Registrar
Yenepoya(Deemed to be University)
University Road, Deralakotte
Mangalore- 575 018, Karnataka

The syllabi of all the programs and courses offered by Yenepoya (Deemed to be University) [YDU] are a description and plan to enhance student learning and facilitate faculty teaching. This also assists in monitoring program quality. These syllabi are revised periodically to ensure that they are relevant to and up to date with local, regional, national and global trends in educational techniques and the needs of the stakeholders including the students, teachers and society.

Various committees of YDU and its constituent units are involved in multiple steps to bringing about a change in the syllabus. The process of syllabus revision is as follows:

A. Targeted needs assessment

• **Emerging trends and best practices**

Interaction with subject experts from premier and reputed institutes during the Board of studies meeting, updates discussed in scientific publications & conferences are discussed at the department level and if found relevant further discussed in BOS meetings. The various changes prescribed or mandated by regulatory bodies, best practices observed locally, nationally, or globally also are deliberated in these meetings.

• **Feedback from the stakeholders**

The students and teachers of YDU are requested to provide feedback on the course content and teaching, learning and evaluation. The alumni, professionals, employers and parents are also requested to share their feedback and gaps in the curriculum. The responsibility of feedback collection lies with heads of units & departments, curriculum committee and IQAC. Online survey tools such as Google forms are used and administered via e-mails or LMS (YENGAGE). The feedback is collected as per the SOPs prepared by the University.

Registrar
Yenepoya (Deemed to be University)
University Road, Deralakatte
Mangalore- 575 018, Karnataka

B. Analysis of identified gaps

The gaps identified are then discussed at the department or unit level depending on the ramifications of the proposed change. This discussion happens during departmental meetings and Unit meetings (College council meetings). If the proposed change is found acceptable and feasible then the next step is taken. The deliberations take into account the value addition and impact of the change on skill and competency development and employability.

C. Educational strategies

- Once the proposed change is accepted in principle, then the educational strategies are planned. This includes defining the specific learning objectives, mapping them to the course and program objectives, identifying the most appropriate teaching, learning and assessment techniques and its placement in the curriculum. The logistic requirements such as infrastructure, equipment, manpower are also deliberated on and identified.
- This entire process is carried out by the subject experts and trained teachers and members of the medical education unit, dental education unit and Yenepoya Centre of Faculty Development-YEN-FDC.
- The curriculum revision is planned under the supervision of the University and unit Curriculum Committee. Once the proposed syllabi change is approved by the University Curriculum Committee, then it is submitted for necessary approvals.

D. Approvals for the revision

The syllabi revisions are discussed in BoS and respective Faculties of study for content, feasibility and impact on the learning experience. It is submitted for deliberations by the Academic Council and Board of Management who critically deliberate on the changes and provide inputs. After approval from statutory bodies, the syllabus change is incorporated into the curriculum.

E. Implementation

The syllabus revision is then implemented for the specified course and programs. The changes are duly informed to the students and all the teachers concerned. The implementation process is initiated, planned and monitored by heads of respective units and departments and the curriculum committees. Feedback from the stakeholders is collected once the revision is implemented and is analyzed for any further changes.

F. Support for implementation, monitoring and scrutinizing the syllabus revision

Various committees of YDU play an integral role in strategizing the curricular changes, implementation, scrutinizing and analyzing the feedback. They facilitate and monitor the implementation of syllabi revision by training and empowering the teachers to be able to bring about these changes. They are also involved in sensitization and training of the teachers on UGC, MHRD initiatives and various quality mandates.

The committees involved in the process of strengthening the academic courses and programmes are:

- University Curriculum committee
- The unit wise Curriculum committee
- Phase wise Curriculum committee for Faculty of Medicine
- Committees for implementation of Competency-based Medical education curriculum
- Yenepoya Centre of Faculty Development-YEN-FDC.
- Medical Education Unit
- Dental education unit, etc.

**Competency-Based Medical Education (CBME) implementation at
Yenepoya Medical College, Mangalore.**

From the academic year 2019-20, Yenepoya Medical College has implemented CBME curriculum as per the NMC guidelines addressing attributes required for Indian medical graduates for Phase 1 and 2 MBBS students. Delivery of CBME curriculum and evaluation strategies is ensured by providing training to the faculty members in the form of conducting Conferences, CISP Workshop, Revised Basic course workshop in Medical Education technologies, seminars, CMEs, seminars, etc. The curriculum is implemented to ensure that the graduates acquire adequate knowledge and skills of professional, ethical, and humanitarian principles relevant to health care in line with national and regional health care policies and schemes.

