maintenance of basic equipment, ventilator, O2 analyzer, monitoring equipment, transducers, defibrillator, infusion & syringe pumps, centrifuge machine

#### **IV Other Procedures**

**CLINICAL SPECIALITY - II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALTY- ONCOLOGY NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist students in developing expertise and in- depth understanding in the field of oncology Nursing. It will help students to develop advanced skills for nursing intervention in various oncological conditions. It will enable the student to function as oncology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of oncology nursing

**Objectives**

At the end of the course the students will be able to,

1. explain the prevention, screening and early detection of cancer
2. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of oncological disorders of various body systems
3. describe the psychosocial effects of cancer on patients and families
4. demonstrate skill in administering/assisting in various treatment modalities used for patients with cancer
5. apply nursing process in providing holistic care to patients with cancer
6. apply specific concepts of pain management
7. appreciate the care of death and dying patients and value of bereavement support
8. describe the philosophy, concept and various dimensions of palliative care
9. appreciate the role of alternative systems of medicine in care of cancer patients
10. appreciate the legal & ethical issues relevant to oncology nursing
11. recognize and manage Oncological emergencies
12. counsel the patients with cancer and their families
13. incorporate evidence based nursing practice and identify the areas of research in the field of oncology nursing
14. recognize the role of oncology nurse practitioner as a member of oncology team
15. collaborate with other agencies and utilize resources in caring for cancer patients
16. teach and supervise nurses and allied health workers
17. design a layout and develop standards for management of oncology units/hospitals and nursing care

Units	Hours	Course Content
<b>I</b>	<b>4</b>	<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Epidemiology-Incidence, Prevalence – Global, National, State and Local</li> <li>• Disease burden, concept of cancer, risk factors</li> <li>• Historical perspectives</li> <li>• Trends and issues</li> <li>• Principles of cancer management</li> <li>• Roles and responsibilities of oncology nurse</li> </ul>

### Clinical Experience

S. No.	Area of Posting	No. of Week	Total Hours
1	Medical Oncology ward	6	180
2	Surgical Oncology ward	6	180
3	Bone marrow transplantation Unit	2	60
4	Operation Theatre	2	60
5	Radiotherapy Unit	2	60
6	Chemotherapy Unit	4	120
7	Out patient department and pain clinic	2	60
8	Pediatric Oncology ward	2	60
9	Palliative Care ward	2	60
10	Community oncology	2	60
11	Hospice	1	30
12	Other field visits	1	30
	<b>Total</b>	<b>32</b>	<b>960</b>

### Procedures Observed

1. CT Scan
2. MRI
3. PET Scan (Positron Emission Tomography)
4. Ultra sound
5. Mammography
6. Radio Nuclide Imaging
7. Bone Scan
8. Thyroid Function Test
9. Functional and Metabolic Imaging
10. Transportation of radioactive materials
11. Others

### **Procedures Assisted**

1. IV cannulation -Open method
2. Chemotherapy
3. Radiotherapy – Brachytherapy – Low Density Radiation, High density radiation
4. Interstitial implantation
5. Bio-therapy and Gene therapy
6. Teletherapy – Treatment planning
7. Bone marrow aspiration and biopsy
8. Biopsy – tissue
9. FNAC – Fine needle aspiration cytology and biopsy
10. Advance cardiac life support
11. Endotracheal intubation
12. Defibrillation, Ventilation
13. Tracheostomy
14. Thoracentesis
15. Paracentesis
16. Lumbar puncture
17. Arterial blood gas
18. Nerve block
19. Chest tube insertion
20. Intercostal drainage
21. CVP monitoring

### **Procedure Performed**

1. Screening for cancer
2. Assessment of pain
3. Assessment of Nutritional status
4. Care of tracheostomy
5. Endotracheal intubation
6. Gastric gavage
7. Pap smear
8. IV cannulation
9. Care of surgical flaps
10. Care of ostomies
11. Blood transfusion and component therapy
12. Counseling
13. Practice standard safety measures
14. Care of dead body and mortuary formalities

### **Other procedures**

**(As per the institutional protocol)**

1. Alternative therapies

**CLINICAL SPECIALITY - II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALITY - NEUROSCIENCES NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 950

Total : 1100

**Course Description**

This course is designed to assist students in developing expertise and in-depth knowledge in the field of neurology and neurosurgical Nursing. It will help students to develop advanced skills for nursing intervention in caring for patients with neurological and neurosurgical disorders. It will enable the student to function as neuroscience nurse practitioner/ specialist. It will further enable the student to function as educator, manager and researcher in the field of neurology and neurosurgical Nursing.

