PROGRAM STRUCTURE AND COURSE WORK

Bachelor of Public health is a three years program during which students learn about epidemiology, Social science, Environmental health science, Health policy and health education. Bio statistics which is the application of statistics in biology is also an important part of a public health program curriculum. Students are taught to learn about people's attitudes towards health from an anthropological and psychological view point. Students learn to assess a community's health requirements, devise plans and policies and implement health programs.

WHO SHOULD OPT ?

Ideal candidates for the course would typically possess:

- ❖ A passion to serve people as a Public health leader.
- ❖ Dedication to and contribute in controlling emerging diseases from the society.
- ❖ Interest in studying about the prevention and treatment of various communicable and non communicable diseases.
- ❖ A patient and friendly nature.
- ❖ A good communication skill, as the line of work requires them for the community and deal with a number of people.

DURATION OF THE COURSE:

- ❖ BPH is a 3 years course, divided into 6 semesters of 6 months each on a full time basis.

ELIGIBILITY : To be eligible for admission a candidate shall have obtained:

- ❖ A two year Secondary level or Pre University examination (10+2) or its equivalent as recognized by the University with any principle subjects of study.

OR

- ❖ Candidates completing 2 years Diploma in Allied health sciences after pre-university (10+2).

OR

- ❖ Candidate needs to secure minimum 40% marks in 10+2 (SC/ST/OBC minimum 35% marks)
- ❖ Age: 17 years as on 31st December of the year of admission.

COURSE CURRICULUM PATTERN : Choice Based Credit System (CBCS)

CAREER OPPORTUNITY FOR BPH:

- ❖ Public health is an exciting and growing field of study. This field spans many areas, from disease prevention, outbreak control, and health promotion, environmental health, health policy, and even bio-terrorism. Public health professionals play a critical role in monitoring a population's health, controlling disease and fostering policies to improve and promote health and health services. Advancement of a society to a great extent depends on the health of its population. Hence public health professionals have much to do in the present as well as future prospect of a nation.

There is growing concern for improvement of health status from all stakeholders within India and in the foreign countries. In many parts of the world scientist are investing themselves in introducing public health interventions that can deal with the lifestyle. However, India is facing three fold burdens of diseases (Communicable, life style related and poverty). In order to cope with this complex situation, development of public health graduates has become inescapable.

In general, a BPH graduates can choose the following areas to build their career:

- 1) List of Private/Government organizations (National/International NGO's) such as:
 - ❖ National Health Mission (NHM)
 - ❖ Population research centers
 - ❖ Health and family welfare
 - ❖ NIMHANS
 - ❖ Indian Institute of Public Health (IPH)
 - ❖ Indian Public Health Association (IAPH)
 - ❖ Centers for Disease Control (CDC)
 - ❖ National Institute of Health (NIH)
 - ❖ WHO, UNESCO, JHEPHIGO
 - ❖ KHPT, Help age India, CARE, HOPE etc
- 2) Universities/Institution (Education and research)
- 3) Hospitals/ Health centers (MO, Epidemiologist, Programme officers, Health educator/Counselor)
- 4) Pharmaceutical industry (Research assistant, policy analyst etc.)