The components of CBME:

Skill lab training: ACTS YEN (Advanced Comprehensive Clinical Training in Simulation), one of the largest centres in India training the students and faculty using Hi-Fidelity simulators, task trainers and a virtual dissection table. The students of Phase 1 and 2 MBBS are exposed to the integrated simulation based modules which are developed by the respective departments, the schedule of which is included in the time table itself. This fully equipped centre was used for teaching technical and non technical or soft skills to students. The training is structured and graded with increasing level of proficiency. This training ensures that the student gets practice

and builds his confidence in a stress free environment. These sessions have pretest, briefing, simulation exposure, de briefing, feedback and post test. The department faculties have been trained in conducting simulation based training.

Clinical training/Doctor learner method of learning: Early clinical exposure (classroom, videos, hospital visits, field visits), skill certification of the competencies specific to the departments, case based discussion, bed side teaching, use of simulation were implemented to integrate their acquired knowledge with skills and competencies.

Formative assessments: Regular assessments are conducted which include multiple choice questions, activities in the discussion forum, written assignments, unit tests, reflective writing, quizzes, poster presentations, concept maps, student seminars, OSPE, OSCE, crossword puzzles, jigsaw puzzles, logbook entries etc. YENGAGE, the Learning Management System of the

Use of Online platforms/Online mode related to CBME implementation: Activities conducted for undergraduate students include:

- E-classrooms sessions which are live streamed aided by powerpoint presentations using Google Meet, Microsoft Teams.
- The sessions were recorded and the recordings are made available to the students for later reference.
- YENGAGE LMS was used actively in discussion forums, electronic assignment submissions and online tests.
- Students were involved in the E-seminar presentation in small groups with a faculty as a moderator.
- E practical classes which were feasible and can be handled by online mode were identified by the departments and conducted by sharing relevant videos followed by discussion on the topic.
- Internal assessments were conducted by using Open book exam, take home exam with online monitoring, online OSPE, Online Viva-voce. In all these, faculty and students were trained appropriately in conducting such examinations.
- Different online platforms like Kahoot, Quizizz, ProProfs, Mentimeter, etc for interactive sessions are also used.