**Objectives**

At the end of the course the students will be able to,

1. appreciate trends and issues related to neurology and neurosurgical nursing
2. review the anatomy and physiology of nervous system
3. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of patients with neurological and neurosurgical disorders
4. perform neurological assessment and assist in diagnostic procedures
5. describe the concepts and principles of neuroscience nursing
6. describe the various drugs used in neurosciences and nurses responsibility
7. assist in various therapeutic and surgical procedures in neuroscience nursing
8. demonstrate advance skills/competence in managing patients with neurological and neurosurgical disorder following nursing process approach
9. identify psychosocial problems of patients with disabilities and assist patients and their family to cope with emotional distress, spiritual, grief and anxiety
10. participate in preventive, promotive and rehabilitative services for neurological and neurosurgical patients
11. explain the legal and ethical issues related to brain death, organ transplantation and practice of neuroscience nursing
12. incorporate evidence based nursing practice and identify the areas of research in the field of neuroscience nursing
13. organize and conduct in service education program for nursing personnel
14. develop standards of care for quality assurance in neuroscience nursing practice
15. identify the sources of stress and manage burnout syndrome among health care providers
16. teach and supervise nurses and allied health workers
17. plan and develop physical layout of neuro intensive care unit

**Course Content**

**Practical**

**Total = 960 Hours**  
**1 Week = 30 Hours**

S. No.	Area of Posting	No. of Week	Total Hours
1	O.P.D	2	60
2	Casualty	2	60
3	Diagnostics	2	60
4	Neuro psychiatry	1	30
5	Neuro Medical wards	4	120
6	Paediatric Neuro ward	2	60
7	Neuro surgical wards	4	120
8	Head Injury ward	3	90
9	ICU- neuro medicine	4	120
10	I.C.U- neuro surgical	4	120
11	Rehabilitation	2	60
12	Operation Theatre	2	60
	Total	32	960

**I. ESSENTIAL NEURO NURSING SKILLS****I. Procedures Observed**

1. CT scan
2. MRI
3. PET
4. EEG
5. EMG
6. Sleep pattern studies/Therapy
7. Radiographical studies
8. Neuro surgeries
9. Nerve conduction studies
10. Ultrasound studies
11. Any other

**II. Procedures Assisted**

1. Advanced cardiac life support
2. Lumbar Puncture
3. Biopsies – muscle, nerve and brain
4. Arterial blood gas
5. ECG recording
6. Blood transfusion
7. IV cannulation – open method

8. Endotracheal intubation
9. Ventilation
10. Tracheostomy
11. ICP monitoring
12. Gama knife
13. Cerebral angiography
14. Myelography
15. Neuro surgeries

### **III. Procedures Performed**

1. Airway management
  - a. Application of Oro pharyngeal airway
  - b. Care of Tracheostomy
  - c. Conduct endotracheal intubation
  - d. use of AMBU bag, artificial respirators
  - e. Setting of Ventilators and Care of patients on ventilators
2. Cardio Pulmonary Resuscitation -Defibrillation
3. Neurological assessment -Glasgow coma scale
4. Gastric lavage
5. IV cannulation
6. Administration of emergency IV Drugs, fluid
7. Care of patients with incontinence, bladder training  
Catheterization
8. Care of patients on traction related to the neurological conditions
9. Blood administration
10. Muscle strengthening exercises
11. Guidance and counseling
12. Monitoring – management and care of monitors

### **IV. Other Procedures**

**CLINICAL SPECIALITY – II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALTY - NEPHRO-UROLOGY NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist students in developing expertise and in-depth understanding in the field of Nephro and urological Nursing. It will help students to develop advanced skills for nursing intervention in various nephro and urological conditions. It will enable the student to function as nephro and urology nurse practitioner/specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of nephro and urology nursing

**Objectives**

At the end of the course the students will be able to,

1. appreciate trends and issues related to nephro and urological nursing
2. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of nephro and urological conditions
3. perform physical, psychosocial & spiritual assessment
4. assist in various diagnostic, therapeutic and surgical interventions
5. provide comprehensive nursing care to patients with nephro and urological conditions
6. describe the various drugs used in nephro and urological conditions and nurses responsibility
7. demonstrate skill in handling various equipments/gadgets used for patients with nephro and urological conditions
8. appreciate team work & coordinate activities related to patient care.
9. practice infection control measures
10. identify emergencies and complications & take appropriate measures
11. assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
12. discuss the legal and ethical issues in nephro and urological nursing
13. identify the sources of stress and manage burnout syndrome among health care provider
14. appreciate the role of alternative system of medicine in the care of patient
15. incorporate evidence based nursing practice and identify the areas of research in the field of nephro and urological nursing
16. teach and supervise nurses and allied health workers
17. design a layout of kidney transplant unit and dialysis unit
18. develop standards of nephro urological nursing practice

**Course Content**

Units	Hours	Course Content
<b>I</b>	<b>5</b>	<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Historical development: trends and issues in the field of nephro and urological nursing</li> <li>• Nephro and Urological problems</li> <li>• Concepts, principles and nursing perspectives</li> <li>• Ethical and legal issues</li> <li>• Evidence based nursing and its application in nephro and urological nursing (to be incorporated in all the units)</li> </ul>

