

Ref: No. Y/REG/ACA/38-ACM/2020

14.05.2020

**NOTIFICATION – 38-ACM/12 /2020 dtd. 14.05.2020**

Sub: Revised curriculum of the existing B.Sc. (Tech) programmes and Starting of additional programmes under the Faculty of Allied and Healthcare Professions

Ref: Resolution of the Academic council at its 38<sup>th</sup> meeting held on 27.04.2020, vide agenda - 23

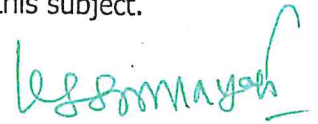

\*\*\*\*\*

The Academic Council at its 38<sup>th</sup> meeting held on 27.04.2020 and subsequently the Board of Management at its 49<sup>th</sup> meeting held on 30.04.2020 have resolved to approve the revised curricula and regulations of existing 08 B.Sc. Technology Programmes (Anaesthesia & O.T. Technology, Renal Dialysis Technology, Respiratory Care Technology, Medical Laboratory Technology, Medical Imaging Technology, Cardio Vascular Technology, Perfusion Technology, Optometry Technology) and starting of 04 new programmes under the Faculty of Allied & Healthcare Professions

1. B.Sc. in Physician Assistant
2. B.Sc. in Clinical Psychology
3. B.Sc. in Emergency Medicine Technology
4. B.Sc. in Neuro Science Technology

All these programmes shall follow Choice Based Credit System.

This notification will supersede all the earlier notifications issued on this subject.

**NOTIFICATION – 10/32-ACM/2018 dtd. 03.09.2018**

Sub: Amendment to the B.Sc. Technology course  
  
Ref: Resolution of the Academic Council at its meeting held on 11.08.2018  
vide agenda – 14  
  
\*\*\*\*\*

The Academic Council at its 32<sup>nd</sup> meeting held on 11.08.2018 approved the recommendation of the Faculty of Medicine and subsequently ratified by the Board of Management for amendment to the B.Sc. Technology course as follows to be implemented prospectively.

**Microbiology : Course: BSc Technology 1<sup>st</sup> Year**

Existing Syllabus	Now Amended
Theory 70 hours ( Units 9) Practical 20 hours	No additions No deletions Topics have been categorized as must to know and desirable to know
Question paper Pattern Theory max marks 80	Max marks to retain as 80 Weightage marks- 90% marks from must to know portion and 10% from desirable to know portion

**Course : BSc Medical Lab Technology 2<sup>nd</sup> year and 3<sup>rd</sup> year**

Existing Syllabus	Now Amended
2 <sup>nd</sup> year – Bacteriology and Parasitology	To shift Immunology to 2 <sup>nd</sup> year To shift Parasitology to 3 <sup>rd</sup> year
3 <sup>rd</sup> year – Immunology Virology and Mycology	No additions No deletions Topics have been categorized as must to know and desirable to know
Question paper Pattern Theory max marks 80	Max marks to retain as 80 Weightage marks- 90% marks from must to know portion and 10% from desirable to know portion

Topic	Must to know:	Desirable to know
<b>Unit 1: Introduction</b>		
Historical aspects	Definitions and terms in Microbiology, classification of microbes Contribution of Louis Pasteur & Robert Koch	-
Morphology and anatomy of Bacteria	Morphological classification cell structure, cell wall, capsule and spore	Flagella, pili
<b>Unit 2: Growth and multiplication of bacteria</b>		
Bacterial growth	Growth curve	Growth requirements, generation time
Culture Media & Methods	Classification of media, definitions, examples and uses	Culture methods
<b>Unit 3: Sterilization and disinfection</b>		
Sterilization	Definition, Classification of methods, Principles of dry heat (Hot air oven) and moist heat methods.	Filtration and radiation methods, chemical methods, CSSD
Disinfection antiseptics	Definitions types & examples of disinfectants and antiseptics with preference to commonly used antiseptics in hospital practice.	-
<b>Unit 4: Immunology</b>		
Infection	Definition, types of infection, sources and modes of transmission	Carriers- definition, types, examples
Immunity	Definition and classification. Innate and acquired Immunity in detail. Vaccines and immunization schedule	Humoral& cell mediated immunity
Antigen & Antibody	Antigen- definition Antibodies-definition, classes & structure of IgG	IgA, IgM
Antigen antibody reactions	Types of serological reactions Applications of agglutination tests & ELISA	-

Unit 5. Systematic Bacteriology		
<i>Staphylococci</i>	Morphology, infections caused by <i>S.aureus</i>	-
<i>Streptococci</i>	Morphology, classification, pathogenesis, infections caused by <i>S.pyogenes</i> including rheumatic fever and glomerulonephritis	-
<i>Corynebacterium diphtheriae</i>	Morphology of <i>C. diphtheriae</i> , pathogenesis, lab diagnosis and prophylaxis of diphtheria.	-
<i>Clostridium</i>	<i>Cl.tetani</i> : Morphology, infections caused and prophylaxis of tetanus.	-
<i>Salmonella typhi</i>	Morphology, pathogenesis and lab diagnosis of typhoid fever.	Prophylaxis
<i>Shigella</i>	-	Dysentery
<i>Esch coli</i>	-	UTI
<i>Vibrio cholerae</i>	-	Morphology of <i>V. cholerae</i> , pathogenesis and lab diagnosis of cholera in brief
<i>Mycobacteria</i>	Morphology of <i>M. tuberculosis</i> , pathogenesis and lab diagnosis of pulmonary tuberculosis, BCG	<i>M.leprae</i> and atypical Mycobacteria
<i>Spirochaetes</i>	-	Morphology, pathogenesis, clinical conditions and lab diagnosis of <i>Treponema pallidum</i> and <i>Leptospira</i>
Unit6. Virology		
General virology	Differences between bacteria and viruses. Classification of viruses – DNA and RNA viruses	Properties of viruses - structure, size
Herpes Viruses	-	HSV, VZV- transmission and disease caused, Prophylaxis
Hepatitis viruses	Hepatitis B – Structure, transmission, disease caused, lab diagnosis and prophylaxis	Hepatitis A- Transmission and prophylaxis
Rabies viruses		Structure, transmission, disease caused, lab diagnosis and prophylaxis
HIV	Structure, pathogenesis, disease caused and lab diagnosis	-

BSc Optometry

Poliomyelitis virus		Pathogenesis and prophylaxis.
<b>Unit 7: Mycology</b>		
General Mycology	What are fungi? Classification according to morphology	Importance of fungi
Candida species	Morphology, Pathogenesis and Lab diagnosis of candidiasis.	-
Cryptococcus	-	Morphology, Pathogenesis and Lab diagnosis
Dermatophytes	Morphology, Lesions produced and Lab diagnosis of dermatophytes	-
Opportunistic fungi	-	Common opportunistic fungal infections
<b>Unit 8. Parasitology</b>		
General Parasitology	-	Definition and classification of parasites and hosts
Entamoeba histolytica	Morphology, life cycle, Pathogenesis & Lab diagnosis of E .histolytica	-
Malaria	Morphology, life cycle, Pathogenesis & Lab diagnosis of malaria	-
Ancylostoma duodenale	-	Size, Shape, hosts, pathogenesis and lab diagnosis
Ascaris lumbricoides	Morphology, pathogenesis and lab diagnosis	-
General Parasitology	-	Definition and classification of parasites and hosts
<b>Unit 9. Applied microbiology</b>		
Hospital infection and its control	Definition of nosocomial infection, Common organisms associated, risk factors, prevention	Importance of hospital infection control committee
Biomedical waste management	Principle and practices	-
