Training Programme
“Carbon Foot Print calculation and implementations” – 18.05.2023

II Sem B.Sc. technical program 2022 batch from Yenepoya School of Allied Health Sciences

Online Training program on “Carbon foot print calculation and implementation” was organized for the staff and students of the university on 18.05.2023. A total of 45 participants have attended the training programme. Ms. R. S. Thulaja, Programme officer, Nature Science Foundation (NSF) was the resource person who gave an introduction to carbon foot print. She explained ways to reduce carbon foot print by recycling and reusing items. She also explained the impact of carbon foot print on our environment. Various examples were given and the calculations were explained using conversion factor.