Units	Hours	Course Content
II	5	<b>Epidemiology</b> <ul style="list-style-type: none"> <li>Major health problems-urinary dysfunction, urinary tract infections, Glomerular disorders, obstructive disorders and other urinary disorders</li> <li>Risk factors associated with nephro and urological conditions</li> <li>conditions - Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations</li> <li>Health promotion, disease prevention, life style modification and its implications to nursing</li> <li>Alternate system of medicine/complementary therapies</li> </ul>

**CLINICAL SPECIALITY – II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALTY - ORTHOPEDIC NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist students in developing expertise and in- depth understanding in the field of orthopedic nursing. It will help students to develop advanced skills for nursing intervention in various orthopedic conditions. It will enable the student to function as orthopedic nurse practitioner/specialist providing quality care. It will further enable the student to function as educator, manager, and researcher in the field of orthopedic nursing.

**Objectives**

At the end of the course the students will be able to,

1. appreciate the history and developments in the field of orthopedic nursing
2. identify the psycho-social needs of the patient while providing holistic care
3. perform physical and psychological assessment of patients with orthopedic conditions and disabilities
4. describe various disease conditions and their management
5. discuss various diagnostic tests required in orthopedic conditions
6. apply nursing process in providing care to patients with orthopedic conditions and those requiring rehabilitation
7. recognize and manage orthopedic emergencies
8. describe recent technologies and treatment modalities in the management of patients with orthopedic conditions and those requiring rehabilitation
9. integrate the concept of family centered, long term care and community based rehabilitation to patients with orthopedic conditions
10. counsel the patients and their families with orthopedic conditions
11. describe various orthotic and prosthetic appliances
12. appreciate the legal and ethical issues pertaining to patients with orthopedic conditions and those requiring rehabilitation
13. appreciate the role of alternative system of medicine in care of patients with orthopedic conditions
14. incorporate evidence based nursing practice and identify the areas of research in the field of orthopedic nursing
15. recognize the role of orthopedic nurse practitioner and as a member of the orthopedic and rehabilitation team
16. teach orthopedic nursing to undergraduate students and in-service nurses
17. prepare a design and layout of orthopedic and rehabilitative units

**Practicals**

1. Clinical practice in orthopedic, physiotherapy and rehabilitation units
2. Application of tractions and plaster casts and removal of tractions and plaster casts and other appliances
3. Apply theories and nursing process in the management of patients with orthopedic conditions
4. Provide various types of physical and rehabilitative therapies
5. Provide health education on related disease conditions
6. Unit management and plan - designing

**Clinical Experience**

**Total = 960 Hours**  
**1 Week = 30 Hours**

S. No.	Area of Posting	No. of Week	Total Hours
1	Orthopedic Ward	8	240
2	Orthopedic Operation theatre	4	120
3	Neurosurgical Ward	2	60
4	Orthopedic O.P.D.	4	120
5	Casualty/Emergency and Trauma	4	120
6	Rehabilitation Units	2	60
7	Physiotherapy Unit	4	120
8	Paediatric /paediatric surgery unit	2	60
9	Field Visit	2	60
	<b>Total</b>	<b>32</b>	<b>960</b>

**I. Procedures Observed**

1. X Ray
2. Ultrasound
3. MRI
4. C T Scan/bone scan
5. Arthroscopy
6. Electrothermally – assisted capsule shift or ETAC (Thermal capsulorrhaphy)
7. Fluroscopy
8. Electromyography
9. Myelography
10. Discography
11. Others

## **II. Procedures Assisted**

1. Blood Transfusion
2. IV cannulation and therapy
3. Ventilation
4. Various types of tractions
5. Orthopedic surgeries—Arthrocentesis, Arthroscopy, Bone lengthening, Arthrodesis,grafting, Fracturesfixation, reconstructive, reimplantation, replantation, spinal decompression, transplantation of bone, muscle or articular cartilage, autografting, allografting
6. Injection – Intra articular, intra osseous
7. Advance life support

## **III. Procedures Performed**

1. Interpretation of X ray films
2. Application and removal of splints, casts, and braces
3. Care of tractions – skin and skeletal traction, pin site care
4. Cold therapy
5. Heat therapy
6. Hydrotherapy
7. Therapeutic exercises
8. Use of TENS (Transcutaneous electrical nerve stimulation)
9. Techniques of transportation
10. Crutch walking, walkers, wheel chair
11. Use of devices for activities of daily living and prevention of deformities
12. Administration of drugs: IV injection, IV cannulation, and Blood transfusion.
13. Procedures for prevention of infections: disinfection and sterilization, surveillance, fumigation
14. Special skin/ part preparations for orthopedic surgeries
15. Surgical dressings – debridement
16. Bladder and bowel training

## **Other Procedures**

**CLINICAL SPECIALITY – II**  
**MEDICAL SURGICAL NURSING**  
**SUB SPECIALTY - GASTRO ENTEROLOGY NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist students in developing expertise and in-depth understanding in the field of gastro enterology Nursing. It will help students to develop advanced skills for nursing intervention in various gastro enterology conditions. It will enable the student to function as gastro enterology nurse practitioner/ specialist and provide quality care. It will further enable the student to function as educator, manager, and researcher in the field of gastro enterology nursing.