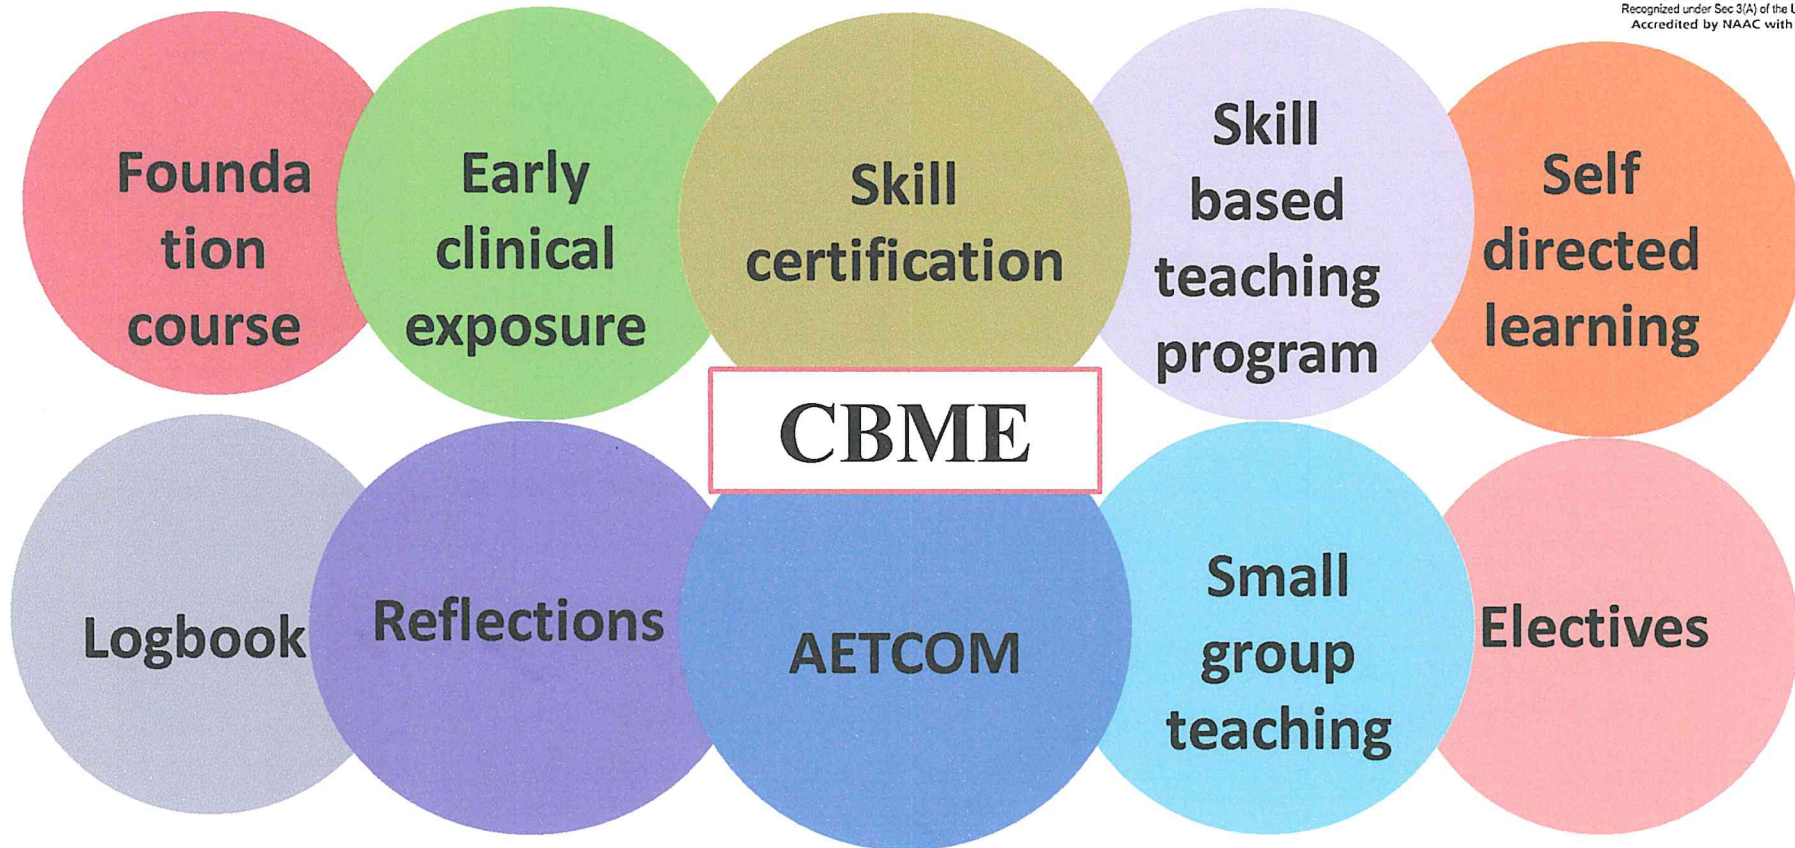

Highlights of CBME implementation

- Strict adherence to the time table planned with foundation course, Simulation based sessions, formative assessments, feedback sessions
- Different teaching learning activities to enhance student learning experience in all learning domains
- Community oriented learning through family adoption program, field visits and community diagnosis by participatory approaches along with student research projects

Checklist

Description of competency :

Perform urine analysis to estimate and determine normal constituents (BI II.4)

Sl. No.	Assessment Criteria	Date of Evaluation		
1	Student is able to list all physical characteristics of normal urine			
2	Student is able to perform the physical examination of urine sample for volume, appearance, colour, odour, pH and specific gravity			
3	Student is able to interpret the results of all the above physical examination of urine sample			
4	Student is able to list common organic constituents (Urea, Uric acid, Creatinine, Urobilinogen) of normal urine and the tests to be performed			
5	Student is able to explain the principles of all organic tests performed for normal constituents of urine			
6	Student is able to perform relevant tests for organic constituents of urine according to the procedure given			
7	Student is able to interpret the results of all the tests for organic constituents of normal urine along with normal levels in urine			
8	Student is able to list common inorganic constituents (Calcium, Phosphate, Ammonia) of normal urine and the tests to be performed			
9	Student is able to explain the principles of all organic tests performed for normal constituents of urine			
10	Student is able to perform relevant tests for inorganic constituents of urine according to the procedure given			
11	Student is able to interpret the results of all the tests performed for inorganic constituents of normal urine along with normal levels in urine			
12	Student is able to interpret the physiological and pathological variations in organic and inorganic constituents of urine			
	Overall performance (A/B/C)			
	Appropriate feedback given to student (Yes/No)			
	Name of Evaluator			
	Signature of Evaluator			
	Signature of Student			

