Yenepoya Foundation for Technology Incubation

Yenepoya Foundation for Technology Incubation is an initiative of Yenepoya (Deemed to be University) aimed towards identifying, fostering & mentoring innovators/entrepreneurs in the healthcare innovation process. It was incorporated in May 2019 with an aim to accelerate the growth of healthcare innovation and entrepreneurial ecosystem and is registered as a Section 8, not for profit, organization. The incubator is strategically well placed within the vibrant ecosystem of the University leveraging on the infrastructure and expertise in the areas of Medicine, Dentistry, Public Health, Life Sciences, Biotechnology, Engineering and Management.

The incubator is supported by Department of Biotechnology - BIRAC under National Biopharma Mission for the establishment of Medical Devices Design and Rapid Prototyping Facility. The MedTech Design and Rapid Prototyping facility houses high end instruments for 3D Printing, CNC Machining, Bioprinting, PCB Fabrication, Vacuum Casting, etc. The 3D printers available at the facility will include FDM, SLA, SLS and SLM (Metal), along with high-end 3D scanners. The facility offers wide array of services which includes, Clinical Need Validation, Industrial Product Design, fabrication of thermoplastic, polymer and metal-based parts/products, Bioprinting/Tissue Engineering, PCB fabrication, Electronics Prototyping, Application Development and Product Validation.

The incubator has been recognised as one of the centres by BIRAC under Social Innovation programme for Products: Affordable & Relevant to Societal Health (SPARSH) scheme and will support 10 Social Innovators to work on the areas of Maternal and Child Health, and Ageing and Health. During this fellowship, fellows will follow a structured approach wherein they will discover unmet clinical needs of societal relevance, design and develop affordable and scalable products and solutions with the guidance of mentors from Clinical, Technical and Business expertise.

Also, the incubator has recently been supported by BIRAC for establishment of Early Translation Accelerator (ETA) in the area of healthcare and medical devices. The ETA focusses on catalysing transformation of young academic discoveries (publications/patents) with possible commercial and societal impact into economically viable ventures and technologies which will enable it to be further taken up by the industry for development and commercialisation.

Two faculty innovator teams associated with Yenepoya Technology Incubator have received Biotechnology Ignition Grant (BIG) projects from BIRAC with grant amount around 50 Lakhs each.