**Objectives**

At the end of the course the students will be able to,

1. appreciate trends and issues related to gastro enterology nursing
2. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of gastrointestinal conditions
3. participate in national health programs for health promotion, prevention and rehabilitation of patients with gastrointestinal conditions
4. perform physical, psychosocial & spiritual assessment
5. assist in various diagnostic, therapeutic and surgical procedures
6. provide comprehensive care to patients with gastrointestinal conditions
7. describe the various drugs used in gastrointestinal conditions and nurses responsibility
8. demonstrate skill in handling various equipments/gadgets used for patients with gastrointestinal conditions
9. appreciate team work & coordinate activities related to patient care
10. practice infection control measures
11. identify emergencies and complications & take appropriate measures
12. assist patients and their family to cope with emotional distress, grief, anxiety and spiritual needs
13. discuss the legal and ethical issues in GE nursing
14. identify the sources of stress and manage burnout syndrome among health care providers
15. appreciate the role of alternative system of medicine in care of patient
16. incorporate evidence based nursing practice and identify the areas of research in the field of gastrointestinal nursing
17. teach and supervise nurses and allied health workers
18. design a layout of Gastro enterology intensive care unit (GEICU) , liver care/transplant unit

**Course Content**

Units	Hours	Course Content
<b>I</b>	<b>5</b>	<p><b>Introduction</b></p> <ul style="list-style-type: none"> <li>• Historical development: trends and issues in the field of gastro enterology</li> <li>• Gastro enterological problems</li> <li>• Concepts, principles and nursing perspectives</li> <li>• Ethical and legal issues</li> <li>• Evidence based nursing and its application in gastrointestinal nursing(to be incorporated in all the units)</li> </ul>

Units	Hours	Course Content
II	5	<b>Epidemiology</b> <ul style="list-style-type: none"> <li>• Risk factors associated with GE conditions- Hereditary, Psychosocial factors, smoking, alcoholism, dietary habits, cultural and ethnic considerations</li> <li>• Health promotion, disease prevention, life style modification and its implications to nursing</li> <li>• National health programmes related to gastro enterology</li> <li>• Alternate system of medicine/complementary therapies</li> </ul>
III	5	<b>Review of anatomy and physiology of gastrointestinal system</b> <ul style="list-style-type: none"> <li>• Gastrointestinal system</li> <li>• Liver, biliary and pancreas</li> <li>• Gerontologic considerations</li> <li>• Embryology of GI system</li> <li>• Immunology specific to GI system</li> </ul>
IV	15	<b>Assessment and diagnostic measures</b> <ul style="list-style-type: none"> <li>• History taking</li> <li>• Physical assessment, psychosocial assessment</li> <li>• Diagnostic tests <ul style="list-style-type: none"> <li>▪ Radiological studies:Upper GIT- barium swallow, lower GIT- Barrium enema,</li> <li>▪ Ultra sound</li> <li>▪ Computed tomography</li> <li>▪ MRI</li> <li>▪ Cholangiography: Percutaneous transheptatic</li> <li>▪ Cholangiogram(PTC)</li> <li>▪ Magnetic Resonance Cholangio Pancreotography (MRCP)</li> <li>▪ Nuclear imaging scans (scintigraphy)</li> <li>▪ Endoscopy</li> <li>▪ Colonoscopy</li> <li>▪ Proctosigmoidoscopy</li> <li>▪ Endoscopic Retrogrde Cholongio Pancreotography (ERCP)</li> <li>▪ Endoscopic ultrasound</li> <li>▪ Peritonoscopy(Laproscopy)</li> <li>▪ Gastric emptying studies</li> <li>▪ Blood chemistries-Serum amylase, serum lipase</li> <li>▪ Liver biopsy</li> <li>▪ Miscellaneous tests:Gastric analysis, fecal analysis</li> <li>▪ Liver function tests: Bile formation and excretion, dye excretion test, Protein metabolism, haemostatic functions- prothrombin vitamin K production, serum enzyme tests,Lipid metabolism- serum cholesterol, Interpretation of diagnostic measures, Nurse's role in diagnostic tests</li> </ul> </li> </ul>
V	25	<b>Gastro intestinal disorders and nursing management</b> <ul style="list-style-type: none"> <li>• Etiology, clinical manifestations, diagnosis, prognosis, related pathophysiology, medical , surgical and nursing management of, <ul style="list-style-type: none"> <li>▪ Disorders of the mouth: Dental caries,Peridontal disease,Acute tooth infection, Stomatitis, Thrush (moniliasis),Gingivitis, Leukoplakia,</li> </ul> </li> </ul>