It is hereby certified that the student is competent to perform the above mentioned skill

Date of certification :

Checklist 3

Students, **Description of competency :
Demonstrate estimation of Glucose in serum (BI 11.21)**

Sl. No.	Assessment Criteria	Date of Evaluation		
		24/8/2021	21/9/21	
1	Student is able to explain the principle of the given method of the estimation of Glucose	✓	✓	
2	Student is able to mention other methods for estimation with advantages and disadvantages	✓	✓	
3	Student is able to perform the estimation of serum Glucose in given sample according to the given procedure correctly	✓	✓	
4	Student is able to calculate the concentration of the given analyte using the appropriate formula	✓	✓	
5	Student is able to write the report of the given test requested correctly with appropriate units and reference intervals	✓	✓	
6	Student is able to mention the preanalytical errors that could affect the test result	✓	✓	
7	Student is able to mention the right collection tube and right time for collecting fasting and post prandial samples	✓	✓	
8	Student is able to interpret the report of the given sample according to current standard guidelines using biological reference intervals of fasting, postprandial and random glucose	✓	✓	
9	Student is able to relate the findings of estimation performed with clinical conditions appropriately	✓	✓	
10	Student is able to extrapolate the results of serum glucose in different clinical conditions appropriately	✓	✓	
Overall performance (A/B/C)		A	A	
Appropriate feedback given to student (Yes/No)		YES	Y

SKILL CHECKLIST-Sensory System Examination PY 10.11

Satisfactory (✓), unsatisfactory (X)

Steps	Attempt 1 Date:	Attempt 2 Date:	Attempt 3 Date:
<ul style="list-style-type: none"> • Introduce to the subject • Make the subject comfortable • Informs subject about the procedure and takes informed consent. • Stands on the right side of the subject • Provide proper instructions to the subject • Uses hand sanitizer • Ask subject to close his/her eyes. • Elicit the sensation dermatome-wise on both sides of the body. • Ask the subject to indicate whether he feels the specific sensations <p>I. Anterior spinothalamic tract Crude touch</p> <ul style="list-style-type: none"> • Provide proper instructions to the subject. • Elicit the crude touch by touching with your finger tip/ blunt object on the skin of different dermatomes. • Ask the subject to indicate whether he feels crude touch <p>II. Lateral spinothalamic tract Superficial pain</p> <ul style="list-style-type: none"> • Provide proper instructions to the subject that you will be eliciting pain. • With the help of a pin (not a needle), lightly prick the skin of different parts of the body and ask the subject to indicate whether he feels pain. • Elicit pain from all dermatomes of both sides of the body. <p>Deep pain Steps</p> <ul style="list-style-type: none"> • Provide proper instructions to the subject. • Deep pain is elicited by squeezing the muscle or tendon (Achilles tendon and Biceps Brachii) till pain is produced. Repeat the procedure on the identical points of the body on the opposite side and compare the results. <p>Temperature Steps</p> <ul style="list-style-type: none"> • Gives proper instructions to the subject (to say whether he feels cold or warm when touched with different glass tubes). • Take two test tubes containing warm and cold water separately. • Place the test tubes on the skin of the subject, each in turn or randomly and ask the subject to say whether he feels warm or cold. <p>Examine warm and cold sensation on all the dermatomes of both sides of the body and note your observation.</p> <p>III. Dorsal column pathway Fine touch Steps</p>			

ATTESTED

Dr. Gangadhara Somayaji K S
Registrar
Yenepoya (Deemed to be University)
University Road, Derlakatte
Mangalore 575 018, Karnataka.

