1. Preamble

Choosing the appropriate radiographs is of prime importance to diagnose any disease condition. Thus, knowledge of the various Radiographic modalities helps the clinicians to choose or advice the appropriate radiographs to be taken for patients. Ability to identify various anatomical landmarks on extra oral radiographs will help the clinicians to differentiate the normal from the abnormal. With this objective a Value Added Course on Extra Oral Radiographs – Clinical Applications is being designed in the Department of Oral Medicine and Radiology. The course is useful for Interns, postgraduates of other departments or any dental graduates.

2. Course Objectives

To provide the participants a systematic exposure to Extra Oral Radiographs.

1. The participants will be able to choose/ advice appropriate radiographic view as per clinical situation.
2. The participants will be able to identify the normal anatomical landmarks on Extra Oral Radiographs, and be able to differentiate it from pathologies.

3. Course content/Syllabus

The course will include didactic and practical sessions on common extra oral radiographic modalities in maxillofacial radiology.

4. Eligibility- Interns

5. Duration - 16 hours :

1 module of 2 days consisting of 8 hours each