Units	Hours	Course Content
		<p>Inflammation of the parotid gland, Obstruction to the flow of saliva, Fracture of the jaw</p> <ul style="list-style-type: none"> <li>▪ Disorders of the oesophagus-Reflux oesophagitis, Oesophageal achalasia, Esophageal varices, Hiatus hernia, Diverticulum</li> <li>▪ Disorders of the stomach and duodenum: Gastritis, Peptic ulcer, Dumping of the stomach, Food poisoning, idiopathic gastroparesis, Aerophagia and belching syndrome, Ideopathic cyclic nausea and vomiting, Rumination syndrome, Functional dyspepsia, Chronic Non specific (functional) abdominal pain</li> <li>▪ Disorders of the small intestine               <ul style="list-style-type: none"> <li>★ Malabsorption syndrome – tropical sprue</li> <li>★ Gluten – sensitive enteropathy (Coeliac disease)</li> <li>★ Inflammatory diseases of intestines and abdomen, appendicitis, peritonities, intestinal obstruction, Abdominal TB, Gastrointestinal polyposis syndrome</li> <li>★ Chronic inflammatory bowel disease, Ulcerative colites, crohn’s disease</li> <li>★ Infestations and infections –Worm infestations, Typhoid, Leptospirosis</li> <li>★ Solitary rectal ulcer syndrome</li> <li>★ Alteration in bowel elimination (diarrhoea, constipation, fecal impaction, fecal incontinence, Irritable bowel syndrome, Chronic idiopathic constipation, Functional diarrhoea</li> </ul> </li> </ul> <p>Anorectal Conditions -Hemorrhoids, Anal fissure, Anal fistula, Abscess, Strictures, Rectal prolapse, Pruritis ani, Pelonidal disease, Anal condylomas, Warts</p>

**Practicals**

**Total = 960 Hours**  
**1 Week = 30 Hours**

S. No.	Area of Posting	No. of Week	Total Hours
1	Diagnostic labs	2	60
2	Emergency and casualty	3	90
3	Liver transplant unit	1	30
4	GE Medical Ward	6	180
5	GE Surgical Ward	8	240
6	OT	2	60
7	ICU	4	120
8	Pediatric gastroenterology	2	60
9	Oncology	2	60
10	GE OPD	2	60
	Total	32	960

**Procedures to be Assisted**

1. Endoscopy room – Upper G.I. Endoscopy (Diagnostic and therapeutic)
2. Sigmoidoscopy
3. Colonoscopy
4. Polypectomy
5. Endoscopic Retrograde Cholangio Pancreatography (ERCP)
6. Liver biopsy
7. Percutaneous Catheter Drainage (PCD) of Pseudocyst pancreas
8. Abdominal paracentesis
9. Percutaneous aspiration of liver abscess
10. GE Lab : PT, HbsAg, Markers – A, B, C virus, CBP, ESR, Stool Test

**Procedures to be Performed**

1. History and Physical assessment
2. RT intubation / extubation / aspiration / suction
3. Gastric lavage and gavage
4. Bowel wash
5. Therapeutic diets
6. Ostomy feeding
7. Stoma care
8. Monitoring vital parameters
9. Plan of inservice education programme for nursing staff and Class-IV employees
10. Counseling

## CLINICAL SPECIALITY – II

### OBSTETRIC AND GYNAECOLOGICAL NURSING

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist the student in developing expertise and in- depth understanding in the field of Obstetric and Gynecological Nursing. It will help the student to develop advanced nursing skills for nursing interventions in various obstetrical and gynecological conditions. It will further enable the students to function as midwifery nurse practitioner/ specialist, educator, manager and researcher in the field of Obstetric and Gynecological Nursing.

**Objectives**

At the end of the course, the student will be able to,

1. describe the epidemiology, etiology, pathophysiology and diagnostic assessment of women with obstetric and gynaecological conditions
2. perform physical, psychosocial, cultural & spiritual assessment
3. demonstrate competence in caring for women with obstetrical and gynaecological conditions
4. demonstrate competence in caring for high risk newborn
5. identify and Manage obstetrical and neonatal emergencies as per protocol.
6. practice infection control measures
7. utilize recent technology and various diagnostic, therapeutic modalities in the management of obstetrical, gynecological and neonatal care
8. demonstrate skill in handling various equipments/gadgets used for obstetrical, gynaecological and neonatal care
9. teach and supervise nurses and allied health workers
10. design a layout of specialty units of obstetrics and gynecology
11. develop standards for obstetrical and gynaecological nursing practice
12. counsel women and families
13. incorporate evidence based nursing practice and identifies the areas of research in the field of obstetrical and gynaecological nursing
14. function as independent midwifery nurse practitioner