<ul style="list-style-type: none"> Provide proper instructions to the subject (to raise his/her finger or say 'yes' when he feels the sensation of touch). Ask the subject to close his/her eyes. With the help of cotton wool, lightly touch the skin of the different parts of the subject. If the subject raises his/her finger or says 'yes' enquire whether the feeling is normal or different. If the subject does not feel the sensation, compare carefully with the corresponding area on the opposite part of the body. <p>Pressure</p> <p>Steps</p> <ul style="list-style-type: none"> Provide proper instructions to the subject. Ask the subject to close his/her eyes. Elicit the pressure sensation by pressing with your finger tip on the skin of different dermatomes. <p>Tactile localization</p> <p>Steps</p> <ul style="list-style-type: none"> Provide instructions to the subject to localize (with the help of a ballpoint pen) the part of the body that is touched by the tip of a pen. Ask the subject to hold a pen and close his/her eyes. Touch the skin of one area of the body with the help of a ball pen and ask the subject to immediately localize that point touching with the pen that he is holding. Measure the distance between the two points - the localization distance. Likewise, determine the localization distance on different parts of the body on both sides. <p>Two – point discrimination</p> <ul style="list-style-type: none"> Provide instructions to the subject to say whether he feels the touch of one point or two points when he is touched by a compass aesthesiometer. Ask the subject to close his/her eyes. Separate the two limbs of the compass aesthesiometer a little and touch the skin of the subject lightly with the two points of the aesthesiometer simultaneously. Ask the subject to say whether he is being touched at one or two points. If the subject says one point, increase the distance between two points a little more and repeat the test till two separate points are appreciated by the subject (the distance between two points is called the minimum separable distance). Record the minimum separable distance on different parts of the body on both the sides. <p>Stereognosis</p> <p>Steps</p>	<p style="color: purple; font-weight: bold; font-size: 1.2em;">ATTESTED</p> <p style="color: green; font-size: 1.5em; font-family: cursive;">h</p> <p style="color: purple; font-weight: bold;">Dr. Gangadhara Somayaji K S</p> <p style="color: purple; font-weight: bold;">Registrar</p> <p style="color: purple; font-weight: bold;">Yenepoya (Deemed to be University)</p> <p style="color: purple; font-weight: bold;">University Road, Deralakatte</p> <p style="color: purple; font-weight: bold;">Mangalore 575 018, Karnataka.</p>
---	---

- Provide instructions to the subject to identify the object when asked to handle it.
- Ask the subject to close his/her eyes.
- Place a familiar object in one hand of the subject and ask him to recognize it by palpating the object.
- Repeat the procedure with four to five familiar objects.
- Repeat the procedure in the opposite hand.

Graphasthesia

- Provide instructions to the subject to identify the alphabet/number when traced on the skin.
- Ask the subject to close his/her eyes.
- Trace any alphabet/ number on the skin of the subject and ask him to identify it.
- Repeat the procedure in the opposite side.

Sense of Position and Joint Movement

- Provide proper instructions to the subject (to recognize the particular position of the limb when the limb is moved).
- Ask him to close his/her eyes.
- Move his/her finger or hand, up and down and ask the subject to recognize the movement by calling out the position of the finger/limb or by imitating the same movement in the other limb.
- Repeat the procedure by changing the position of all the limbs.

Sense of Vibration

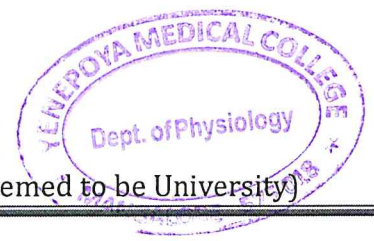

- Provide proper instructions to the subject.
- Make the tuning fork (128 Hz) vibrate by hitting the blades of the fork against the hypothenar eminence of the palm.
- Place the foot of the vibrating tuning fork on bony prominences like the styloid process of the radius and medial or lateral malleolus and ask the subject whether he feels the vibration.
- Ask the subject to raise his/her finger when he ceases to feel the vibration.
- Immediately place the tuning fork on the corresponding bony prominence of your body and note whether you can still perceive the vibration.

Romberg's test

- Provide proper instructions to the subject asking him to stand with his/her feet close together and ask him to stand with
 - i. Eyes open.
 - ii. Eyes closed.
- Position yourself behind the subject with open arms
- Look if subject sways
