VALUE ADDED COURSE ON HUMAN RIGHTS AND GENDER EQUALITY

PREAMBLE

Human Values define the quality of a person or an organization or society at large. If this pillar is strong, society would remain humane and would prosper. Human values and ethics are not like motor skills, which once mastered remain with forever. Values and ethics have the nature of camphor- they evaporate if not preserved carefully. Thus, there is a need to keep emphasizing the importance of human values in educational institutions.

SCOPE AND NEED

The introduction of value-added courses to the nursing curriculum will enhance the all-round development of students. By studying this course at their undergraduate level they will learn to protect and enforce the human rights and duties. This also enables students to understand the concept of gender equality and human rights to maintain harmony among students and to take part in the initiative to reduce gender discrimination in the campus and society.