**Course Content**

Units	Hours	Course Content
<b>I</b>	<b>25</b>	<p><b>Management of problems of women during pregnancy</b></p> <ul style="list-style-type: none"> <li>• Risk approach of obstetrical nursing care, concept &amp; goals</li> <li>• Screening of high-risk pregnancy, newer modalities of diagnosis</li> <li>• Nursing Management of Pregnancies at risk-due to obstetrical complication               <ul style="list-style-type: none"> <li>▪ Pernicious Vomiting</li> <li>▪ Bleeding in early pregnancy, abortion, ectopic pregnancy, and gestational trophoblastic diseases</li> </ul> </li> </ul>

Units	Hours	Course Content
		<ul style="list-style-type: none"> <li>▪ Hemorrhage during late pregnancy, ante partum hemorrhage, Placenta praevia, abruptio placenta</li> <li>▪ Hypertensive disorders in pregnancy, pre-eclampsia, eclampsia, Hemolytic Elevated liver enzyme Low Platelet count (HELLP)</li> <li>▪ Iso-immune diseases, Rh and ABO incompatibility</li> <li>▪ Hematological problems in pregnancy</li> <li>▪ Hydramnios-oligohydramnios, polygydrmnios</li> <li>▪ Prolonged pregnancy- post term, post maturity</li> <li>▪ Multiple pregnancies</li> <li>▪ Intra uterine infection &amp; pain during pregnancy</li> <li>▪ Intra Uterine Growth Retardation(IUGR), Premature Rupture of Membrane (PROM), intra uterine death</li> </ul>
II	15	<p><b>Pregnancies at risk-due to pre-existing health problems</b></p> <ul style="list-style-type: none"> <li>• Metabolic conditions.</li> <li>• Anemia and nutritional deficiencies</li> <li>• Hepatitis</li> <li>• Cardio-vascular disease</li> <li>• Thyroid diseases</li> <li>• Epilepsy.</li> <li>• Essential hypertension</li> <li>• Chronic renal failure</li> <li>• Tropical diseases</li> <li>• Malaria and Dengue fever in pregnancy</li> <li>• Psychiatric disorders</li> <li>• Infections               <ul style="list-style-type: none"> <li>▪ Toxoplasmosis Rubella Cytomegalo virus Herpes (TORCH)</li> <li>▪ Reproductive Tract Infection (RTI)</li> <li>▪ STD, HIV/AIDS</li> <li>▪ Vaginal infections, Leprosy, Tuberculosis</li> </ul> </li> <li>• Other risk factors               <ul style="list-style-type: none"> <li>▪ Age- Adolescents, elderly</li> <li>▪ Unwed mothers</li> <li>▪ Sexual abuse</li> <li>▪ Substance use</li> </ul> </li> <li>• Pregnancies complicating with tumors, uterine anomalies, prolapse, ovarian cyst</li> </ul>
III	25	<p><b>Abnormal labour, pre-term labour &amp; obstetrical emergencies</b></p> <ul style="list-style-type: none"> <li>• Etiology, pathopyhsiology and nursing management of           <ul style="list-style-type: none"> <li>▪ Uncoordinated uterine actions, Atony of uterus, precipitate labour, prolonged labour</li> <li>▪ Abnormal lie, presentation, position compound presentation</li> <li>▪ Contracted pelvis CPD dystocia</li> <li>▪ Obstetrical emergencies               <ul style="list-style-type: none"> <li>★ Obstetrical shock</li> <li>★ Vasa praevia</li> <li>★ Inversion of uterus</li> <li>★ Amniotic fluid embolism</li> <li>★ Rupture uterus</li> <li>★ Presentation and prolapse cord</li> </ul> </li> </ul> </li> </ul>

Units	Hours	Course Content
		<ul style="list-style-type: none"> <li>• Obstetrical procedures <ul style="list-style-type: none"> <li>▪ Augmentation of labour, Medical and surgical induction</li> <li>▪ Version</li> <li>▪ Manual removal of placenta</li> </ul> </li> <li>• Obstetrical operations <ul style="list-style-type: none"> <li>▪ Forceps delivery</li> <li>▪ Ventouse delivery</li> <li>▪ Caesarean section</li> <li>▪ Destructive operations</li> </ul> </li> <li>• Genital tract injuries <ul style="list-style-type: none"> <li>▪ Third degree perineal tear</li> <li>▪ VVF</li> <li>▪ RVF</li> </ul> </li> <li>• Complications of third stage of labour <ul style="list-style-type: none"> <li>▪ Post partum hemorrhage</li> <li>▪ Retained placenta</li> </ul> </li> </ul>

**Practicals**

**Total = 960 Hours**  
**1 Week = 30 Hours**

S. No.	Dept/ Unit	No. of Week	Total Hours
1	Antenatal OPD including Infertility clinics/ Reproductive medicine, Family welfare and post partum clinic / PTCT	6	180
2	Antenatal and Postnatal ward	6	180
3	Labour room	4	120
4	Neonatal Intensive Care Unit	3	90
5	Obstetric/Gynaec Operation Theatre	3	90
6	Gynaec Ward	4	120
7	CHC, PHC, SC	6	180
	<b>Total</b>	<b>32</b>	<b>960</b>

## **Essential Obstetrical and Gynecological Skills**

### **Procedure to be observed**

- Assisted Reproductive Technology Procedures
- Ultra sonography
- Specific laboratory tests
- Amniocentesis
- Cervical & vaginal cytology
- Fetoscopy
- Hysteroscopy
- MRI
- Surgical diathermy
- Cryosurgery

### **Procedures to be Assisted**

- Operative delivery
- Abnormal deliveries-Forceps application, Ventouse, Breech
- Exchange blood transfusion
- Culdoscopy
- Cystoscopy
- Tuboscopy
- Laparoscopy
- Endometrial biopsy
- Tubal patent test
- Chemotherapy
- Radiation therapy
- Medical Termination of Pregnancy
- Dilatation and curettage

### **Procedures to be Performed**

- History taking
- Physical examination-General
- Antenatal assessment – 20
- Pelvic examination
- Assessment of risk status
- Assessment of intra uterine foetal well-being: kick chart and foetal movement chart, Doppler assessment, Non Stress Test, Contraction Stress Test (Oxytocin Challenge Test)
- Universal precautions- Disposal of biomedical waste
- Per vaginal examination and interpretation (early pregnancy, labour, post partum)
- Utilization of partograph
- Medical & surgical induction (Artificial rupture of membranes)
- Vacuum extraction
- Conduct of delivery
- Prescription and administration of fluids and electrolytes through intravenous route
- Application of outlet forceps, delivery of breech–Burns Marshall, Loveset manoeuvre
- Repair of tears and episiotomy suturing
- Vacuum extraction
- Controlled cord traction, manual removal of placenta, placental examination

- Manual vacuum aspiration
- Postnatal assessment- 20
- Management of breast engorgement
- Thrombophlebitis (white leg)
- Postnatal counseling
- Reposition of inversion of uterus
- Laboratory tests: Blood- Hb, Sugar, Urine-albumin, sugar
- Breast care, breast exam, and drainage breast abscess
- Postnatal exercise
- Assessment –New born assessment, physical and neurological, apgar score, high-risk newborn, monitoring neonates: clinically and with monitors, capillary refill time, assessment of jaundice, danger signs
- Anthropometric measurement
- Neonatal resuscitation
- Gastric lavage
- Care of newborn in multi channel monitor and ventilator
- Care of newborn in radiant warmer and incubator
- Kangaroo mother care
- Assisting mother with exclusive breast-feeding
- Feeding technique: Katori, spoon, naso/orogastric, Total Parenteral nutrition
- Assessment, calculation and administration of fluids and medications:
  - Oral
  - I.D
  - I.M
  - I.V- Securing IV line, infusion pump
- Administration of drug per rectum
- Capillary blood sample collection
- Oxygen therapy
- Phototherapy
- Chest physiotherapy
- Counseling – Parental, bereavement, family planning, infertility, etc
- Setting of operation theatre
- Trolley and table set up for Obstetrical & gynaecological operations
- Pap smear
- Vaginal smear
- Insertion of pessaries
- Insertion of IUD and removal
- Teaching skills
- Communication skills
- Prepare referral slips
- Pre transport stabilization
- Networking with other stake holders

## CLINICAL SPECIALITY – II

### CHILD HEALTH NURSING

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

#### Course Description

This course is designed to assist students in developing expertise and in depth understanding in the field of Pediatric Nursing. It will help students to develop advanced skills for nursing intervention in various pediatric medical and surgical conditions. It will enable the student to function as pediatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of Paediatric nursing

#### Objectives

At the end of the course the students will be able to,

1. apply the nursing process in the care of ill infants to pre adolescents in hospital and community
2. demonstrate advanced skills/competence in nursing management of children with medical and surgical problems
3. recognize and manage emergencies in children
4. provide nursing care to critically ill children
5. utilize the recent technology and various treatment modalities in the management of high risk children
6. prepare a design for layout and describe standards for management of pediatric units/hospitals
7. identify areas of research in the field of pediatric nursing

#### Course Content

**Practicals**

**Total = 960 Hours**  
**1 Week = 30 Hours**

S. No.	Deptt./ Unit	No. of Week	Total Hours
1	Pediatric medicine ICU	4	120
2	Pediatric surgical ICU	4	120
3	NICU	4	120
4	Pediatric OT	2	60
5	Pediatric medicine ward	6	180
6	Pediatric surgery ward	6	180
7	Emergency/Casualty	4	120
8	Field visits	2	60
	<b>Total</b>	<b>32</b>	<b>960</b>

**Field visits** : Child care center, Anganwadi, play school, Special schools for challenged children, Juvenile court, UNICEF, Orphanage, Creche, SOS village

**Essential****I. Procedures to be observed:**

- Echo cardiogram
- Ultrasound head
- ROP screening (Retinopathy of prematurity)
- Any other

**II. Procedures to be Assisted**

- Advanced neonatal life support
- Lumbar Puncture
- Arterial Blood Gas

- ECG Recording
- Umbilical catheterization – arterial and venous
- Arterial B P monitoring
- Blood transfusion- exchange transfusion full and partial
- IV cannulation & therapy
- Arterial catheterization
- Chest tube insertion
- Endotracheal intubation
- Ventilation
- Insertion of long line
- Assist in surgery

### **III. Procedures to be performed:**

- Airway Management
  - Application of Oro Pharyngeal Airway
  - Oxygen therapy
  - CPAP(Continuous Positive Airway Pressure)
  - Care of Tracheostomy
  - Endotracheal Intubation
- Neonatal Resuscitation
- Monitoring of Neonates – clinically & with monitors, CRT (Capillary Refill Time), assessment of jaundice, ECG
- Gastric Lavage
- Setting of Ventilators
- Phototherapy
- Assessment of Neonates: Identification & assessment of risk factors, APGAR Score, gestation age, Anthropometric assessment, Weighing the baby, Newborn examination, detection of life threatening congenital abnormalities,
- Admission & discharge of neonates
- Feeding-management of breast feeding, artificial feeding, expression of breast milk, OG(Orogastric) tube insertion, gavage feeding, TPN, Breast feeding counseling
- Thermoregulation- Axillary temperature, Kangaroo Mother Care (KMC), Use of Radiant warmer, incubators, management of thermoregulation & control
- Administration of Drugs : I/M, IV injection, IV Cannulation & fixation infusion pump, Calculation of dosages, Neonatal formulation of drugs, use of tuberculin/insulin syringes, Monitoring fluid therapy, Blood administration.
- Procedures for prevention of infections : Hand washing, disinfections & sterilization, surveillance, fumigation
- Collection of specimens
- Setting, Use & maintenance of basic equipment : Ventilator, O<sub>2</sub> analyzer, monitoring equipment, Photo therapy unit, Flux meter, Infusion pump, Radiant warmer, incubator, Centrifuge machine, Bilimeter, Refractometer, laminar flow

**CLINICAL SPECIALITY – II**  
**MENTAL HEALTH NURSING**

Placement : II Year

Hours of Instruction

Theory : 150

Practical : 960

Total : 1110

**Course Description**

This course is designed to assist students in developing expertise and in depth understanding in the field of psychiatric nursing. It will help students to develop advanced skills for nursing intervention in various psychiatric conditions. It will enable the student to function as psychiatric nurse practitioner/specialist. It will further enable the student to function as educator, manager, and researcher in the field of psychiatric nursing

**Objectives**

At the end of the course the students will be able to,

1. apply the nursing process in the care of patients with mental disorders in hospital and community
2. demonstrate advanced skills/competence in nursing management of patients with mental disorders
3. identify and care for special groups like children, adolescents, women, elderly, abused and neglected, people living with HIV/AIDS
4. identify and manage psychiatric emergencies
5. provide nursing care to critically ill patients with mental disorders
6. utilize the recent technology and various treatment modalities in the management of patients with mental disorders
7. demonstrate skills in carrying out crisis intervention
8. appreciate the legal and ethical issues pertaining to psychiatric nursing
9. identify areas of research in the field of psychiatric nursing
10. prepare a design for layout and describe standards for management of psychiatric units/emergency units/hospitals
11. teach psychiatric nursing to undergraduate students & in-service nurses

7	Home for the aged and Hospice	2	60
8	Rehabilitation	2	60
	<b>Total</b>	<b>32</b>	<b>960</b>

**Categorization of practical activities**

**Observed**

- MCH office and DPHNO
- CHC/ First Referral Unit(FRU)
- Child guidance clinic
- Institute/Unit for mentally challenged
- District TB centre
- AIDS control society
- Filariasis clinic
- RCH clinic
- STD clinic
- Leprosy clinic
- Community based rehabilitation unit

- Cancer centers
- Palliative care
- Home of old age
- Mental health units
- De-addiction centres
- School health services
- Industry
- Selected industrial health centers
- ESI unit
- Municipality/ corporation office

**Assisted**

- Laparoscopic sterilization
- Vasectomy
- All clinics related to RCH
- Monitoring of national health and family welfare programmes

**Performed**

- Conduct various clinics
- School health assessment.
- Health survey.
- Health assessment
- Drug administration as per the protocols
- Treatment of minor ailments
- Investigating outbreak of epidemic.
- Screening for leprosy, TB and non-communicable disease
- Presumptive and radical treatment for Malaria.
